Most injuries that require first aid are not life-threatening. Usually, first aid involves simple, common sense procedures. However, first aid can sometimes mean the difference between life and death. All carers and teachers should have paediatric first aid training. Paediatric First Aid for Carers and Teachers (PaedFACTs) can be read either as a stand alone manual or as part of the very successful PaedFACTs course, designed to give carers and teachers the education and confidence that they need to effectively care for children. The PaedFACTs course and manual have been carefully written to align with the advice and guidance issued by prominent United Kingdom (UK) bodies. A growing interest in the use of games-based approaches for learning has been tempered in many sectors by budget or

time constraints associated with the design and development of detailed digital simulations and other high-end approaches. However, a number of practitioners and small creative groups have used low-cost, traditional approaches to games in learning effectively – involving simple card, board or indoor/outdoor activity games. New Traditional Games for Learning brings together examples of this approach, which span continents (UK, western and eastern Europe, the US, and Australia), sectors (education, training, and business) and learner styles or ages (primary through to adult and work-based learning or training). Together, the chapters provide a wealth of evidence-based ideas for the teacher, tutor, or trainer interested in using games for learning, but turned off by visible high-end examples. An editors' introduction pulls the collection together, identifying shared themes and drawing on the editors' own research in the use of games for learning. The book concludes with a chapter by a professional board game designer, incorporating themes prevalent in the preceding chapters and reflecting on game design, development and marketing in the commercial sector, providing valuable practical advice for those who want to take their own creations further.
