Due to ongoing advancements in technology, new legislation, and other innovations, the field of finance is rapidly changing. Developments in financial markets and investments necessitate that students be exposed to these topics as well as to financial management, the traditional focus of the introductory finance course. Introduction to Finance develops the three components of finance in an interactive framework that is consistent with the responsibilities of all financial professionals, managers, intermediaries, and investors in today's economy. To show the interrelationships between the areas of finance, the text emphasizes how investor activities monitor firms and focuses on the role of financial markets in channeling funds from investors to firms.

The Art and Science of Corporate Investment Decisions

Financial Management

A supplement for undergraduate and graduate Investments courses. See the decision-making process behind investments. The Psychology of Investing is the first text of its kind to delve into the fascinating subject of how psychology affects investing. Its unique coverage describes how investors actually behave, the reasons and causes of that behavior, why the behavior hurts their wealth, and what they can do about it. Features: What really moves the market: Understanding the psychological aspects.

Traditional finance texts focus on developing the tools that investors use for calculating risk and return. The Psychology of Investing is one of the first texts to delve into how psychology affects investing rather than solely focusing on traditional financial theory. This text's material, however, does not replace traditional investment textbooks but complements them, helping students become better informed investors who understand what motivates the market. Keep learning consistent: Most of the chapters are organized in a similar succession. This approach adheres to following order: -A psychological bias is described and illustrated with everyday behavior -The effect of the bias on investment decisions is explained -Academic studies are used to show why investors need to remedy the

problem Growing with the subject matter: Current and fresh information. Because data on investor psychology is rapidly increasing, the fifth edition contains many new additions to keep students up-to-date. The new Chapter 12: Psychology in the Mortgage Crisis describes the psychology involved in the mortgage industry and ensuing financial crisis. New sections and sub-sections include "Buying Back Stock Previously Sold", "Who Is Overconfident," "Nature or Nurture?", "Preferred Risk Habitat," "Market Impacts," "Language," and "Reference Point Adaptation."
