Online Library Food Machinery For The Production Of Cereal

This book presents new and significant research in the growing field of food engineering which refers to the engineering aspects of food production and processing. Food engineering includes, but is not limited to, the application of

Online Library Food Machinery For The Production Of Cereal

agricultural engineering and chemical engineering principles to food materials. Genetic engineering of plants and animals is not normally the work of a food engineer. Food engineering is a very wide field of activities. Among its domain of

Online Library Food Machinery For The Production Of Cereal

knowledge and action are: Design of machinery and processes to produce foods; Design and implementation of food safety and preservation measures in the production of foods; Biotechnological processes of food production; Choice and design of
