auto consumer was also craving more exciting and innovative design. That innovation came in 1975 with the release of the revolutionary Porsche 924. This book begins its analysis with the creation of the Porsche 924 and the impact it made on the automotive world. During the 1980s, Porsche honed earlier 924 designs to create the 944 and its Turbo and convertible variants, and later the 968, completing a line that has produced some of the most respected sports cars of the modern era.

The text also follows in detail the long production life and development of Porsche's V-8 powered high performance grand tourer, the 928—introduced in 1977, named the 1978 European Car of the Year and culminating in the 350 bhp 928 GTS of the 1990s. This history of the dynamic Porsche family gives a full account of each model and reveals the unique contributions each has made to a constantly evolving automotive world.

The Escort RS Cosworth, which began rallying in 1993, was one of the most ingenious designs of all time, and eventually became Ford's most successful model since the legendary Escorts of the 1970s. The combination of Cosworth power, four-wheel-drive transmission, and an effective aerodynamic package made it a Rally Giant in all conditions, and, until the all-new Focus WRC was launched in 1999, this generation of Escorts was the most effective rally car that Ford had ever produced.
