Fiction. Winner of the 2015 Noemi Press Fiction Award. UNCOUNTRY: A MYTHOLOGY is a collection of narratives that aim to expand creative pathways into historical space, particularly histories of migration and displacement. It is divided into four Histories: Ash, Breath, Hunger and Blood. The four Histories explore the gaps between "remembered" official history and the more unreliable spaces of private memory and unspoken unofficial history. The storylines re-contextualize and re-imagine content from mythic spaces, such as German folktales and Eastern European Jewish lore, historical narratives as well as anecdotes from oral family memory. UNCOUNTRY furthermore explores the notion of invisible landscapes; an accumulation of stories, memories, dreams and desires, over-layering the visible place: a record of the human, animal and geographical history that we move through. Child poverty and the well-being of children is an important policy issue throughout the industrialised world. Some 47 million children in 'rich' countries live in families so poor that their health and well-being are at risk. The main themes addressed are: · the extent and trend of child poverty in industrialised nations; · outcomes for children - for example, the relationship between childhood experiences and children's health; · country studies and emerging issues; · child and family policies. All the contributions underline the urgent need for a

comprehensive policy to reduce child poverty rates and to improve the well-being of children. Findings are clearly presented and key focus points identified for policy makers to consider.

“It is hard to imagine a better novel for a book club discussion...A thoughtful and gripping family tale that will haunt readers long after finishing it.”

—Kirkus Reviews, STARRED As a young mother with a toddler and a live-in boyfriend, Maggie Fisher’s job at a checkout counter in downtown Phoenix doesn’t afford her much financial flexibility. She dreams of going to college and becoming a teacher, options she squandered when she fled her family home as a teenager. When Maggie stumbles onto an ad offering thousands of dollars to women who are willing to gestate other people’s babies, she at first finds the concept laughable. Before long, however, she’s been seduced by all the ways the extra money could improve her life. Once she decides to go for it, it’s only a matter of months before she’s chosen as a gestational carrier by Chip and Donovan Rigsdale, a married couple from New York. After delivering twin babies and proudly handing them off to the Rigsdales, Maggie finally gets her life on a positive trajectory: she earns her degree, lands a great job, and builds a family of her own. She can’t fathom why, ten years after the fact, the fertility clinic is calling to ask for a follow-up DNA test. High-energy and immensely readable, He Gets That from Me explores what it really means to be part of a family.

A Nursery Crime

Enter the world of the Nursery Crime Division in this novel from Jasper Fforde, the New York Times bestselling author of the Thursday Next series and The Constant Rabbit Jasper Fforde's bestselling Thursday Next series has delighted readers of every genre with its literary derring-do and brilliant flights of fancy. In The Big Over Easy, Fforde takes a break from classic literature and tumbles into the seedy underbelly of nursery crime. Meet Inspector Jack Spratt, family man and head of the Nursery Crime Division. He's investigating the murder of ovoid D-class nursery celebrity Humpty Dumpty, found shattered to death beneath a wall in a shabby area of town. Yes, the big egg is down, and all those brittle pieces sitting in the morgue point to foul play. "[Fforde] knows a thing or two about leaping into new worlds. . . . It's hard not to see what all the enthusiasm is about." -Janet Maslin, The New York Times "A wonderfully readable riot." -The Wall Street Journal

What if you had a Framework to make better decisions at home and at work? Decision is a story about a teen boy who is faced with making a big decision - and about a gift his father gives him to help him make better decisions as he emerges into adulthood. In the first part of the book, Zach shares his story about how Ryan, an up and coming star running back for his middle school football team, is faced with a big decision. When he asks his parents for help, rather than telling him what to do, his father teaches him a framework to make his big decision for himself. In the second half of the book, written as a guide for parents, teachers, counselors, coaches and leaders, Dr. Daniel Friedland, one of the leading experts on how doctors are trained to make medical decisions, shares how you can use this 4-Step Framework to make better life decisions. He also shares the science behind how your brain works and how you can better work your brain to do so. Be inspired and empowered to make your big decisions. Think about with whom you'd want to read and discuss this book. Reading and sharing its lessons may well be one of the best decisions you'll ever make!

An authoritative how-to guide that explains every aspect of science proposal writing This fully revised edition of the authoritative guide to science proposal writing is an essential tool for any researcher embarking on a grant or thesis application. In accessible steps, the authors detail every stage of proposal writing, from conceiving and designing a project to analyzing data, synthesizing results, estimating a budget, and addressing reviewer comments and resubmitting. This new edition is updated to address changes and developments over the past decade, including identifying opportunities and navigating the challenging proposal funding environment. The only how-to book of its kind, it includes exercises to help readers stay on track as they develop their grant proposals and is designed for those in the physical, life, environmental, biomedical, and social sciences, as well as engineering.

A family vacation dredges up a boatload of trouble in the next witty, insightful novel from the acclaimed author of *The Intermission*. "An irresistible drama filled with humor and heart-tugging emotion about family and what it means to belong. I absolutely adore Friedland's warm, witty writing!"--Emily Giffin, #1 New York Times bestselling author of *All We Ever Wanted Sink or swim*. Or at least that's what Annette Feldman tells herself when she books a cruise for her entire family. It's been over a decade since the Feldman clan has spent more than twenty-four hours under the same roof, but Annette is determined to celebrate her seventieth birthday the right way. Just this once, they are going to behave like an actual family. Too bad her kids didn't get the memo.

