DEADCORE: 4 HARDCORE ZOMBIE NOVELLAS Join authors Randy Chandler, Ben Cheetham, Edward M. Erdelac, and David James Keaton as they unleash the carnage while breathing new life, and death, into the zombie genre. **FANGORIA MAGAZINE REVIEW** "As the book's title indicates, **DEADCORE** achieves all extremes. Violent, perverse, depraved—and, as such, quite recommended." **THE STORIES DEAD JUJU BY RANDY CHANDLER** He's the mystery man on the news. Where he shows up, the shit goes down. The dead are rising, the immigration issue has reached the boiling point, the living are screwed, and unspeakable acts are being performed upon all involved. In this tale of **Zombies Gone Wild**, yes the dead walk but just where the hell are they going and why? **Dead Juju** gives you the hardcore truth, if you're ghoulish enough to handle it. **NIGHT OF THE JIKININKI BY EDWARD M. ERDELAC** After a comet is observed in the western sky of feudal Japan, a murdered inmate rises from the dead and attacks his fellow prisoners. Three disparate men: a casteless bandit, a mad, child-eating monk, and a renowned but sadistic samurai band together to escape the walled and moat-surrounded prison as it fills with the walking and ravenous dead. **ZEE BEE & BEE (A.K.A. PROPELLER HATS FOR THE DEAD) BY DAVID JAMES KEATON** At a "Zombie Bed & Breakfast" tourist trap, guests pay for the thrill of a staged zombie assault during an apocalyptic scenario, acted out by sluggish hotel workers who are well-versed in the zombie genre. But soon the script doesn't go as planned, the guests become uncooperative, and the actors are taking their roles very seriously these days. **ZOMBIE SAFARI BY BEN CHEETHAM** Survivors of a zombie apocalypse have carved out new existences on islands, only visiting the mainland to hunt zombies. But things start to go wrong. Zombies don't die as they should. Hunters go missing. A trip that's supposed to be fun turns into a struggle for survival as four men make a discovery that causes them to question not only what it means to be a zombie, but what it means to be human.

Anger... Resentment... Guilt... Pain... For millions of people, not every prison comes with a set of bars. That's because at some point, no matter who you are, regardless of your race, creed, religion or even gender, everyone has suffered at the hands of another person. You are not alone. The question is whether this wrong happened two minutes or twenty years ago, whether this person is living or dead, why are you still allowing yourself to suffer because of it? Why is this pain still being allowed to destroy the very relationships that you have with your friends, family, God and even yourself? There is help, but are you ready to accept it? In this ground breaking study of the power of forgiveness, R.A. Clark, an award-winning educator and life coach, challenges not only what you thought that you knew about forgiveness, but also questions the heavy emotional price that you are willing to pay to live without it. In a world where it is hard to love and there is so much to hate, finally somebody will tell the truth about the lies that we tell ourselves about forgiveness. Including... - Why you should never forgive and forget? - When is the right time to forgive anyone for anything? - Why your "silence" maybe slowly destroying your family? - The only biblical way that there is to forgive anyone. - Also, discover just who is the one person that you should always forgive, even when your heart tells you not to. Prepare yourself. This book is the first step in a remarkable journey to help you to become the spouse, parent, and/or friend that you were truly meant to be; the one person that many people wish they were and others only pretend to be.

This comprehensive, multidisciplinary text addresses all aspects of head and neck cancer and represents a wide spectrum of specialists, including surgical, radiation, and medical oncologists, dentists, pathologists, radiologists, and nurses. The book focuses on a two-part approach to treatment that maximizes the chance for a cure while maintaining a strong emphasis on quality of life. This Third Edition's updated techniques section includes new radiation techniques such as IMRT and IGRT and new endoscopic and laser surgical techniques. Other highlights include a new chapter on reconstructive techniques; significant updates to all site-specific chapters; updates on chemoprevention and molecular targeting; and discussions of new imaging modalities such as fused PET/CT. A companion Website will offer the fully searchable text with all images.

This volume, the fifth of a continuing series on information systems science, covers four timely topics which are in the mainstream of this field. In each chapter, an attempt is made to familiarize the reader with basic background information on the advances discussed, so that this volume may be used independently or in conjunction with the previous volumes. The emphasis in this volume is focused upon data organization and access methods, software for on-line minicomputer applications, advances in microprogramming, and grammars and recognizers for formal and natural languages. In Chapter 1, P. C. Patton presents a tutorial survey of data organization and access methods which play a central role in information system design. Research in information processing has been shifted from numerical data processing to nonnumerical information handling. In the latter case, the information is carried not only by the data but also by the structure and organization of the data base. In this chapter, the author provides the reader with a comprehensive review of various data structures, including linear lists, array structures, tree structures, and multilinked structures. He also discusses the important problem of data-base design and management. This chapter concludes with several examples of information handling systems such as a matrix interpretive system, a generalized information management system, and a criminal justice information system. The rapid reduction in cost and great increase in capability of the mini computer have made it an attractive machine for information systems.

No writer has rendered our boundariless, post-colonial world more acutely or prophetically than V. S. Naipaul, or given its upheavals such a hauntingly human face. A perfect case in point is this riveting novel, a masterful and stylishly rendered narrative of emigration, dislocation, and dread, accompanied by four supporting narratives. In the beginning it is just a car trip through Africa. Two English people--Bobby, a civil servant with a guilty appetite for African boys, and Linda, a supercilious "compound wife" [117]-- are driving back to their enclave after a stay in the capital [111]. But in between lies the landscape of an unnamed country whose squalor and ethnic bloodletting suggest Idi Amin's Uganda. [111-12, 120, 130-1, 150, 178, 220-40] And the farther Naipaul's protagonists travel into it, the more they find themselves crossing the line that separates privileged outsiders from horrified victims. Alongside this Conradian tour de force are four incisive portraits of men seeking liberation far from home. By turns funny and terrifying, sorrowful and unsparing, In A Free State is Naipaul at his best.
