**this text a unique voice and makes it a comprehensive resource for graduate students taking their first course in Marriage and Family Therapy. The book is divided into three sections: Part 1 focuses on the components on which 21st century family therapy is based and summarizes the most recent changes made to not only therapeutic interventions, but to the very concept of “family.” Part 2 presents an overview of the 7 major theoretical models of the field: structural, strategic, Milan, social constructionist, experiential, transgenerational, and cognitive-behavioral family therapy. Each chapter in this section • Focuses on the founder of the theory, its theoretical tenants, and its key techniques • Shows how the model focuses on diversity • Presents the research that supports the approach Part 3 addresses specific treatment areas that are common to marriage and family therapists, such as sex therapy, pre-marital therapy, research, and ethics and legal issues. As an introduction to the field of Marriage and Family Therapy, this volume stands above the rest. Not only will readers gain an understanding of the rich history of the field and its techniques, but they will also see a complete picture of the context in which families are embedded, such as gender, culture, spirituality, and sexual orientation. This knowledge is the key to understanding what differentiates Marriage and Family Therapy from individual psychotherapy. Glossaries, case studies, tables, figures, and appendices appear generously throughout the text to present this information and give students a thorough overview to prepare them for their professional lives.**

medical detective journey and sheds light on a topic so many of us face: mental illness." —Oprah Winfrey Don and Mimi Galvin seemed to be living the American dream. After World War II, Don's work with the Air Force brought them to Colorado, where their twelve children perfectly spanned the baby boom: the oldest born in 1945, the youngest in 1965. In those years, there was an established script for a family like the Galvins--aspiration, hard work, upward mobility, domestic harmony--and they worked hard to play their parts. But behind the scenes was a different story: psychological breakdown, sudden shocking violence, hidden abuse. By the mid-1970s, six of the ten Galvin boys, one after another, were diagnosed as schizophrenic. How could all this happen to one family? What took place inside the house on Hidden Valley Road was so extraordinary that the Galvins became one of the first families to be studied by the National Institute of Mental Health. Their story offers a shadow history of the science of schizophrenia, from the era of institutionalization, lobotomy,

and the schizophrenogenic mother to the search for genetic markers for the disease, always amid profound disagreements about the nature of the illness itself. And unbeknownst to the Galvins, samples of their DNA informed decades of genetic research that continues today, offering paths to treatment, prediction, and even eradication of the disease for future generations. With clarity and compassion, bestselling and award-winning author Robert Kolker uncovers one family's unforgettable legacy of suffering, love, and hope.

In this powerful volume, six qualitative methods are used to analyze a couple therapy with a troubled young couple, illustrating the intricate processes and sub-processes of therapy through client interactions with their therapists and with each other. Increasingly popular for revealing the nuances and complexity of human interactions, qualitative approaches focus on process and discursive methods which can be particularly rewarding in multi-client settings. Through the examples that make up the text, practitioners and researchers become better acquainted with the power of qualitative perspectives and are encouraged to examine their own views on therapy as they consider these and other concepts: The development of dialogical space in a couple therapy session. Introducing novelties into therapeutic dialogue: the importance of minor shifts of the therapist. Therapists' responses for enhancing change through dialogue: dialogical investigations of change. Fostering dialogue: exploring the therapists' discursive contributions in a couple therapy. Dominant story, power, and positioning. Constructing the moral order of a

Emotionally Focused Family Therapy is the definitive manual for applying the effectiveness of emotionally focused therapy (EFT) to the complexities of family life. The book sets out a theoretical framework for mental health professionals to enhance their conceptualization of family dynamics, considering a broad range of presenting problems and family groups. The first section applies EFT theory and principles to the practice of family therapy. The second section explicates the process of EFT and examines the interventions associated with the EFT approach to families.
