think about matters of importance to the community and the region. Atlanta magazine's editorial mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of importance to the community and the region. Named a Doody's Core Title in 2012 and 2013! Widely acknowledged as the cornerstone reference in the field, Pediatric Rehabilitation brings together renowned specialists from all sectors of the pediatric rehabilitation community to provide the most current and comprehensive information available. The fifth edition has been substantially updated and expanded with evidence-based discussions of new theories, therapies, interventions, research findings, and controversies. Five completely new chapters focus on such emerging areas as the use of ultrasound to guide motor point and nerve injections, rehabilitation of chronic pain and conversion disorders, management of concussions, sports injuries, and neurodegenerative and demyelinating diseases in children. This edition also addresses important new directions in genetic markers and tests, cognitive, developmental, and neuropsychological assessment, and rehabilitation

for common genetic conditions. Additionally, several new contributors provide fresh perspectives to the voices of established leaders in the field. The text covers all aspects of pediatric rehabilitation medicine from basic examination and testing to electrodiagnosis, therapeutic exercise, orthotics and assistive devices, gait labs, aging with pediatric onset disability, and in-depth clinical management of the full range of childhood disabilities and injuries. Pearls and Perils featured throughout the book underscore crucial information, and illustrations, summary tables, information boxes, and lists contribute to the text's abundant clinical utility. New to the Fifth Edition: Every chapter has been thoroughly revised and expanded to reflect current thinking and practice Evidence-based discussions of new theories, therapies, interventions, research findings, and areas of controversy Five entirely new chapters illuminating emerging areas: rehabilitation of chronic pain and conversion disorders, ultrasound-guided injections, concussion management, sports injuries, and neurodegenerative and demyelinating diseases in children

Musculoskeletal Examination

The Sky Through the Hole in the Bone

The repackaged trade paperback of Cory Doctorow's miraculous novel of family history, Internet connectivity, and magical secrets—now with a new cover! Alan is a middle-aged entrepreneur who moves to a bohemian neighborhood of Toronto. Living next door is a young woman who reveals to him that she has wings—which grow back after each attempt to cut them off. Alan understands. He himself has a secret or two. His father is a mountain, his mother is a washing machine, and among his brothers are sets of Russian nesting dolls. Now two of the three dolls are on his doorstep, starving, because their innermost member has vanished. It appears that Davey, another brother who Alan and his siblings killed years ago, may have returned, bent on revenge. Under the circumstances it seems only reasonable for Alan to join a scheme to blanket Toronto with free wireless Internet, spearheaded by a brilliant technopunk who builds miracles from scavenged parts. But Alan's past won't leave him alone—and Davey isn't the only one gunning for him and his friends. Whipsawing between the preposterous, the amazing, and the deeply felt, *Someone Comes to Town, Someone Leaves Town* is unlike any

novel you have ever read.

The author combs the Chicago blues scene for signs of authenticity, exploring the modes of promotion and advertising that sometimes distort the experience of the music. Reprint.

Musculoskeletal Examination is a user-friendly textbook on the techniques of physical examination. Written by a physiatrist, orthopedic surgeon, and physical therapist, it has a uniquely multidisciplinary approach.

Musculoskeletal Examination covers the complete basic examination and basic principles of normal and abnormal musculoskeletal function are fully explained, leading you to the correct differential diagnosis. The new fourth edition is now in full colour throughout and includes over 750 detailed illustrations, X-rays and MRIs, and more than 100 photographs showing examination techniques. It also includes a companion website at www.wiley.com/go/musculoskeletalexam featuring 107 MCQs and links to videos demonstrating key examination methods. Musculoskeletal Examination is perfect as a quick reference guide, while the detailed descriptions and clinically relevant examples of frequently encountered conditions will help even the most novice practitioner gain the understanding necessary to make a correct diagnosis and determine a successful treatment plan. It is ideal for

physical therapists, physiatrists, orthopedists, medical students, practitioners, and all those involved in sports medicine and clinical massage.

Capitals of Punk tells the story of Franco-American circulation of punk music, politics, and culture, focusing on the legendary Washington, DC hardcore punk scene and its less-heralded counterpart in Paris. This book tells the story of how the underground music scenes of two major world cities have influenced one another over the past fifty years. This book compiles exclusive accounts across multiple eras from a long list of iconic punk musicians, promoters, writers, and fans on both sides of the Atlantic. Through understanding how and why punk culture circulated, it tells a greater story of (sub)urban blight, the nature of counterculture, and the street-level dynamics of that centuries-old relationship between France and the United States.

