I have seen software teams transformed by the ideas in this book." --Mike Cohn, author of Agile Estimating and Planning "As a lean practitioner myself, I have loved and used their first book for years. When this second book came out, I was delighted that it was even better. If you are interested in how lean principles can be useful for software development organizations, this is the book you are looking for. Mary especially has a lot of knowledge related to lean techniques in product development and manufacturing. It's rare that these techniques are actually translated to software. This is something no other book does well (except their first book)." --Bas Vodde "The new book by Mary and Tom Poppendieck provides a well-written and comprehensive introduction to lean principles and selected practices for software managers and engineers. They begin with a compelling history of lean thinking, then move to key areas such as value, waste, and people. Each chapter includes exercises to help you apply keypoints. If you want a better understanding of how lean ideas can work with software, this book is for you." --Bill Wake, independent consultant In 2003, Mary and Tom Poppendieck's Lean Software Development introduced breakthrough development

We Are the Ocean is a collection of essays, fiction, and poetry by Epeli Hau'ofa, whose writing over the past three decades has consistently challenged prevailing notions about Oceania and prescriptions for its development. He highlights major problems confronted by the region and suggests alternative perspectives and

Where To Download Foundations Of Lodging Management

ways in which its people might reorganize to relate effectively to the changing world. Hau'ofa's essays criss-cross Oceania, creating a navigator's star chart of discussion and debate. Spurning the arcana of the intellectual establishments where he was schooled, Hau'ofa has crafted a distinctive—often lyrical, at times angry—voice that speaks directly to the people of the region and the general reader. He conveys his thoughts from diverse standpoints: university-based analyst, essayist, satirist and humorist, and practical catalyst for creativity. According to Hau'ofa, only through creative originality

in all fields of endeavor can the people of Oceania hope to strengthen their capacity to engage the forces of globalization. “Our Sea of Islands,” “The Ocean in Us,” “Pasts to Remember,” and “Our Place Within,” all of which are included in this collection, outline some of Hau‘ofa’s ideas for the emergence of a stronger and freer Oceania. Throughout he expresses his concern with the environment and suggests that the most important role that the “people of the sea” can assume is as custodians of the Pacific, the vast area of the world’s largest body of water.
