The Toronto Maple Leafs have not won a Stanley cup since 1967—a burden that long-suffering fans have regrettably had to bear. Ron Bailey, the new director of player personnel for the Leafs, is more than frustrated with his beloved team, who last won the prestigious title when he was just three. Unfortunately, Ron worries that the cynical Canadian fans and media who fear it may be another forty years before the Leafs win another one might be right. Just as he is about to give up hope, Bailey accidentally uncovers a possible reason for the Leafs’ long drought—a curse that has been supposedly placed on the team by the father of Dale McCaine, a former player who, due to tragic circumstances, never had the opportunity to play for a cup. As Bailey’s curiosity peaks, he asks for a meeting with the feisty and feeble Doug McCaine—who asks for a second chance for his deceased son to play for the Stanley Cup in Maple Leaf Gardens. Only then will he lift his curse. In this sports adventure, a young hockey director must orchestrate the game of the century as the spirits of former Leafs’ greats to band together to help a player’s dreams come true.

GIs returning after World War II created an entirely new automotive market niche when they bought surplus Jeeps and began exploring the rugged backcountry of the American West. This burgeoning market segment, which eventually became known as sport utility vehicles (SUVs), numbered about 40,000 units per year with offerings from Jeep, Scout, Toyota, and Land Rover. In 1966, Ford entered the fray with its Bronco, offering increased refinement, more power, and an innovative coil-spring front suspension. The Bronco caught on quickly and soon established a reputation as a solid backcountry performer. In Baja, the legendary accomplishments of racers such as Parnelli Jones, Rod Hall, and Bill Stroppe further cemented the bobtail’s reputation for toughness. Ford moved upstream with the introduction of the larger Bronco for 1978, witnessing a huge increase in sales for the second-generation trucks. The Twin Traction Beam front end was introduced in the third generation, and further refinements including more aerodynamic styling, greater luxury, and more powerful fuel-injected engines came on board in the generations that followed. Through it all, the Bronco retained its reputation as a tough, versatile, and comfortable rig, both on and off the paved road. With the reintroduction of the Bronco for 2020, Ford is producing a vehicle for a whole new generation of enthusiasts that looks to bring modern styling and performance to the market while building on the 30-year heritage of the first five generations of the Bronco so dearly loved by their owners. From the development process and details of the first trucks through the 1996 models, author Todd Zuercher shares technical details, rarely seen photos, and highlights of significant models along with the stories of those people whose lives have been intertwined with the Bronco for many years. This book will have new information for everyone and will be a must-have for longtime enthusiasts and new owners alike!

Marketing visionary Martin Lindstrom has been on the front line of the branding for over twenty years. In Brandwashed, he turns the spotlight on his own industry, drawing on all he has witnessed behind closed doors, exposing for the first time the full extent of the psychological tricks and traps that companies devise to win our hard-earned money. Lindstrom reveals eye opening details such as how advertisers and marketers target children at an alarmingly young age (starting when they are still in the womb), what heterosexual men really think about when they see sexually provocative advertising, how marketers and retailers stoke the flames of public panic and capitalize on paranoia over diseases, extreme weather events, and food contamination scares. It also presents the first ever evidence to prove how addicted we are to our smartphones, and how certain companies (like the maker of a very popular lip balm), purposely adjust their formulas in order to make their products chemically addictive, and much, much more. Brandwashed is a shocking insider's look at how today's global giants conspire to obscure the truth and manipulate our minds, all in service of persuading us to buy.

Jou'lania's father worked every day to provide for his family; he respected the Word of God, and he loved his wife as Christ loves the church. Her father showed his aff ection by polishing her Sunday shoes, her self-esteem, and her spirit. But as the years passed, her shoes became soiled with dirt and splatter.She did not want anyone to know how dirty her shoes were, and she began to hide them. Each day was another exercise in obscuring her unhappy life with hairstyles, fake smiles, new clothes, and sweet smelling fragrances.But those things did nothing to comfort the pain in her heart for the three failed marriages. It was only by looking to the Lord for guidance and remembering how her father made her feel as a little girl that she was able to step out of the mud and be clean again.Daddy Polished My Shoes celebrates a father whose love his daughter never doubted and considers the profound lessons she learned from his example about life. It is a must read, a page-turner packed with family dynamics that would make you laugh, cry, forgive, and love again.

