

Financial Accounting By Meigs And Meigs 15th Edition

"Intermediate Financial Accounting Volume 1 by G. Arnold and S. Kyle, developed in collaboration by Athabasca University and Lyryx, is intended for a first course in Intermediate Financial Accounting, and presumes that students have already completed one or two Introductory Financial Accounting courses. The textbook reflects current International Financial Reporting Standards (IFRS), such as IFRS 15 – Revenue from Contracts With Customers. This textbook provides a review of introductory accounting concepts and covers all topics essential to a first level Intermediate Accounting course: the conceptual framework and current landscape of financial reporting; statements of financial position; comprehensive income; cash flows and shareholders' equity; cash and receivables; revenue; inventory; property, plant and equipment; intangible assets; and intercorporate investments. For those requiring preparation for CPA designation, competencies as outlined by the CPA are addressed in this textbook. For a detailed competency map, please contact us at info@lyryx.com. It also focuses on more difficult intermediate accounting topics that match prerequisite requirements for students advancing to a second level Intermediate Financial Accounting course. Topics that are covered in Advanced Financial Accounting courses, such as consolidations and foreign exchange, are not included here."--BCcampus website.

Principles of Accounting Volume 1 - Financial Accounting

Accounting, the Basis for Business Decisions

Study Guide for Use with Financial Accounting

Financial Accounting, 10e, by Meigs/Williams/Haka/Betner will gain support in traditional accounting departments where instructors expect students to not only understand the concepts of accounting, but to be able to apply and perform accounting processes. Truly a revision based on users needs and market feedback, the tenth edition of Financial Accounting offers increased end-of-chapter material, and a new student CD-ROM including GLAS, SPATS, and student tutorial. Chapters 6-10 are reorganized to be more consistent with the structure of a balance sheet, making the accounting process much clearer for the student. Finally, by providing a stronger foundation, Meigs better prepares students to apply concepts such as the Statement of Cash Flows and Financial Statement Analysis in later chapters. These changes and others have made an already proven financial accounting text even stronger.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting students. The text introduces core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connection processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.