This book presents the evidence related to the use of injectable biologics to provide faster and better healing for musculoskeletal lesions and conditions. The authors discuss approaches, such as blood derivatives and cell concentrates, applied to lesions of muscles, ligaments, tendons, bones, meniscus and cartilage, as well as osteoarthritis. Chapters are written by some of the most influential opinion leaders in the field, with up-to-date review of the current literature, where the authors explore both the potential and the limitations of these minimally invasive and promising treatments. The first section is devoted to the formulations and rationale for the use of injectable orthobiologics, while the second section reviews current treatment methods applied to specific joints and pathologies – ranging from tendinopathies through non-unions to articular degenerative processes – as well as the results of these treatment approaches. The third section explores future perspectives, such as pluripotent stem cells, gene therapy, and the stimulation of intrinsic stromal cell niches. Appealing to a broad readership, this book will be of interest to both laboratory research scientists and clinicians, including orthopedists, sports physicians, physiatrists, and regenerative medicine experts.

Performing Arts Medicine (PAM) is a growing area of specialization within the performing arts field, which addresses the multi-faceted health and wellness of performing artists. This sub-discipline within performing arts is interdisciplinary in nature, involving the expertise of performing arts educators and researchers, physicians and other health professionals. This first of its kind text appeals to a very wide audience

that includes performing arts clinical practitioners and health science researchers as well as performing arts pedagogues and performing arts students. The first part of the text gives the reader an overview of the field and discusses over-arching themes and issues in PAM. Part two presents an array of music and dance research involving primarily case studies that address significant issues of concern for performing artists and have implications for pedagogical practice. Part three provides research-based perspectives derived from professionals sharing their in-practice experiences. Finally, part four describes useful PAM models of implementation supporting the needs of performing artists in different settings. Written by experts in the field, Perspectives in Performing Arts Medicine Practice is a valuable resource for performing arts physicians, educators and researchers.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

"The book draws on a lot of research, is friendly to the reader, and will be of good value to teachers." Paul Nation, Victoria University of Wellington, Australia This comprehensive, up-to-date, and accessible text on idiom use, learning, and teaching approaches the topic with a balance of sound theory and extensive research in cognitive linguistics, psycholinguistics, corpus linguistics, and sociolinguistics combined with informed teaching practices. Idioms is organized in three parts: Part I includes discussion of idiom definition, classification, usage patterns, and functions. Part II investigates the process involved in the comprehension of idioms and the factors that influence individuals' understanding and use of idioms in both L1 and L2. Part III explores idiom acquisition and the teaching and learning of idioms, focusing especially on the strategies and techniques used to help students learn idioms. To assist the reader in grasping the key issues, study questions are provided at the end of each chapter. The text also includes a glossary of special terms and an annotated list of selective idiom reference books and student textbooks. Idioms is designed to serve either as a

textbook for ESL/applied linguistics teacher education courses or as a reference book. No matter how the book is used, it will equip an ESL/applied linguistics students and professionals with a solid understanding of various issues related to idioms and the learning of them.

This collection of classic guitar studies is intended for the intermediate guitarist. As a whole, these etudes emulate the content of Carcassi's famed 25 Etudes, yet in a more contemporary harmonic and rhythmic idiom. These pieces are also distinguished in that they are not only valuable as left and right-hand technical exercises- but also as valid, pleasurable concert repertoire. the first ten etudes 11-20 focus on the use of the a finger in combination with i and m. Etudes 4,7,11,13,15, and 17 also concentrate on left-hand slurs. the final five etudes were composed as - and intended to be performed- as a set with each piece dedicated to a particular Latin American composer.

