On the long roads of Deveryy ride two mercenaries whose fates like hidden deep in that of their own land. But Lord Rhodry, exiled from the dragon court of Aberwyn, has yet to discover his true parentage, and his swordmaster-lover, Jill, has barely glimpsed her awesome powers. Meanwhile, the ancient sorcerer Nevyn, held back by his vows from boldly intervening in their lives, can only watch and wait as Rhodry and Jill move ever closer to danger. For as the two struggle to recover the Great Stone, the mystic jewel that guides the conscience of the kingship of Deveryy, malevolent dark masters are weaving terrifying spells against them--and displacing messengers of death. Katharine Kerr has extensively rewritten Darkspell, incorporating major changes in the text, making this her definitive edition. Here the epic saga that began with the Dagerspell continues--a tale of might and magic, lust and glory, dark danger and poignant desires that echo from Deveryy’s sapphire waters to its secret mountain caverns. It’s a spellbinding story destined to please fantasy lovers everywhere.

An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend.Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader’s mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives.This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

The End of Chiraq: A Literary Mixtape is a collection of poems, rap lyrics, short stories, essays, interviews, and artwork about Chicago, the city that came to be known as "Chiraq" ("Chicago" + "Iraq"), and the people who live in its vibrant and occasionally violent neighborhoods. Tuned to the work of Chicago ’s youth, especially the emerging artists and activists surrounding Young Chicago Authors, this literary mixtape unpacks the meanings of " Chiraq " as both a vexed term and a space of possibility. "Chiraq" has come to connote the violence—interpersonal and structural—that many Chicago youth regularly experience. But the contributors to The End of Chiraq show that Chicago is much more than Chiraq. Instead, they demonstrate how young people are thinking and mobilizing, engaged in a process of creating a new and safer world for themselves, their communities, and their city. In true mixtape fashion, the book is an exercise in "low end theory" that does not just include so-called underground and marginal voices, but foregrounds them. Edited by award-winning poets, writers, and teachers Javon Johnson and Kevin Coval, The End of Chiraq addresses head-on the troublesome relationship between Chicago and Chiraq and envisions a future in which both might be transformed.

An Unexpected Winter is a debut from author K.R. Wolfgang, which presents poetry from a unique source. The book is written through the perspectives of strangers you may pass on the street; or moreso the stories behind faces you'll never meet. While compiling experiences of his own, the author interviewed an assortment of people on their past trials of love, loss, and triumph, and the result is a haunting accord of the path each person walks every day.

While at the zoo Pat the Bunny pets the animals, from a wrinkly elephant to a feathery parrot. On board pages:

'A clever, funny novel . . . a masterpiece of Parisian perfection' 'Duchess of Cornwall' 'The very quintessence of French romance' 'The Times Bookseller Laurent Letellier comes across an abandoned handbag on a Parisian street, and feels impelled to return it to its owner. The bag contains no money, phone or contact information. But a small red notebook with handwritten thoughts and jottings reveals a person that Laurent would very much like to meet. Without even a name to go on, and only a few of her possessions to help him, how is he to find one woman in a city of millions?'

David Dyer's astonishing novel The Midnight Watchis based on the true story of the SS Californian, the ship that sawtheTitanic'sdistress rockets and yet, unfathomably, did nothing. A psychological thriller. Sometimes the smallest of human failings can lead to the greatest of disasters On a wretchedly cold night in the North Atlantic, a steamer stopped in an icefeld sees the glow of another ship on the horizon. Just after midnight the first of eight distress rockets is fired. Why did theCalifornian look on while theTitanicsank? As soon as Boston Americanreporter John Steadman lays eyes on the man who stood the midnight watch on the Californian, he knows there's another story lurking behind the official one. Herbert Stone must have seen something, and yet his ship did nothing while the calamity took place. Now Stone, under his captain's orders, must carry his secret in silence, while Steadman is determined to find it out. So begins a strange dance around the truth by these three men. Haunted by the fifteen hundred who went to their deaths in those icy waters, and by the loss of his own baby son years earlier, Steadman must either find redemption in the Titanic's tragedy or lose himself. Based on true events, The Midnight Watchis at once a heart-stopping mystery and a deeply knowing novel - about the frailty of men, the strength of women, the capriciousness of fate and the price of loyalty.

The ocean and its inhabitants sketch and stretch our understandings of law in unexpected ways. Inspired by the blue turn in the social sciences and humanities, Blue Legalities explores how regulatory frameworks and governmental infrastructures are made, reworked, and contested in the oceans. Its interdisciplinary contributors analyze topics that range from militarization and Maori cosmologies to island building in the South China Sea and underwater robotics. Throughout, Blue Legalities illuminates the vast and unusual challenges associated with regulating the turbulent materialities and lives of the sea. Offering much more than an analysis of legal frameworks, the chapters in this volume show how the more-than-human ocean is central to the construction of terrestrial institutions and modes of governance. By thinking with the more-than-human ocean, Blue Legalities questions what we think we know—and what we don't know—about oceans, our earthly planet, and ourselves. Contributors. Stacy Alaimo, Amy Braun, Irus Braverman, Holly Jean Buck, Jennifer L. Gaynor, Stefan Helmreich, Elizabeth R. Johnson, Stephanie Jones, Zsófia Korosy, Berit Kristoffersen, Jessica Lehman, Astrida Neimans, Susan Reid, Alison Rieser, Katherine G. Sammler, Astrid Schrader, Kristen L. Shake, Phil Steinberg

In Mordin On Time, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). Mordin On Time enables the reader to construct their own speed ratings wherever they live.

