FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

Contemporary performance is a particularly stimulating area for the study of how Shakespeare and particular cultural contexts interact with and transform each other. Francesca Clare Rayner's original and thought-provoking book highlights the diversity and experimentalism of contemporary performance practices through a focus on unexplored performances in Portugal. This book references key debates within contemporary performance studies on intermediality, globalization and political participation and analyses their particular configurations within the Portuguese context. These case studies represent clear alternatives to the market-driven view of the contemporary as the continual reproduction of the new and the topical for global consumers, recasting the contemporary instead as the site of tragedy and crisis in a Europe fragmented by years of economic austerity, political divisions around Brexit and ecological vacillation, and an anxious, refashioning of global relations between North and South.

Motorboating - ND

Shakespeare and the Challenge of the Contemporary

More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink. Nichols' Seloc Marine repair and maintenance manuals offer the most comprehensive and authoritative information available for outboard, inboard, stern-drive and diesel engines, as well as personal watercraft.