"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The

aims of International perspectives on spinal cord injury are to: --assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; --make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

Francisco Goya y Lucientes (1746-1828) created magnificent paintings, tapestry designs, prints, and drawings over the course of his long and productive career. Women frequently appeared as the subjects of Goya's works, from his brilliantly painted cartoons for the Royal Tapestry Factory to his stunning portraits of some of the most powerful women in Madrid. This groundbreaking book is the first to examine the representations of women within Goya's multifaceted art, and in so doing, it sheds new light on the evolution of his artistic creativity as well as on the roles assumed by women in late eighteenth- and early nineteenth-century Spain. Many of Goya's most famous works are featured and explicated in this beautifully designed and produced book. The artist's famous tapestry cartoons are included, along with the tapestries woven after them for the royal palaces of the Prado and the Escorial. Goya's infamous Naked Maja and Clothed Maja are also highlighted, with a discussion on whether these works were painted at the same time and how they might have originally hung in relation to one another. Focus is also placed on Goya's more experimental prints and drawings, in which the artist depicted

women alternatively as targets of satire, of sympathy, or of admiration. Essays by eminent authorities provide a historical and cultural context for Goya's work, including a discussion on the significance of fashion and dress during the period. The resultant volume is surely to be treasured by all who admire Goya's art and by those who are interested in women's issues of his time.

Pediatric Rehabilitation, Fifth Edition

A Doody's Core Title 2012 Thoroughly updated and expanded, the new edition of the classic comprehensive reference on pediatric rehabilitation brings together specialists from the various wings of the pediatric rehabilitation community. This market-leading text covers everything from basic examination and psychological assessment to electrodiagnosis, therapeutic exercise, orthotics and assistive devices, and in-depth clinical management of the full range of childhood disabilities and

injuries. Features include: Expanded new edition of Dr. Gabriella Molnars pioneering pediatric rehabilitation text Comprehensive coverage of all areas, with up-to-date information on therapy, exercise physiology, CAM, cancer, obesity, and joint replacement Clinical emphasis throughout Multi-specialty expert authorship

Set in the last days of a still Bohemian Greenwich Village, this memoir is the story of a young girls awakening and growth, told through letters and journal entries. Her adventures lead to a summer working with Georgia O'Keeffe, encounters with several artists before their fame--Wilhelm and Elaine deKooning, Franz Kline, Joachim Probst, writer Maxwell Bodenheim and later, Joseph Heller. The year is 1942, the time of the second World War and the beginning of recovery from the Great Depression. Defense plants are booming; meat, sugar, and butter are rationed, as well as gasoline. Government ration books are a must, the draft is on and young men are being conscripted into the service. For the first time, women are allowed to work at mens jobs. Marjorie, not yet twenty-one, uncomfortable with

men, decides to become a lesbian and devote her life to writing. She considers herself a poet, and escapes much of the influence of the war by moving to Greenwich Village. But when she becomes involved with a group of artists and loses her virginity to Joachim (Jack) Probst, a member of the group, her lesbian dreams fade. Probst renames her Carol, her middle name, and they live together for two years. Wickie, her best friend, and recipient of most of the early letters, is the opposite of Marjorie, now Carol. Raised in Europe, the daughter of an ambassador, Wickie is sophisticated, worldly, secure in her self-image. Carol is curious, adventurous, uncertain, insecure. She met Wickie while she was selling magazines cross-country and they became instant friends. She expects someday to be transformed, to automatically become very wise. The magic age is thirty. Her life with Probst has many twists and turns: infidelities, separations, money problems. In a get-away to San Francisco she becomes an artists model, a hat check girl, rides the cable cars, discovers French poets, and North Beach. Her adventures there with a friend, Babs, yield a sense of joy which

she had not had in New York. But when Babs becomes ill, its back to New York, to Probst and inner turmoil. She becomes pregnant and Probst leaves her. As a mother, Carol continues her Bohemian life, boarding her daughter whom shes named Lilith (the Goddess in George Bernard Shaws play, Back To Methuselah.) After a failed romance, which nets her an apartment, she falls in love with Arthur Gunn, a painter, exactly her fathers age, who plays Pygmalion to her Eliza Doolittle. He is committed to transforming her-- to making her into a lady, and she is completely open to it. She sees him as very wise. It is through him that she first learns about OKeeffes work, in a retrospective at the Whitney. Arthur gives up on her transformation and Carol betrays him with Ernest Guteman, a sculptor she is posing for. There is a terrifying night when she is in bed and hears Arthur sharpening knives. After that incident she moves in with Guteman and they bring Lilith, now three years old, to live with them. It is through Ernest that she meets Georgia OKeeffe and spends a summer working with her. A very important time for Carol, the OKeeffe influence is felt

for the rest of her life. At Liliths nursery school, Carol becomes friends with one of the teachers and through her is introduced to Richard, a young writer-painter, who is working on his PHD at NYU and teaching English at Penn State. They fall in love and eventually marry, making their home in State College, Pennsylvania. Lilith begins first grade. Marriage creates many problems, much adjusting as they learn to be a family. Carol keeps busy with writing, taking jewelry-making at the college, and learning to cook. After four years in Pennsylvania, living next to an abandoned apple orchard, getting used to being in the country, Richard applies for, and is hired at Long Beach State Co

Offers performers, teachers, and researchers, new perspectives and practical guidance for enhancing performance and managing the stress that typically accompanies performance situations. It draws together the findings of pioneering initiatives from across the arts and sciences.