As teaching evolves, teacher education must keep up. This book examines systemic reforms that incorporate new technology to improve any teacher education program. While there are books that address the integration of technology into teaching curricula, very few address the process for teacher education faculty and the systemic reform of a teacher education program. Integrating Information Technology into the Teacher Education Curriculum: Process and Products of Change provides practical examples and suggestions for teacher education departments striving to integrate new technologies into their curriculum. It will help in the effort to motivate faculty to make utilizing new technology a natural strategy for the teachers they are educating. It describes the creation of Design Teams at Brigham Young University's McKay School of Education (funded by a PDS grant) and how these teams worked to successfully reconfigure the school's teacher preparation curricula. Integrating Information Technology into the Teacher Education Curriculum examines how to compose and create a curriculum design team—including both teacher education and content-specific methods instructors training and collaboration opportunities that focus on the infusion of technology how to facilitate alignment among a university, cooperating school districts, the State Office of Education, and other available teacher preparation programs specific case examples of the redevelopment of teacher education courses by the instructors who teach them the process of changing a technology course required by the teacher education program the process of extending grant activities to the university's partner school districts and the State Office of Education From the editors:Preparing tomorrow's teachers to use technology in schools is a complex endeavor requiring the infusion of technology into curriculum and instructional practices at all levels of the pre-service program. In many early teacher education programs, prospective teachers took a computer literacy class separate from content methods classes and rarely engaged in real collaboration on how schoolteachers could integrate technology into authentic learning experiences. By focusing merely on how to use computers, technology training failed by not addressing how to teach students more effectively using a variety of technological tools. What teachers need to know most is how to teach content more effectively. Technology integration should cause teachers to develop different perspectives through rethinking teaching and learning. Teaching with technology causes teachers to confront their established beliefs about instruction and their traditional roles as classroom teachers.

Survey of mathematics highlights the power of mathematics as a deductive discipline. The course covers four topics in mathematics. Each topic will build upon the next. The use of deductive arguments, both in formal and natural languages, will be emphasized. Topics include Set Theory, Cantor's Diagonalization Argument, countable and uncountable infinite, mathematical induction, cardinal numbers, one to one correspondence, Venn diagrams, sequences, applications in sequences, rational and irrational numbers, geometric proofs involving similar triangles, area, pythagorean theorem, trigonometry. Algebraic proofs involving the quadratic formula, irrationality of the number Phi, mathematical induction, proofs with sequences, proof by contradiction, fibonacci sequence and the golden ratio, continued fractions, fractals with an emphasis on pattern building, sequences, length and area.

Stone Ravens was my neighbor, and I've hated him since sixth grade. Gorgeous and charismatic, he became the town's football god, while I became the town's invisible girl. He went to a Division 1 school for football, while my father was fired by his father. His team won the National Championship, while my mother died the same day. He was a first round pick for the NFL while I made the worst decision of my life. Now I'm in Texas trying to pick up the pieces of my life. But, Stone is here. Stone is everywhere. It doesn't matter that disaster has struck my life again. It doesn't matter that he's the one trying to console me. It doesn't matter that he's the nation's newest football obsession. Because for me, he always has been and always will be my enemy.

Since 1989, there have been over 200 post-conviction DNA exonerations in the United States. On the surface, the release of innocent people from prison could be seen as a victory for the criminal justice system: the wrong person went to jail, but the mistake was fixed and the accused set free. A closer look at miscarriages of justice, however, reveals that such errors are not aberrations but deeply revealing, common features of our legal system. The ten original essays in When Law Fails view wrongful convictions not as random mistakes but as organic outcomes of a misshaped larger system that is rife with faulty eyewitness identifications, false confessions, biased juries, and racial discrimination. Distinguished legal thinkers Charles J. Ogletree, Jr., and Austin Sarat have assembled a stellar group of contributors who try to make sense of justice gone wrong and to answer urgent questions. Are miscarriages of justice systemic or symptomatic, or are they mostly idiosyncratic? What are the broader implications of justice gone awry for the ways we think about law? Are there ways of reconceptualizing legal missteps that are particularly useful or illuminating? These instructive essays both address the questions and point the way toward further discussion. When Law Fails reveals the dramatic consequences as well as the daily realities of breakdowns in the law's ability to deliver justice swiftly and fairly, and calls on us to look beyond headline-grabbing exonerations to see how failure is embedded in the legal system itself. Once we are able to recognize miscarriages of justice we will be able to begin to fix our broken legal system. Contributors: Douglas A. Berman, Markus D. Dubber, Mary L. Dudziak, Patricia Ewick, Daniel Givelber, Linda Ross Meyer, Charles J. Ogletree, Jr., Austin Sarat, Jonathan Simon, and Robert Weisberg.
