Are you looking for an engaging, decision-focussed approach to financial reporting that encourages students to develop their interpretative skills? Building on the success of the first edition, this textbook takes a 'how, why, what' approach to financial accounting, interwoven in each chapter. From chapter one, students understand how financial information is prepared and presented, why it is prepared and presented in this way, and what the resulting financial information means for users. Designed for students taking a step beyond their introductory financial accounting training, the textbook equips them with all the key tools they will require when they enter professional practice. Reflective of the latest International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS), this textbook delivers concise, clear explanations of all the key issues in accounting standards that students need to know. Content maps to professional accounting body syllabi, making this the perfect choice for accounting courses which offer exemptions. Chapters are rich with 3 types of examples to enhance understanding: - Illustrative examples of real-world situations; - Worked examples demonstrating the calculation of figures required for financial statements; - Extracts from company annual reports demonstrate how the theory relates to financial reporting in practice. More engaging, more balanced, and more applied than other offerings, this is exactly the textbook your financial reporting students need! An extensive Online Resource Centre accompanies the textbook and includes: For students: DT Solutions to all the end-of-chapter questions in the book including walkthroughs of solutions to key questions; DT Additional graded questions including professional body questions; DT Additional interpretative case studies based on real-life companies; DT A guided tour through a company report DT Specific study skills tips for accounting students For lecturers: DT Customisable PowerPoint slides DT Solutions to all the additional online questions DT Outline solutions to the interpretative case studies DT Group discussion questions

Each study guide chapter is comprised of a detailed chapter review, demonstration problems, true/false, multiple-choice, matching questions, and comprehensive exercises. Solutions to study guide questions are provided.

This book contains the solutions to the exercises in the Intermediate Financial Accounting Volume 2 textbook.

"Intermediate Financial Accounting Volume 1 by G. Arnold and S. Kyle, developed in collaboration by Athabasca University and Lyryx, is intended for a first course in Intermediate Financial Accounting, and presumes that students have already completed one or two Introductory Financial Accounting courses. The textbook reflects current International Financial Reporting Standards (IFRS), such as IFRS 15 – Revenue from Contracts With Customers. This textbook provides a review of introductory accounting concepts and covers all topics essential to a first level Intermediate Accounting course: the conceptual framework and current landscape of financial reporting; statements of financial position; comprehensive income; cash flows and shareholders' equity; cash and receivables; revenue; inventory; property, plant and equipment; intangible assets; and intercorporate investments. For those requiring preparation for CPA designation, competencies as outlined by the CPA are addressed in this textbook. For a detailed competency map, please contact us at info@lyryx.com. It also focuses on more difficult intermediate accounting topics that match prerequisite requirements for students advancing to a second level Intermediate Financial Accounting course. Topics that are covered in Advanced Financial Accounting courses, such as consolidations and foreign exchange, are not included here."--BCCampus website.

Financial accounting (or financial accountancy) is the field of accounting concerned with the summary, analysis and reporting of financial transactions pertaining to a business. This involves the preparation of financial statements available for public consumption. Stockholders, suppliers, banks, employees, government agencies, business owners, and other stakeholders are examples of people interested in receiving such information for decision making purposes.Financial accountancy is governed by both local and international accounting standards. GAAP (which stands for Generally Accepted Accounting Principles) is the standard framework for guidelines for financial accounting used in any given jurisdiction. It includes the standards, conventions and rules that accountants follow in recording and summarising and in the preparation of financial statements. On the other hand, IFRS (International Financial Reporting Standards) is a set of international accounting standards stating how particular types of transactions and other events should be reported in financial statements. IFRS are issued by the International Accounting Standards (IASs). With IFRS becoming more widespread on the international scene, consistency in financial reporting has become more prevalent between global organisations.Whilst financial accounting is used to prepare accounting information for people outside the organisation or not involved in the day-to-day running of the company, management accounting provides accounting information to help managers make decisions to manage the business.
