In this heartwarming essay collection, dozens of authors, actors, artists and others imagine one last lunch with someone they cherished. A few years ago, Erica Heller realized how universal the longing is for one more moment with a lost loved one. It could be a parent, a sibling, a mentor, or a friend, but who wouldn't love the opportunity to sit down, break bread, and just talk? Who wouldn't jump at the chance to ask those unasked questions, or share those unvoiced feelings? In *One Last Lunch*, Heller has asked friends and family of authors, artists, musicians, comedians, actors, and, to recount one such fantastic repast, Muffie Meyer and her documentary subject Little Edie Beale go to a deli in Montreal. Kirk Douglas asks his father what he thought of him becoming an actor. Sara Moulton dines with her friend Julia Child. The Anglican priest George Pitcher has lunch with Jesus. And Heller herself connects with her father, the renowned author Joseph Heller. These richly imagined stories are endlessly revealing, about the subject, the writer, the passage of time, regret, gratitude, and the power of enduring love.

This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to

more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology.

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

Thirty hair-raising stories from around the world fill this spooky collection with delicious shivers and spine-tingling chills—perfect for fans of Scary Stories to Tell in the Dark! Sit down and meet "The Vampire Cat," "The Draug" and "The Rolling Head"; or take a stroll with "The Thing in the Woods." You'll find favorites such as "The Golden Arm" and startling new stories such as

"Knock...Knock...Knock," vividly told with plenty of ghouly details and spooky endings. There's something here for everyone who likes a good shudder...but be prepared for goose bumps! Twenty delightfully creepy illustrations by Katherine Coville and Jacqueline Rogers highlight this companion to Robert San Souci's first collection of scary stories, *Short & Shivery*.

"In the post-9/11 struggle for a sane global vision, this anthihated manifesto could not be more timely."--O: The Oprah Magazine In this acclaimed volume, Pulitzer-Prize nominated science writer Rush W. Dozier Jr. demystifies our deadliest emotion--hate. Based on the most recent scientific research in a range of fields, from anthropology to zoology, Why We Hate explains the origins and manifestations of this toxic emotion and offers realistic but hopeful suggestions for defusing it. The strategies offered here can be used in both everyday life to improve relationships with family and friends as well as globally in our efforts to heal the hatreds that fester within and among nations of the world.

Laura Berk's Development Through the Lifespan is relied upon in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, cutting-edge consideration of the interrelationships between heredity and environment, rich examples, and long-standing commitment to presenting the most up-to-date scholarship. This new edition continues to offer students research-based practical applications that they can relate to their personal and professional lives. Laura Berk, renowned professor and researcher, has revised the text with new pedagogy, a heightened emphasis on the interplay between heredity and environment, and an enhanced focus on many social policy issues, while emphasizing the lifespan perspective throughout. The latest theories and findings in the field are made accessible to students in a manageable and relevant way. Berk's signature storytelling style invites students to actively learn beside the text's "characters." Students are provided with an especially clear and coherent understanding of the sequence and underlying processes of human development, emphasizing the interrelatedness of all domains--physical, cognitive, emotional, social--throughout the text narrative and in special features. Berk also helps students connect their learning to their personal and professional areas of interest. Her voice comes through when speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called to intelligently approach the responsibility of understanding and responding to the needs and concerns of both young and old. While carefully considering the complexities of human development, Berk presents classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of human development. Ever since humans became self-aware, we have struggled to find the meaning of life. The price we paid for becoming intelligent was to become painfully ignorant of the difference between good and evil. Adi, a 10-year-old boy, works together with two old philosophers as they try to unravel the prophecy of a promised King. With insatiable curiosity, Adi must work with the wise men as they rationalize with each other on why and how humans became intelligent. Together they attempt to answer some of the most profound questions related to existence. Does evolution end with human beings or is there an 'Overman' who can reach evolution's pinnacle? Will this Overman be able to define values for humankind? Centuries later a young boy promises his mother that he will always uphold the love that she has taught him. It is a promise that drowns him in the nectar of the gods. Krish grows up to be an engineer and joins a team of scientists as they try to create artificial consciousness in a machine. Krish soon realizes that he has a bigger fight on his hands. A fight to preserve love in a desolate world. His quest for true love ultimately leads him down a path where he comes face to face with a fearsome snake delivering a kiss of death. Humans have come a long way by questioning the nature of objects around us and pushing the limits of our intelligence, but it's now time that we ask the greatest question yet: when does intelligence transcend to become consciousness?