DEXA 2004, the 15th International Conference on Database and Expert Systems Applications, was held August 30 ? September 3, 2004, at the University of Zaragoza, Spain. The quickly growing spectrum of database applications has led to the establishment of more specialized discussion platforms (DaWaK Conference, EC-Web Conference, EGOVConference, Trustbus Conference and DEXA Workshop: Every DEXA event has its own conference proceedings), which were held in parallel with the DEXA Conference also in Zaragoza. In your hands are the results of much effort. The work begins with the preparation of the submitted papers, which then go through the reviewing process. The accepted papers are revised to final versions by their authors and are then arranged within the conference program. All culminates in the conference itself. For this conference 304 papers were submitted, and I want to thank to all who contributed to it; they are the real base of the conference. The program committee and the supporting reviewers produced altogether 942 referee reports, in average 3,1 reports per paper, and selected 92 papers for presentation. At this point we would like to say many thanks to all the institutions that actively supported this conference and made it possible. These were: • University of Zaragoza • FAW • DEXA Association • Austrian Computer Society

Let me tell you a story about a girl on Long Island, who always tried to play life by "the rules" – as outlined in the Secret Handbook of Long Island Rules... That girl, uh, woman, is me, Teddi Gallo. I'm the mother of three kids under the age of eleven, best friend to Bobbie (who denies there's any such thing as a secret handbook, but who knows all the moves by heart) and the daughter of June (who has inside info on the rules, but has a reserved room at South Winds Psychiatric Hospital, as well). And if I don't have enough to send me over the edge, my too-handsome-for-his-own-good husband seems determined to drive me crazy. But why? This is the tale of how I had to rewrite that old, dusty handbook – and while doing so, I suddenly discovered the secret to happiness was living by your own rules. And that has made everything different.

Get Fords complete story in Ford Tough: 100 Years of Ford Trucks and see why they've dominated the truck market, selling 1.5 million trucks every year in the US alone. In July 1917 Ford Motor Company introduced a one-ton chassis for commercial trucks, marking what many historians feel was its official entry into the dedicated truck business. Sure, after-market pickup beds could be added to a Model T car to convert it to a pickup, but with the debut of the rugged Model TT truck chassis, Ford was firmly in the truck market. Eight years later, Ford introduced its first factory-produced pickup, a sturdy half-ton job the public loved. During the century that has passed since that first Ford truck chassis, the F-series has become the best-selling truck in the world, and the best-selling vehicle of any type in America. Ford Tough: 100 Years of Ford Trucks tells the entire Ford truck story from the very beginning, when Ford got its start in truck production. This book provides the history of the wide array of models Ford has built over the past century, including the Model A roadster pick-up, stylish 81C pickups, legendary 1948 F-1, Bronco, Courier, Ranchero, and Econoline.

*Read Jesus, Money, and Me before you sit down with your financial advisor. Jesus, Money, and Me makes the powerful connection between your money and your faith. *Without using theological jargon, Jesus, Money, and Me renews the mind and transforms the heart of every Christ follower that longs to give God first place in all areas of his or her life, including money. "Ron achieves a great balance between instruction and inspiration in treating a critical area of our obedience before God. I commend Jesus, Money, and Me to your reading." -From the foreword by Dr. Mark L. Bailey President, Dallas Theological Seminary "Exactly what did Jesus say and think about money and possessions? Ron Jones provides an answer to that question with a careful and engaging walk through the Gospels." -Dr. Daniel L. Akin, President, Southeastern Baptist Theological Seminary "Ron Jones has done an excellent job of presenting the teachings of Christ in a manner that will impact the reader's attitudes and values toward his possessions. *Going through the motions will never deliver amazing and transformational results, in your business, your career, nor your spiritual life. To achieve the legal and God-given right to life, freedom and happiness, every assumption, every belief, every habit, and every tradition that has become your experience must be challenged. Our assumptions about the purpose of people and relationships in our lives, our beliefs about who we are and who God is, our habits and routines in the daily navigation of our experience, and the traditions of worship, church, and spirituality should be appraised to ensure they are potent, powerful, and purposeful in bringing the happiness, health and wealth we innately desire. So what are these smooth stones? These stones are the foundation of our relationship with God. They are the firm truths about God, others, and ourselves we've tested and know for sure. We use them as tools to learn, advance, and propel us to the happiness, health, and prosperity we were created to inherit and experience as children of God. Like David, we use these stones as weapons, against our personal Goliaths; giant challenges, threats and illusions of lack, sickness, and distress whether imposed by others or ourselves. These stones are also reminders of how we've grown and matured from the lessons we've learned through our experiences. We lay these stones down and walk on them on this road of salvation and success. In his inaugural book, Five Smooth Stones: What I Know About God for Sure, Larry shares his journey from religious complacency to spiritual empowerment. Through metaphysical interpretation of scripture, valuable spiritual educational insights, and candid storytelling, this first-time author leads us through his journey to spiritual accountability and empowerment. For the believer and non-believer as well, this provocative essay will compel you to start, resume, or refocus your relationship with God.*

*SUVs have taken over America's roads. Ad campaigns promote them as safer and "greener" than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In High and Mighty, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of Unsafe at Any Speed and Fast Food Nation, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.*
