This book is for every SharePoint developer who wants to build state-of-the-art solutions with Silverlight—within the enterprise, for consulting clients, or for commercial sale. Developers increasingly want to build rich applications that run in the SharePoint 2010 browser user interface while offering a far more compelling and engaging experience than conventional web pages. One proven technology gives them all the tools and resources they need to achieve these goals: Silverlight®. Using Silverlight and SharePoint together, developers can create state-of-the-art applications that utilize Silverlight's outstanding user experience, and fully leverage the vast collections of business data already stored in corporate SharePoint deployments. In SharePoint 2010 Development

with Silverlight, two SharePoint gurus collaborate to teach all the concepts and techniques needed to create robust Silverlight solutions for delivery through SharePoint 2010, and present fully documented code that demonstrates superior design and programming. Bob German and Paul Stubbs draw on their extensive experience developing custom SharePoint business solutions with Silverlight and presenting on these technologies at leading Microsoft developer events. Writing for both experienced and new SharePoint developers, they quickly review the fundamentals of both SharePoint and Silverlight development, and then demonstrate how to use both platforms together to build uniquely powerful solutions. These include:

- Simple and connected Silverlight Web Parts (Chapter 5) and Silverlight Web Part Editing (Chapters 7 and 10)
- Advanced use of the SharePoint Client Object Model including dynamic loading, paging, and server-side exception handling (Chapter 8)
- Use of SharePoint's REST API including paging, caching, and filtering (Chapter 9)
- Integration with SharePoint search and social networking (Chapter 10)
- Solutions that improve performance and reduce server traffic by passing serialized .NET objects on the web page (Chapter 7)
- Use of SharePoint's JavaScript API with JQuery (Chapter 7)
- SharePoint applications for Windows Phone 7 (Chapter 12)
- Integration with Office 365 and Windows Azure™ services (Chapter 14)
- Silverlight field types in SharePoint, featuring a mapping field that allows geocoding SharePoint content (Chapter 15)

Including New Features in Silverlight 5 Silverlight 5 introduces a number of new features such as implicit data templates and debugging data binding that can be very helpful in SharePoint solutions. All the examples in this book have been tested with Silverlight 4; some have been extended to showcase the new capabilities in Silverlight 5. See Chapter 3 for a list.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This four-chapter book provides students with the necessary skills to use Microsoft SharePoint Online, SharePoint Web pages, and integrate Office with SharePoint. Also provides a brief overview of HTML, XHTML, XML, and CSS, as well as Accessibility. Beyond point-and-click The goal of the Exploring series is to move students beyond the point-and-click, to understanding the why and how behind each skill. And because so much learning takes place outside of the classroom, this series provides learning tools that students can access anywhere, anytime. Students go to college now with a different set of skills than they did years ago. With this in mind, the Exploring series seeks to move students beyond the basics of the software at a faster pace, without sacrificing coverage of the fundamental skills that everyone needs to know. Also available with MyITLab MyITLab ® is an online homework, tutorial, and assessment program designed for Information Technology (IT) courses, which engages students and improves results. HTML5 Simulation exercises and Live-in-Application Grader projects come with the convenience of auto-grading and instant feedback, helping students learn more quickly and effectively. Digital badges lets students showcase their Microsoft Office or Computer Concepts competencies, keeping them motivated and focused on their future careers. MyITLab builds the critical skills needed for college and career success. Note: You are purchasing a standalone product; MyITLab does not come packaged with this content.