Between the troublesome family secrets, old sibling rivalries, and her two teenage grandkids, Annette's birthday vacation is looking more and more like the perfect storm. Adrift together on the open seas, the Feldmans will each face the truths they've been ignoring--and learn that the people they once thought most likely to sink them are actually the ones who help them stay afloat.

"Eldon Mayer is a battle-tested pro. You should listen to what he and his partner, Sam Kirschner, have to say." --Barton M. Biggs, Managing Partner, Traxis Partners Meet the crème de la crème of the new breed of hedge fund managers, learn how they evaluate world financial markets, hear about their winners and losers, and discover how they apply proprietary strategies to stay ahead of the curve. Through broad-scope interviews with 15 highly successful managers, The Investor's Guide to Hedge Funds provides unparalleled insight into each major hedge fund strategy, its strengths, weaknesses, and performance characteristics. Most importantly, this book shows that despite the sensational headlines,

adding hedge funds to a portfolio of stocks and bonds can reduce risk and improve overall performance.

This Passover Seder is not just any Passover Seder. Yes, there will be a quick service and a festive meal afterwards, but this night is different from all other nights. This will be the night the Golds of Greenwich meet the Rothschilds of New York City. The Rothschilds are the stuff of legends, and when Sylvia finds out that her youngest of three is going to bring her new boyfriend to the Seder, she's giddy. When she finds out that his parents are coming, too, she darn near faints. Making a good impression is all she thinks about. Well, almost. She still has to consider her other daughter, Sarah, who'll be coming with her less than appropriate beau and his overly dramatic Italian mother. But the drama won't stop there. Because despite the food and the wine, despite the new linen and the fresh flowers, the holidays are about family. Long forgotten memories come to the surface. Old grievances play out. And Sylvia Gold has to learn how to let her family go.

Along with this good progress in process controller assessment methods, researchers have also been investigating techniques to diagnose what is causing the process or control loop degradation. This requires the use of

on-line data to identify faults via new diagnostic indicators of typical process problems. A significant focus of some of this research has been the issue of valve problems; a research direction that has been motivated by some industrial statistics that show up to 40% of control loops having performance degradation attributable to valve problems. Shoukat Choudhury, Sirish Shah, and Nina Thornhill have been very active in this research field for a number of years and have written a coherent and consistent presentation of their many research results as this monograph, *Diagnosis of Process Nonlinearities and Valve Stiction*. The *Advances in Industrial Control* series is pleased to welcome this new and substantial contribution to the process diagnostic literature. The reader will find the exploitation of the extensive process data archives created by today's process computer systems one theme in the monograph. From another viewpoint, the use of higher-order statistics could be considered to provide a continuing link to the earlier methods of the statistical process control paradigm.

The rules of evidence can be effectively and directly understood through applied learning methods such as problem-solving. More than just a supplemental source of problems, this book can be used in conjunction with the federal or state rules of evidence and their associated legislative history as an all-purpose guide to the rules of evidence. Each section of Evidence Problems and Materials commences with a brief explanation of a particular area of evidence law, followed by problems to test understanding of the evidentiary rules and their intended meaning. Methods of presentation of the problems include: • Courtroom transcript form; • Lawyering skills settings such as qualifying an expert,

Get Free Friedland Door User Guide

distinguishing and comparing statutes; and • Examination of identifying characteristics such as race, gender, sexual orientation, and ethnicity that may significantly affect evidentiary rulings. The role-playing problems allow students to consider different perspectives and focus on how to persuade others to adopt those perspectives, thereby facilitating an understanding of the evidence rules and their constitutive framework, and offering a broader perspective of how the rules relate to lawyering, legal theory, and human nature.

This criminal law book is designed for the modern law student. It has dual goals -- to transfer important knowledge about crimes and their creation to students and to help them gain a deeper understanding of that knowledge through a wide variety of teaching tools. To engage the modern student, the book includes topical cases, such as the George Zimmerman/Trayvon Martin case, background boxes, and different kinds of problems aimed at multiple skills. The book provides broader perspectives of the criminal process and theories of punishment, but also examines the nuances and details of the elements of crimes as well. This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the University of Arkansas at Little Rock Bowen School of Law.

systems—now fully revised and expanded. This textbook covers the mathematics needed to model, analyze, and design feedback systems. Now more user-friendly than ever, this revised and expanded edition of *Feedback Systems* is a one-volume resource for students and researchers in mathematics and engineering. It has applications across a range of disciplines that utilize feedback in physical, biological, information, and economic systems. Karl Åström and Richard Murray use techniques from physics, computer science, and operations research to introduce control-oriented modeling. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID

control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root locus plots Provides exercises at the end of every chapter Comes with an electronic solutions manual An ideal textbook for undergraduate and graduate students Indispensable for researchers seeking a self-contained resource on control theory

Computers for Social Change and Community Organizing presents an original perspective on the uses of computers for community- and social-change-based organizations. Drawing on the experience of community organizers and administrators who use computers for social and political goals, and computer consultants who tailor systems to the specialized needs of small non-profit and membership groups, the book offers valuable information and advice on traditional and innovative applications. Computers for Social

Change and Community Organizing aims to reach professionals who want to explore and use the computer efficiently and creatively, including: computer professionals working for social change administrators of small social service and community organizations leaders of self-help organizations, networks, and coalitions paid and volunteer staff and leadership Chapters range from suggestions on data-based implementation through reports on computer uses in neighborhood housing preservation and crime reduction, to discussions of the broad issues surrounding the role of technology in democratic social movements. This provocative book provides practical guidelines on computerizing for empowerment, together with insights into the challenges faced by low-budget organizations and contemporary social movements.
