Digest of State Laws Relating to Public Education in Force January 1, 1915

Including considerations of sustainability in universities' activities has long since become mainstream. However, there is still much to be done with regard to the full integration of sustainability thinking into science and engineering curricula. Among the problems that hinder progress in this field, the lack of sound information on how to actually implement it is prominent. Created in order to address this need, this book presents a wealth of information on innovative approaches, methods and tools that may be helpful in translating sustainability principles into practice.

Hearings Before the Subcommittee on Education, Training and Rehabilitation of the Committee on Veterans' Affairs, House of Representatives, Eightieth Congress, Second Session, Relating to Education and Training Program at Columbia Technical Institute, Washington, D.C.

This book gathers the proceedings of the I-ESA ' 18 Conference, which was organised by the Fraunhofer IPK, on behalf of the European

Virtual Laboratory for Enterprise Interoperability (INTEROP-VLab) and the DFI, and was held in Berlin, Germany in March 2018. It presents contributions ranging from academic research and case studies, to industrial and administrative experiences with interoperability that show how, in a globalised market scenario – where the ability to cooperate with other organisations efficiently is essential in order to remain economically, socially and environmentally cost-effective – the most innovative digitised and networked enterprises ensure that their systems and applications can interoperate across heterogeneous collaborative networks of independent organisations. Furthermore, the content addresses smart services, and the business impact of enterprise interoperability on organisations. Many of the papers in this ninth volume of the I-ESA Conference proceedings include examples and illustrations to help deepen readers' understanding and generate new ideas. Offering a detailed guide to the state of the art in systems interoperability, the book will be of great value to all engineers and computer scientists working in manufacturing and other process industries, and to software engineers and electronic and manufacturing engineers working in academic settings.

A Workshop Report, October-November 1983

The Journal of International Students (JIS) is a quarterly publication on international education. JIS is an academic, interdisciplinary, and peer-reviewed publication (Print ISSN 2162-3104 & Online ISSN 2166-3750) indexed in major academic databases. The journal publishes scholarly peer-reviewed articles on international students in tertiary education, secondary education, and other educational settings that make significant contributions to research, policy, and practice in the internationalization of education worldwide. We encourage the submission of manuscripts from researchers and practitioners around the world from a myriad of academic fields and theoretical perspectives, including international education, comparative education, human geography, global studies, linguistics, psychology, sociology, communication, international business, economics, social work, cultural studies, and other related disciplines.