During the 1966 through 1974 terms, she explores the effect of this agency in creating a voice for the poor in the judicial policy-making process. The Court's response to cases presented by the LSP--as exemplified in its decisions to invalidate residency requirements for welfare recipients (Shapiro v. Thompson, 1969) but uphold maximum family grants (Dandridge v. Williams, 1970)--is described as emerging from a timely combination of new litigant claims, available legal bases, and judicial values and role conceptions, all of which were shaped by the political climate of the era. Lawrence convincingly argues that litigation before the Court is a powerful method of political participation for the disadvantaged. There are three general models of Supreme Court decision making: the legal model, the attitudinal model and the strategic model. But each is somewhat incomplete. This book advances an integrated model of Supreme Court decision making that incorporates variables from each of the three models. In examining the modern Supreme Court, since Brown v.

Board of Education, the book argues that decisions are a function of the sincere preferences of the justices, the nature of precedent, and the development of the particular issue, as well as separation of powers and the potential constraints posed by the president and Congress. To test this model, the authors examine all full, signed civil liberties and economic

cases decisions in the 1963-2000 period. Decision Making by the Modern Supreme Court argues, and the results confirm, that judicial decision making is more nuanced than the attitudinal or legal models have argued in the past.

The Fifth Edition of A History of the Roman People continues to provide a comprehensive analytical survey of Roman history from its prehistoric roots in Italy and the wider Mediterranean world to the dissolution of the Roman Empire in Late Antiquity in A.D. 600. Clearly organized and highly readable, the text's narrative of major political and military events provides a chronological and conceptual framework for the social, economic, and cultural developments of the periods covered. Major topics are treated separately so that students can easily grasp key concepts and ideas.

In a fast-moving world, the necessity of making decisions, and preferably good ones, has become even more difficult. One reason is the variety and number of choices perhaps available which often are not presented or understood. Alternatives are often unclear and complex

paths to then confusing and misleading. Thus the process of decision making itself requires analysis on an ongoing basis. Decision making is often made based on cultural factors whereas the best alternative might be quite different. The subject touches ethical aspects as well as psychological considerations. This book presents important research on the psychology of decision making related to law and law enforcement, health care and science.

How do Supreme Court justices decide their cases? Do they follow their policy preferences? Or are they constrained by the law and by other political actors? The Constrained Court combines new theoretical insights and extensive data analysis to show that law and politics

together shape the behavior of justices on the Supreme Court. Michael Bailey and Forrest Maltzman show how two types of constraints have influenced the decision making of the modern Court. First, Bailey and Maltzman document that important legal doctrines, such as respect

for precedents, have influenced every justice since 1950. The authors find considerable variation in how these doctrines affect each justice, variation due in part to the differing experiences justices have brought to the bench. Second, Bailey and Maltzman show that justices are constrained by political factors. Justices are not isolated from what happens in the legislative and executive branches, and instead respond in predictable ways to changes in the preferences of Congress and the president. The Constrained Court shatters the

myth that justices are unconstrained actors who pursue their personal policy preferences at all costs. By showing how law and politics interact in the construction of American law, this book sheds new light on the unique role that the Supreme Court plays in the

constitutional order.

