"The North Carolina A&T State University book reflects an impressive illustration of the broad teaching, research, and service aspects of the university. In 1891, the university began as the Agricultural and Mechanical Arts College for the Colored Race at Shaw University. As an 1890 land-grant institution--historically black colleges that were established under the Second Morrill Act--the university's purpose was to provide education in agriculture, home economics, mechanical arts, and professions relative to the era. From our humble beginnings until now, the university has adopted an uncompromising expectation of integrity and excellence among our students, faculty, staff, and alumni. A&T has historically produced socially conscious, globally prepared, and competent leaders. NC A&T remains committed to fulfilling the fundamental purposes of the land-grant university through exemplary undergraduate and graduate instruction, scholarly and creative research, and effective public service and engagement"--Provided by publisher.

Now 60 years old, your Slant Six could probably use some freshening up. Slant Six engine expert Doug Dutra has produced this volume to walk you through every aspect of disassembly, evaluation, rebuild, and reassembly in an easy-to-read, step-by-step format. The book also covers modifications, showing how to squeeze the most out of your engine. The year 1960 was an important one in auto manufacturing; it was the year all of the Big Three unveiled entrants in a new class of car called the compact. Chrysler's offering, the Plymouth Valiant, was paired with its redesigned 6-cylinder engine entrant, the Slant Six, known by its nickname

the "leaning tower of power." This engine powered the Valiants when they swept the top seven positions in the newly christened compact race that precluded the Daytona 500. With its legacy intact, Chrysler's Slant Six powered Mopar automobiles for decades to come in three displacement offerings (170, 198, 225). With millions of Slant Six engines built over the 30-plus years that the engine was produced, it's always a good idea to have this book handy, as you never know when the next "leaning tower of power" will find its way into your garage! p.pl {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

Radar Instruction Manual

Used Car Buying Guide, 1993

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for

use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

"Chemistry is designed for the two-semester general chemistry course. For many students, this course provides the foundation to a career in chemistry, while for others, this may be their only college-level science course. As such, this textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world around them. The text has been developed to meet the scope and sequence of most general chemistry courses. At the same time, the book includes a number of innovative features designed to enhance student learning. A strength of Chemistry is that instructors can customize the book, adapting it to the approach that works best in their classroom."--Openstax College website.

This is a print on demand edition of a hard to find publication. Communities across the U.S. are focused on creating coordinated responses to intimate partner violence (IPV). Illinois took an innovative approach to facilitating the development of coordinated responses statewide. Beginning in 1990, the Admin. Office of the Illinois Courts spearheaded the creation of a network of Family Violence Coordinating Councils (FVCC) across 22 Judicial Circuits. This study examined the effectiveness of this coordinating council structure by investigating the extent to which FVCC have an impact on perceived shifts in stakeholder knowledge and relationships and institutionalized change and more distal systems change outcomes in the systems response to IPV (e.g., accessibility of orders of protection).
