"We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a

computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Despite the many advances women have made since the internal combustion engine was invented, there is still one widely held belief that won't seem to go away: that when it comes to cars, women should just leave it to the men. In *Essential Car Care for Women*, ESPN NASCAR pit reporter Jamie Little and Discovery Channel "Turbo Expert" Danielle McCormick team up to dispel this myth once and for all—and to offer the indispensable, hard-won advice women need to buy, sell, and care for their cars with confidence. With this handy guide, women will learn how to save themselves money by performing basic—but essential—maintenance tasks on their own. Little and McCormick explain what an alternator, regulator, distributor, and timing belt are; how to change a tire, recharge a flat battery, check the oil, and assess tire pressure; what to do when a car breaks down or

when an accident occurs; how to buy a car without being taken advantage of; and more. Straightforward and easy to follow—and including simple step-by-step diagrams and pictures to help along the way—Essential Car Care for Women is the ultimate handbook to everything a woman should know about her set of wheels.

"Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel

without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.
