Digitization is the future of the Army. However, along with digitization come training and personnel implications. This report discusses training issues associated with digitization, specifically those that address a need to train and maintain backup along with digital skills. Backup skills are the individual and collective skills required when digital systems are degraded or unavailable. The study focused on the digital M1A2 Abrams Main Battle training program as an exemplar. Lessons learned about digital and backup training requirements should be applied in the M2A3 training program. The study investigated issues that are applicable to a wide range of digital applications and training conditions. The study examined individual and collective tasks that support tank operations and found both digital and backup tasks to be poorly defined, particularly in collective performance. A method for analysis is described and analytic results reported. The study also outlines the current state of training armor and infantry soldiers and the impact that increased digitization may have on training pipelines. The study employed a series of expert groups to define issues and formulate recommendations. These groups included users, developers, researchers, and trainers with a wide spectrum of experience and viewpoints. Expert group results are reported and include 15 primary issues and accompanying recommendations.

This United States Army doctrine, Field Manual FM 3-96 Brigade Combat Team January 2021, provides doctrine for the brigade combat team (BCT). This manual describes how the BCT, as part of a joint team, shapes operational environments, prevents conflict, conducts large-scale ground combat, and consolidates gains against a peer threat. FM 3-96 describes relationships, organizational roles and functions, capabilities and limitations, and responsibilities within the BCT. Tactics, the employment, ordered arrangement, and directed actions of forces in relation to each other (ADP 3-90), are discussed in this

manual and are intended to be used as a guide. They are not prescriptive. FM 3-96 applies to the three maneuver BCT types: Infantry, Stryker, and Armored. The principal audience for FM 3-96 is the commanders, staffs, officers, and noncommissioned officers of the brigade, battalions, and squadron within the BCT. The audience also includes the United States Army Training and Doctrine Command institutions and components, and the United States Army Special Operations Command. This manual serves as an authoritative reference for personnel developing doctrine, materiel and force structure, institutional and unit training, and standard operating procedures for the BCT. For lower maneuver echelon specific discussions, see the appropriate Army techniques publication for that organization. FM 3-96 applies to the Active Army, the Army National Guard/the Army National Guard of the United States, and the United States Army Reserve unless otherwise stated.

Initial Battalion Staff-level Efforts

Imagine working all day in 100-degree plus temperatures under constant life-threatening circumstances, sometimes relying only on the negligible amount of hydration from a cactus you've dug up. This is the life of a U.S. Army soldier in places like Iraq, Afghanistan, and elsewhere, which is why the U.S. Army Desert Operations Handbook is a vital reference for survival in one of the harshest environments in the world. This official guide covers how to plan and conduct operations, how the environment affects personnel and equipment, and most importantly, how to survive and receive supplies in the desert. The obvious problems with extreme temperatures are water location and mobility. However, from handling and caring for firearms to operating and fueling a tank, the entire game changes in the dry, sandy desert conditions. The skills in this guide are taken from lessons learned in real combat situations. Success in desert operations requires the ability to adapt with constant terrain and temperature changes, which are often drastic within the same twenty-four-hour period. All the while, the soldier must be able to move within a unit without being visible to unfriendly groups. This combat-tested manual is sure to arm anyone with the skills necessary to survive in the desert.
