*Reflecting on changes in the racial landscape since the 1960s and drawing on a depth of personal and private experiences, a Pulitzer Prize-winning columnist for the "Chicago Tribune" reconnects the increasingly abstract political debates about black conservatives, affirmative action, and the "race card" to the people for whom these words mean something more than just votes.*

*Faced with Eudora Welty's preference for the oblique in literary performances, some have assumed that Welty was not concerned with issues of race, or even that she was perhaps ambivalent toward racism. This collection counters those assumptions as it examines Welty's handling of race, the color line, and Jim Crow segregation and sheds new light on her views about the patterns, insensitivities, blindness, and atrocities of whiteness. Contributors to this volume show that Welty addressed whiteness and race in her earliest stories, her photography, and her first novel, *Delta Wedding*. In subsequent work, including *The Golden Apples*, *The Optimist's Daughter*, and her memoir, *One Writer's Beginnings*, she made the color line and white privilege visible, revealing the gaping distances between lives lived in shared space but separated by social hierarchy and segregation. Even when black characters hover in the margins of her fiction, they point readers toward complex lives, and the black body is itself full of meaning in her work. Several essays suggest that Welty represented race, like gender and power, as a performance scripted by whiteness. Her black characters in particular recognize whiteface and blackface as performances, especially comical when white characters are unaware of their role play. *Eudora Welty, Whiteness, and Race* also makes clear that Welty recognized white material advantage and black economic deprivation as part of a cycle of race and poverty in America and that she connected this history to lives on either side of the color line, to relationships across it, and to an uneasy hierarchy of white classes within the presumed monolith of whiteness. *Radical Theory, Caribbean Reality* is a collection of articles written over many years that explores the common themes of race and class in the Caribbean and the attempt to overcome social domination. Beginning with an autobiographical account of how his own philosophical outlook was shaped by the radicalization of the region following the 1968 Rodney riots, Jamaican philosopher Charles Mills looks both at those turbulent times and at their aftermath. The essays examine abstract political theory (Marxism, critical race theory, liberal social contract theory) while also focusing on specific Caribbean ideas, issues and events, such as M.G. Smith's plural society thesis, portrayals of the Jamaican left in popular thrillers, the collapse of the Grenada Revolution, "smadditizin" as the affirmation of personhood in a racist society and the evolution of Stuart Hall's views on race. As such, they all share a concern with the struggle for a more just social order and are "radically" oriented. The title has a double meaning insofar as it signifies both the application of radical theory to the Caribbean reality, and the ways in which that reality has too often collided with the theory; revealing its inadequacies. As Mills explains, "The overall aim is to elucidate some classic subjects and themes in radical theory, both generally and with local Caribbean application, and to map in the process a trajectory of intellectual development not peculiar to my own history but traced by many others of my generation also." "*Radical Theory, Caribbean Reality* is a long overdue collection on the Caribbean from one of its most accomplished scholars....Mills's books to date have focused either on broad questions of race or specific matters related to ideology. This, in a sense, represents his coming home to the Caribbean and his analysis of late-twentieth-century Caribbean politics and society."---Brian Meeks, Professor of Social and Political Change, Director of the Sir Arthur Lewis Institute of Social and Economic Studies, and Director of the

A groundbreaking work on race and class in the remarkable writer's fiction and photography

"A gathering of essays by Harvard legal scholar that explore all the cultural and historical issues of the past quarter century having to do with race and race relations in America. Randall Kennedy chronicles his reactions over the past quarter century to arguments, events, and people that have compelled him to put pen to paper. Three beliefs that are sometimes in tension with one another infuse these pages. First, a massive amount of cruel racial injustice continues to beset the United States of America. Second, there is much about which to be inspired when surveying the African American journey from slavery to freedom to engagement in practically every aspect of life in the United States. Third, an openness to complexity, paradox, and irony should attend any serious investigation of human affairs. Kennedy has tried to allow that sensibility ample leeway in the essays, prompting within himself surprise, ambivalence, and, on several occasions, a heartfelt need to express apology for prior oversights and mistaken judgments"--  
Philosophers on Race adds a new dimension to current research on race theory by examining the historical roots of the concept in the works of major Western philosophers.

In *From Class to Race*, Charles Mills maps the theoretical route that brought him to the innovative conceptual framework outlined in his academic bestseller *The Racial Contract* (1997). Mills argues for a new critical theory that develops the insights of the black radical political tradition. While challenging conventional interpretations of key Marxist concepts and claims, the author contends that Marxism has been 'white' insofar as it has failed to recognize the centrality of race and white supremacy to the making of the modern world. By appealing to both mainstream liberal values and the structuralism traditionally associated with the left, Mills asserts that critical race theory can radicalize the mainstream Enlightenment and develop a new kind of contractarianism that deals frontally with race and other forms of social oppression rather than evading them.

