Get ready for... is a fun and engaging supplementary series offering comprehensive preparation for the CYLET exams. The series covers all of the grammar, skills, and vocabulary students need to achieve exam success.

This book provides interdisciplinary perspectives on task-based language teaching (TBLT) and task-based language assessment (TBLA) in English as a second language (ESL) context. It discusses theoretical and experimental insights of TBLT and TBLA from cognitive, cognitive linguistic, and psycholinguistic viewpoints. The chapters, written by leading language teaching specialists in the field, introduce the reader to a comprehensive range of issues related to TBLT and TBLA such as curriculum design, materials development, and classroom teaching & testing. With interdisciplinary appeal, the book is a valuable resource for researchers in task-based language teaching and assessment. It is equally useful for teachers to whom it offers practical suggestions for designing tasks for teaching and testing.

How inclusive methods can build elegant design solutions that work for all. Sometimes designed objects reject their users: a computer mouse that doesn't work for left-handed people, for example, or a touchscreen payment system that only works for people who read English phrases, have 20/20 vision, and use a credit card. Something as simple as color choices can render a product unusable for millions. These mismatches are the building blocks of exclusion. In Mismatch, Kat Holmes describes how design can lead to exclusion, and how design can also remedy exclusion. Inclusive design methods—designing objects with rather than for excluded users—can create elegant solutions that work well and benefit all. Holmes tells stories of pioneers of inclusive design, many of whom were drawn to work on inclusion because of their own experiences of exclusion. A gamer and designer who depends on voice recognition shows Holmes his “Wall of Exclusion,” which displays dozens of game controllers that require two hands to operate; an architect shares her firsthand knowledge of how design can fail communities, gleaned from growing up in Detroit's housing projects; an astronomer who began to lose her eyesight adapts a technique called “sonification” so she can “listen” to the stars. Designing for inclusion is not a feel-good sideline. Holmes shows how inclusion can be a source of innovation and growth, especially for digital technologies. It can be a catalyst for creativity and a boost for the bottom line as a customer base expands. And each time we remedy a mismatched interaction, we create an opportunity for more people to contribute to society in meaningful ways.

Applied ethnomusicology is an approach guided by principles of social responsibility, which extends the usual academic goal of broadening and deepening knowledge and understanding toward solving concrete problems and toward working both inside and beyond typical academic contexts (International Council for Traditional Music 2007). This edited volume is based on the first symposium of the ICTM's Study Group on Applied Ethnomusicology in Ljubljana, Slovenia in 2008 that brought together more than thirty specialists from sixteen countries worldwide. It contains a Preface, an extensive Introduction, and twelve selected peer-reviewed articles by authors from Australia, Austria, Canada, Germany, Slovenia, Serbia, South Africa, the United Kingdom, and the United States of America, divided into four thematic groups. These groups encompass: diverse perspectives on the growing field of applied ethnomusicology in various

geographical and problem-solving contexts; research and teaching-related connotations; the potential in contributing to sustainable music cultures; and the use of music in conflict resolution situations. The edited volume *Applied Ethnomusicology: Historical and Contemporary Approaches* brings together previously dispersed knowledge and perspectives, and offers new insights to various disciplines within the humanities and social sciences. Rooted in diverse scholarly traditions, it addresses a variety of challenges in today's world and aims to benefit the quality of human existence.

Friedrich Wilhelm Nietzsche (1844-1900) was a German philosopher. His writing included critiques of religion, morality, contemporary culture, philosophy and science, using a distinctive style and displaying a fondness for aphorism. Nietzsche's influence remains substantial within and beyond philosophy, notably in existentialism and postmodernism. Nietzsche's *Third Untimely Meditation* is not only his homage to Schopenhauer, but a reflection on education in the most comprehensive sense. Many of Nietzsche's writings aimed at instructing the modern world on how to philosophize with a sledgehammer, but the premise of the *Third Meditation* is altogether more gentle, namely the singular marvel that is every human being.

The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine

climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.
