"[A] magnificent history of money and finance."--New York Times Book Review "Convincingly makes the case that finance is a change-maker of change-makers."--Financial Times In the aftermath of recent financial crises, it's easy to see finance as a wrecking ball: something that destroys fortunes and jobs, and undermines governments and banks. In *Money Changes Everything*, leading financial historian William Goetzmann argues the exact opposite—that the development of finance has made the growth of civilizations possible. Goetzmann explains that finance is a time machine, a technology that allows us to move value forward and backward through time; and that this innovation has changed the very way we think about and plan for the future. He shows how finance was present at key moments in history: driving the invention of writing in ancient Mesopotamia, spurring the classical civilizations of Greece and Rome to become great empires, determining the rise and fall of dynasties in imperial China, and underwriting the trade expeditions that led Europeans to the New World. He also demonstrates how the apparatus we associate with a modern economy—stock markets, lines of credit, complex financial products, and international trade—were repeatedly developed, forgotten, and reinvented over the course of human history. Exploring the critical role of finance over the millennia, and around the world, Goetzmann details how wondrous financial technologies and institutions—money, bonds, banks, corporations, and more—have helped urban centers to expand and cultures to flourish. And it's not done reshaping our lives, as Goetzmann considers the challenges we face in the future, such as how to use the power of finance to care for an aging and expanding population. *Money Changes Everything* presents a fascinating look into the way that finance has steered the course of history.

With *THE LEGAL ENVIRONMENT OF BUSINESS*, 13E readers can enjoy a practical introduction to the structure and function of the legal system from the perspective of the professional non-lawyer. While the authors note the system's strong legal heritage, the book emphasizes the nuts and bolts of basic legal rules that most significantly impact business today. This popular book adapts a traditional case focus to address the unique needs of future and current business students. Clear, concise coverage of a wide range of timely topics introduces key points of law using business-specific examples and realistic scenarios. The authors' readable style complements their extensive knowledge of domestic and international business to make this book a favorite among both professionals and learners new to the

legal environment. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Capital Markets, Financial Management, and Investment Management

FINANCE Created by the experienced author team of Frank Fabozzi and Pamela Peterson Drake, Finance examines the essential elements of this discipline and makes them accessible to a wide array of readers—from seasoned veterans looking for a review to newcomers needing to get their footing in finance. Divided into four comprehensive parts, this reliable resource opens with a detailed discussion of the basic tools of investing and financing decision-making—financial mathematics and financial analysis. After this informative introduction, you'll quickly become familiar with the three primary areas of finance—capital markets (Part II), financial management (Part III), and investment/asset management (Part IV)—and discover how these different areas are interconnected. Finance is a well-rounded guide to this dynamic field. The straightforward insights found here will put you in a better position to understand what the principles of modern finance are and how they can be used to make the right decisions when managing risk and return in today's complex financial environment.

Combining current coverage with a student-friendly modular format, BASIC FINANCE: AN INTRODUCTION TO FINANCIAL INSTITUTIONS, INVESTMENTS & MANAGEMENT, 11E introduces the three primary aspects of finance and examines how they are interrelated to give students a firm foundation in all of finance—not just corporate finance. Each chapter offers a concise, self-contained treatment of one or two finance concepts, or institutions easily covered in a single class period. Students can build on what they learn through the text's Internet resources, number problems, illustrations using financial calculators, and a Microsoft Excel appendix. The time value of money is emphasized throughout. The 11th Edition includes numerous self-help problems with answers and relationships with answers, new coverage of classes of stock/preferred stock, new sections on Internet sources of information, and updated tax laws. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Known for its real-world examples and effective problem sets, this undergraduate corporate finance course is now in its 9th edition and includes a student resource CD-ROM, with Excel tutorials and additional practice problems. The tenth edition features InfoTrac college edition access.
