Daniel Jonah Goldhagen has written an original and important study of genocide that reconceives its very nature. He does so not by examining a series of genocides but by exploring the nature of mass killing itself. Our failure to clearly describe, explain, and understand the mechanisms of genocide has made it difficult to prevent, and this book will change that. Through exhaustive research, he brilliantly lays out the roots and motivations of mass slaughter, exploring such questions as: Why do genocides occur? What makes people willing to slaughter others? How do cultural beliefs justify genocide among groups of people? Why has the world been so ineffective in reducing the incidence of genocide? Based on his thoroughgoing reconceptualization of genocide, Goldhagen proposes novel, sensible, and effective measures to put an end to this scourge of humanity, which is worse, even, than war. With the unflinching moral and analytical clarity that he is internationally known for, Goldhagen leaves no stone unturned in this groundbreaking book that will not only transform our understanding of genocide, but every person and political leader who reads it.

Written to commemorate the Bicentennial in 1976, James A. Michener's magnificent saga of the West is an enthralling celebration of the frontier. Brimming with the glory of America's past, the story of Colorado—the Centennial State—is manifested through its people: Lame Beaver, the Arapaho chieftain and warrior, and his Comanche and Pawnee enemies; Levi Zendt, fleeing with his child bride from the Amish country; the cowboy, Jim Lloyd, who falls in love with a wealthy and cultured Englishwoman, Charlotte Seccombe. In Centennial, trappers, traders, homesteaders, gold seekers, ranchers, and hunters are brought together in the dramatic conflicts that shape the destiny of the legendary West—and the entire country. BONUS: This edition includes an excerpt from James A. Michener's Hawaii. Praise for Centennial “A hell of a book . . . While he fascinates and engrosses, Michener also educates.”—Los Angeles Times “An engrossing book . . . imaginative and intricate . . . teeming with people and giving a marvelous sense of the land.”—The Plain Dealer “Michener is America's best writer, and he proves it once again in Centennial. . . . If you're a Michener fan, this book is a must. And if you're not a Michener fan, Centennial will make you one.”—The Pittsburgh Press “An absorbing work . . . Michener is a superb storyteller.”—BusinessWeek

Although many international political economy texts offer good descriptions of what events have occurred in global economic and political relations, they make little attempt to develop explicit theoretical frameworks explaining why. Andrew Sobel's International Political Economy in Context: Individual Choices, Global Effects takes a micro approach to international political economy that considers the fact that individuals—not nations—make choices. Grounding policy choices in the competitive environs of domestic politics and decision-making processes, Sobel illustrates how policymakers choose among alternatives, settling on those that are most in sync with their self-interest. The book is structured to build students' skills for a sophisticated understanding of how and why events unfold in the international political economy. Students become versed in the primary assumptions and structural/macro conditions of economic and political geography in the global arena. An examination of micro-level conditions and mechanisms introduces the factors that influence political and economic outcomes. Students are then able to use those primary assumptions and micro-level arrangements to make sense of past and present changes in the global political economy. Those familiar with Sobel's first volume, Political Economy and Global Affairs, will easily find their way through this new book. Anyone looking for a compelling, accessible, and fully integrated rational choice perspective on international political economy will find it here.