Who invented God? When, why, and where? Thomas Römer seeks to answer these enigmatic questions about the deity of

the great monotheisms—Yhwh, God, or Allah—by tracing Israelite beliefs and their context from the Bronze Age to the end of the Old Testament period in the third century BCE, in a masterpiece of detective work and exposition.

The blues present an opportunity to be deeply expressive. Every note can be colored with pitch bends, slides, vibrato, and all manner of attacks. the style makes it easy to own the music, to close your eyes and play as if you wrote it. These pieces are designed to be fun and entertaining as they work through the sharp keys, which are most friendly to the guitar. By working through these keys however, they develop a player's awareness of the different tonalities and the way patterns may be altered to

*facilitate key changes. Written in notation and tablature. Much of the global economy depends on large scale government intervention in the form of subsidies, many of which are perverse in that they damage economies and environments. This study offers a view of subsidies world-wide with focus on the extent, causes and consequences of perverse subsidies. The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography. Following on from James Tyler's *The Early Guitar: A History and Handbook* (OUP 1980) this collaboration with Paul Sparks (their previous book for OUP, *The Early Mandolin*, appeared in 1989),*

*presents new ideas and research on the history and development of the guitar and its music from the Renaissance to the dawn of the Classical era. Tyler's systematic study of the two main guitar types found between about 1550 and 1750 focuses principally on what the sources of the music (published and manuscript) and the writings of contemporary theorists reveal about the nature of the instruments and their roles in the music making of the period. The annotated lists of primary sources, previously published in *The Early Guitar* but now revised and expanded, constitute the most comprehensive bibliography of Baroque guitar music to date. His appendices of performance practice information should also prove indispensable to performers and scholars alike. Paul Sparks also breaks new ground, offering an extensive study of a period in the guitar's history—notably c.1759–c.1800—which the standard histories usually dismiss in a few short paragraphs. Far from being a dormant instrument at this time, the guitar is shown to have been central to music-making in France, Italy, the Iberian Peninsula, and South America. Sparks provides a wealth of information about players, composers, instruments, and surviving*

compositions from this neglected but important period, and he examines how the five-course guitar gradually gave way to the six-string instrument, a process that occurred in very different ways (and at different times) in France, Italy, Spain, Germany, and Britain.

energy demands will help you build your leadership capacity as you raise the level of instructional excellence throughout your school. To move your school forward, you must move the people in it. If you want a master teacher every classroom, you must commit to helping every teacher be a master teacher. That work begins here.

Born in Riverside, California in 1937 and profoundly affected by World War II, Ed Bereal made significant contributions to assemblage and performance arts in Los Angeles during the early 1960s through 1980s. A consummate draftsman and object maker, Bereal found inspiration in such divergent sources as Norman Rockwell's illustrations and the tableaux of Ed Kienholz. His "political cartoons" are unique portraits of America filtered through the lens of an artist who lived through the 1965 Watts riots, founded the noted Black street theater Bodacious Buggerilla, and traveled to hot spots around the world as a film journalist. At the age of 82, Bereal distills a lifetime of experiences through an explosion of provocative imagery and narrative, sparking conversations about identity and racial inequity, violence and war, and political and corporate power. Whatcom Museum curator Amy Chaloupka presents an expansive overview of the artist's six-decade career in an introductory essay. Matthew Simms delves into Bereal's early journal sketches, particularly his self-portraits, from his time at Chouinard, where Bereal was a student of Irwin's. Malik Gaines, who was responsible for bringing Bereal's Bodacious Buggerilla theater troupe together for a reunion performance in 2012 as part of the Getty's Pacific Standard Time initiative, discusses the importance of Bereal's contributions to guerrilla theater arising in the Post-Watts atmosphere in Southern California. Vernon Damani Johnson concentrates on Bereal's politically charged paintings and installations, and particularly his motif of Miss America, tracing in his essay the trajectory