From the New York Times Bestselling Author and Co-Star of Fox's American Grit comes a rare and powerful book on the art of being a sniper. Way of the Reaper is a step-by-step accounting of how a sniper works, through the lens of Irving's most significant kills - none of which have been told before. Each mission is an in-depth look at a new element of eliminating the enemy, from intel to luck, recon to weaponry. Told in a thrilling narrative, this is also a heart-pounding true story of some of The Reaper's boldest missions including the

longest shot of his military career on a human target of over half a mile. In Iraq and Afghanistan, Nick Irving earned his nickname in blood, destroying the enemy with his sniper rifle and in deadly firefights behind a .50 caliber machine gun. He engaged a Taliban suicide

bomber during a vicious firefight, used nearly silent sub-sonic ammo, and was the target of snipers himself. Way of the Reaper attempts to place the reader in the heat of battle, experiencing the same dangers, horrors and acts of courage Irving faced as an elite member of the

3rd Ranger Battalion, 75th Ranger Regiment, while also examining the personal ramifications of taking another life. Readers will experience the rush of the hunt and the dangers that all snipers must face, while learning what it takes to become an elite manhunter. Like the

Reaper himself, this explosive book blazes new territory and takes no prisoners.

A judge's role is to make decisions. This book is about how judges undertake this task. It is about forces on the judicial role and their consequences, about empirical research from a variety of academic disciplines that observes and verifies how factors can affect how

judges judge. On the one hand, judges decide by interpreting and applying the law, but much more affects judicial decision-making: psychological effects, group dynamics, numerical reasoning, biases, court processes, influences from political and other institutions, and

technological advancement. All can have a bearing on judicial outcomes. In How Judges Judge: Empirical Insights into Judicial Decision-Making, Brian M. Barry explores how these factors, beyond the law, affect judges in their role. Case examples, judicial rulings, judges' own

self-reflections on their role and accounts from legal history complement this analysis to contextualise the research, make it more accessible and enrich the reader's understanding and appreciation of judicial decision-making. Offering research-based insights into how

judges make the decisions that can impact daily life and societies around the globe, this book will be of interest to practising and training judges, litigation lawyers and those studying law and related disciplines.

This book is a collection of key legal decisions affecting Indigenous Australians, which have been re-imagined so as to be inclusive of Indigenous people's stories, historical experience, perspectives and worldviews. In this groundbreaking work, Indigenous and non-Indigenous scholars have collaborated to

rewrite 16 key decisions. Spanning from 1889 to 2017, the judgments reflect the trajectory of Indigenous people's engagements with Australian law. The collection includes decisions that laid the foundation for the wrongful application of terra nullius and the long disavowal of native title. Contributors have

also challenged narrow judicial interpretations of native title, which have denied recognition to Indigenous people who suffered the prolonged impacts of dispossession. Exciting new voices have reclaimed Australian law to deliver justice to the Stolen Generations and to families who have experienced

institutional and police racism. Contributors show how judicial officers can use their power to challenge systemic racism and tell the stories of Indigenous people who have been dehumanised by the criminal justice system. The new judgments are characterised by intersectional perspectives which draw

on postcolonial, critical race and whiteness theories. Several scholars have chosen to operate within the parameters of legal doctrine. Some have imagined new truth-telling forums, highlighting the strength and creative resistance of Indigenous people to oppression and exclusion. Others have rejected the

possibility that the legal system, which has been integral to settler-colonialism, can ever deliver meaningful justice to Indigenous people.

Over the years, psychologists have devoted uncountable hours to learning how human beings make judgments and decisions. As much progress as scholars have made in explaining what judges do over the past few decades, there remains a certain lack of depth to our understanding. Even where scholars can make consensual and successful predictions of a judge's

disagree sharply about exactly what happens in the judge's mind to generate the predicted result. This volume of essays examines the psychological processes that underlie judicial decision making.

Rasmus Wandall uses quantitative and qualitative methods from studies carried out in Denmark, to address the formal and informal norms and ideologies that are used to generate decisions to imprison. Focusing on the operations of the courtroom participants, his work investigates how court decision-making is organized to allow the sentencing procedure to be of

framework, while at the same time keeping the sentencing within the boundaries of law and legal validity. The author uses the theory of law's operational closure, developed by Niklas Luhmann. The theory provides an advantageous point of departure to capture the close and subtle interactions between law's need for validity and for contextual openness in every le

decision-making.
