This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

We are shipping the July 2021 edition from this page. Several topics have been cut in accordance with updated CPA Exam Blueprints. At Least Know This publishes a 45-page review for Financial Accounting and Reporting. We do not believe students must memorize 300 pages of review to pass the CPA exam. And, given fewer pages, we find that students have greater retention. To lighten our books, we use wider page margins, decrease font, and eliminate redundancy. We use tables because they structure and compare information efficiently. We teach with examples. And we improve the quality of our writing. The result is FAR in 45 pages. Fake cash method-Classic accounting framework for converting to and from cash flow. This method is intuitive because, in a simple construction, cash and net income are equal and opposite. T-account methods to solve intercompany sales and foreign currency transactions. Updates to reflect Credit Loss ASUs (2020) and SEC amendment for accelerated filers (Oct. 2020).
