face2face Second edition is the flexible, easy-to-teach, 6-level course (A1 to C1) for busy teachers who want to get their adult and young adult learners to communicate with confidence. The face2face Second edition Online Workbooks provide the course workbook content plus additional collaborative tools in a package that supports independent study and teacher-managed self-study. As part of a virtual learning world, the online workbooks allow students to collaborate and communicate, and enable teachers to track work and progress. They offer a classroom without walls for schools that wish to take their teaching into the digital age. This pack contains the Student's Book with DVD-ROM and access to the Online Workbook.

The Workbook offers additional practise for students of face2face Starter, with self-study exercises which practise all the language taught in the Student's Book - including exercises on pronunciation and spelling. It also features a Reading and Writing Portfolio linked to the CEF, which contains ten extra double-page lessons to be used either for self-study or in class. What's more, a list of 'Can do' statements helps students to track their own progress in reading and writing. The Workbook also features a removable Answer Key, which can simply be pulled free of the books binding.

The right of transit passage in straits and the analogous right of archipelagic sealanes passage in archipelagic states, negotiated in the 1970s and embodied in the 1982 UNCLOS, sought to approximate the freedom of navigation and overflight while expressly recognising the sovereignty or jurisdiction of the coastal state over the waters concerned. However, the allocation of rights and duties of the coastal state and third states is open to interpretation. Recent developments in state practice, such as Australia's requirement of compulsory pilotage in the Torres Strait, the bridge across the Great Belt and the proposals for a bridge across the Strait of Messina, the enhanced environmental standards applicable in the Strait of Bonifacio and Canada's claims over the Arctic Route, make it necessary to reassess the whole common law of straits. The Legal Regime of Straits examines the complex relationship between the coastal state and the international community.

Covering everything from signal processing algorithms to integrated circuit design, this complete guide to digital front-end is invaluable for professional engineers and researchers in the fields of signal processing, wireless communication and circuit design. Showing how theory is translated into practical technology, it covers all the relevant standards and gives readers the ideal design methodology to manage a rapidly increasing range of applications. Step-by-step information for designing practical systems is provided, with a systematic presentation of theory, principles, algorithms, standards and implementation. Design trade-offs are also included, as are practical implementation examples from real-world systems. A broad range of topics is covered, including digital pre-distortion (DPD), digital up-conversion (DUC), digital down-conversion (DDC) and DC-offset calibration. Other important areas discussed are peak-to-average power ratio (PAPR) reduction, crest factor reduction (CFR), pulse-shaping, image rejection, digital mixing, delay/gain/imbalance compensation, error correction, noise-shaping, numerical controlled oscillator (NCO) and various diversity methods.
