A true story of a character named (FD). The protagonist of this story is called From the Difficulty (FD), and tells of a life where he was born to an elite father and a semi-illiterate mother, driven, at an early age, to participate in the family business of working the farm and selling things. He lives an unnamed, in a region replete with civil war, FDs home becomes a center for freedom fighters mobilization, hes eventually moved away from the war zone to those areas insulated from much of the conflict. FD later on leaves this part of the world to ...a place perceived by many as a land which flows with milk and honey, a land in which he would sometimes wonder about what happened to the value of education and where was the American dream hiding. Such is New York City in America. AuthorMr. M Americans today are working harder, working longer and yet for most of us, in this time of ruthless downsizing and political cronyism, job security, a decent standard of living and a comfortable retirement are becoming harder and harder to find. In this brilliantly funny and right-on-target diatribe, irreverent everyman Michael Moore gives his own bold views on who's behind the fading of the American dream. Whether issuing Corporate Crook trading cards, organizing a Rodney King Commemorative Riot, sending a donation to Pat Buchanan from the John Wayne Gacy fan club (which was accepted) or trying to commit former right-wing congressman Bob Dornan to a mental hospital, the in-your-face host of TV Nation and director/star of Roger & Me combines an expansive wit with biting social commentary to make you think and laugh at the same time. In hardcover, Downsize This! stormed the bestseller lists of the New York Times, Wall Street Journal, Washington Post, San Francisco Chronicle and others. Given Michael Moore's enormous -- and growing -- constituency, this trade paperback edition brings his unique perspective on the nation to an even greater audience.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that

may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
