of the markets and production, this book illustrates the globalization of vehicle manufacturers and component suppliers, giving form to the development of the industry's business model. A key factor in an auto-industry's successes and failures is the often-difficult relationship it has with government, which varies in nature from country to country. As an illustrative case, Wormald and Rennick present and analyse the entire lifecycle of Australia's automotive history - including its birth, growth, functioning and death - and its shifting relationship with the government that supported it. Principles of Water Treatment has been developed from the best selling reference work Water Treatment, 3rd edition by the same author team. It maintains the same quality writing,

Wrapped in a svelte Marcello Gandini - designed body and powered by a 350-horsepower V-12, the Miura instantly made every other car look antiquated. In 1974, Lamborghini again shocked the automotive world with the mad Countach (an Italian expression one might utter at the sight of a beautiful woman), another Gandini masterpiece. Audi acquired the company in 1997 and would bring significant German efficiency to bear, turning out supercars to a new template: the Murcielago in 2001, the Gallardo in 2003, the Reventon in 2008, the Aventador in 2011, and, most recently, the appropriately named Huracan.
