This book is a great resource for new graduate students interested in knowing how to navigate their studies more effectively and creatively.

The ships hears on through billowing seas Carried on tempest's wings with ease A cry of joy goes up from fore and aft: "Our destination is within our grasp!" But the helmsman's words are lost in the throng: "We've been sailing in circles all along." Marie von Ebner-Eschenbach This book has been written as an aid to anyone in the print media industry, be they managers or customers, who is looking to steer their business into calmer waters in what are stormy times. New technologies offer tremendous opportunities for innovation and process improvement – but only if we understand the fundamental principles behind them. This is the goal of this book. To this end, we will be looking at how best to network the print media industry with its customers, production partners and suppliers. This networking process covers the production data that can be transferred entirely digitally as far as the press stage, i. e. the digital page to be printed (referred to below as the "technical work?ow"), but also the information, communication and interaction processes which take place before, during and after production, e. g. details of the print run or the planned delivery date (referred to below as the "business management work?ow"). Inter-company networking of the various market players using Internet technology is known as "e-business" in commercial and management circles. Curriculum can be defined in a variety of ways. It might be viewed as a body of knowledge, a product, or a process. Curricula can differ as they are conceptualized from various theoretical perspectives to address the needs of teachers, students, and the context of schooling. One reason to study curriculum is "to reveal the expectations, processes and outcomes of students' school learning experiences that are situated in different cultural and system contexts. ... further studies of curriculum practices and changes are much needed to help ensure the success of educational reforms in the different cultural and system contexts" (Kulm & Li, 2009, p. 709). This volume highlights international perspectives on curriculum and aims to broaden the wider mathematics education community's understandings of mathematics curriculum through viewing a variety of ways that curricula are developed, understood, and implemented in different jurisdictions/countries. Within this volume, we define curriculum broadly as the set of mathematics standards or outcomes, the messages inherent in mathematics curriculum documents and resources, how these standards are understood by a variety of

stakeholders, and how they are enacted in classrooms. The focus is on the written, implied, and enacted curriculum in various educational settings throughout the world.

Ursula Hackett's tried-and-tested approach for essay success helps students to create brilliant, original, high-scoring essays that are enjoyable to write – and read. With dozens of hands-on exercises and clear examples, *Brilliant Essays* begins with students' everyday experience of using language, arguing a case, reading, thinking, and communicating with other people. Chapters help students to examine – and dispel – assumptions, build and control their arguments and use evidence effectively, in written assignments and timed exams. The final chapter provides clear, no-nonsense answers to frequently asked questions raised by Ursula's students at Royal Holloway, University of London and the University of Oxford and via her YouTube channel and website. Whichever subject your students study, *Brilliant Essays* will take them beyond the basics and give them the tools to reach their academic potential.

Bringing history teaching into the twenty-first century, Teaching History Online is a concise guide to developing and using internet resources in history instruction. It offers practical, jargon-free advice to help the history teacher develop online assignments, and provides an informed introduction to the myriad resources and tools available for use in the online classroom. Beginning with a chapter on the benefits of teaching and studying online, John F. Lyons goes on to address instructors' most commonly

asked questions and concerns, including: designing an online class providing online alternatives to the lecture developing a user-friendly discussion board conducting assessment and dealing with classroom management issues. For historians interested in providing an online element to their traditional face-to-face classroom teaching, the final chapter shows how to develop successful hybrid/blended classes. An accessible introduction and valuable resource, Teaching History Online includes sample lesson plans, examples of online learning tools, and suggestions for further reading, helping those who use - or want to use - online resources to create exciting, interactive and rewarding learning environments.