One of Book Riot's "The Best Books We Read in October 2018" "To say this collection is transgressive, provocative, and brilliant is simply to tell you the truth." "Roxane Gay, author of *Hunger* and *Bad Feminist* Smart, humorous, and strikingly original essays by one of "America's most bracing thinkers on race, gender, and capitalism of our time" (Rebecca Traister) In these eight piercing explorations on beauty, media, money, and more, Tressie McMillan Cottom—award-winning professor and acclaimed author of *Lower Ed*—embraces her venerated role as a purveyor of wit, wisdom, and Black Twitter snark about all that is right and much that is wrong with this thing we call society. Ideas and identity fuse effortlessly in this vibrant collection that on bookshelves is just as at home alongside Rebecca Solnit and bell hooks as it is beside Jeff Chang and Janet Mock. It also fills an important void on those very shelves: a modern black American feminist voice waxing poetic on self and society, serving up a healthy portion of clever prose and southern aphorisms as she covers everything from Saturday Night Live, LinkedIn, and BBQ Becky to sexual violence, infant mortality, and Trump rallies. Thick speaks fearlessly to a range of topics and is far more genre-bending than a typical compendium of personal essays. An intrepid intellectual force hailed by the likes of Trevor Noah, Chimamanda Ngozi Adichie, and Oprah, Tressie McMillan Cottom is "among America's most bracing thinkers on race, gender, and capitalism of our time" (Rebecca Traister). This stunning debut collection—in all its intersectional glory—mines for meaning in places many of us miss, and reveals precisely how the political, the social, and the personal are almost always one and the same.

"Sister Outsider, a collection of essays and speeches by the pioneering feminist Audre Lorde, is one of my all-time-favorite books. It's always great to have an intersectional tome on hand." "Amanda Gorman "Sister Outsider's teachings, by one of our most revered elder stateswomen, should be read by everyone." "Essence Presenting the essential writings of black lesbian poet and feminist writer Audre Lorde, *Sister Outsider* celebrates an influential voice in twentieth-century literature, with a foreword by Mahogany L. Browne. A New York Times New & Noteworthy book A Penguin Vitae Edition In this charged collection of fifteen essays and speeches, Lorde takes on sexism, racism, ageism, homophobia, and class, and propounds social difference as a vehicle for action and change. Her prose is incisive, unflinching, and lyrical, reflecting struggle but ultimately offering messages of hope. The groundbreaking feminist's timely collection of nonfiction writings on race, gender, and LGBTQ issues is now for the first time in Penguin Classics as part of the Penguin Vitae series, with a foreword by poet Mahogany L. *A collection of essays that blend the personal and the social, from the celebrated literary critic and novelist In these twenty-five essays, Darryl Pinckney has given us a view of our recent racial history that blends the social and the personal and wonders how we arrived at our current moment. Pinckney reminds us that "white supremacy isn't back; it never went away." It is this impulse to see historically that is at the core of Busted in New York and Other Essays, which traces the lineage of black intellectual history from Booker T. Washington through the Harlem Renaissance, to the Black Panther Party and the turbulent sixties, to today's Afro-pessimists, and celebrated and neglected thinkers in between. These are capacious essays whose topics range from the grassroots of protest in Ferguson, Missouri, to the eighteenth-century Guadeloupean composer Joseph Bologne, from an unsparing portrait of Louis Farrakhan to the enduring legacy of James Baldwin, the unexpected story of black people experiencing Russia, Barry Jenkins's Moonlight, and the painter Kara Walker. The essays themselves are a kind of record, many of them written in real-time, as Pinckney witnesses the Million Man March, feels and experiences the highs and lows of Obama's first presidential campaign, explores the literary black diaspora, and reflects on the surprising and severe lesson he learned firsthand about the changing urban fabric of New York. As Zadie Smith writes in her introduction to the book: "How lucky we are to have Darryl Pinckney who, without rancor, without insult, has, all these years, been taking down our*

various songs, examining them with love and care, and bringing them back from the past, like a Sankofa bird, for our present examination. These days Sankofas like Darryl are rare. Treasure him!"

Generally regarded as Nella Larsen's best work, *Passing* was first published in 1929 but has received a lot of renewed attention because of its close examination of racial and sexual ambiguities. It has achieved canonical status in many American universities. Clare Kendry is living on the edge. Light-skinned, elegant, and ambitious, she is married to a racist white man unaware of her African American heritage, and has severed all ties to her past after deciding to 'pass' as a white woman. Clare's childhood friend, Irene Redfield, just as light-skinned, has chosen to remain within the African American community, and is simultaneously allured and repelled by Clare's risky decision to engage in racial masquerade for personal and societal gain. After frequenting African American-centric gatherings together in Harlem, Clare's interest in Irene turns into a homoerotic longing for Irene's black identity that she abandoned and can never embrace again, and she is forced to grapple with her decision to pass for white in a way that is both tragic and telling.

The deeply entrenched patterns of racial inequality in the United States simply do not square with the liberal notion of a nation-state of equal citizens. Uncovering the false promise of liberalism, *State of White Supremacy* reveals race to be a fundamental, if flexible, ruling logic that perpetually generates and legitimates racial hierarchy and privilege. Racial domination and violence in the United States are indelibly marked by its origin and ongoing development as an empire-state. The widespread misrecognition of the United States as a liberal nation-state hinges on the twin conditions of its approximation for the white majority and its impossibility for their racial others. The essays in this book incisively probe and critique the U.S. racial state through a broad range of topics, including citizenship, education, empire, gender, genocide, geography, incarceration, Islamophobia, migration and border enforcement, violence, and welfare.

*Harriet Pollack, Christin Marie Taylor, Annette Trefzer, and Adrienne Akins Warfield* The year 2013 saw the publication of *Eudora Welty, Whiteness, and Race*, a collection in which twelve critics changed the conversation on Welty's fiction and photography by mining and deciphering the complexity of her responses to the Jim Crow South. The thirteen diverse voices in *New Essays on Eudora Welty, Class, and Race* deepen, reflect on, and respond to those seminal discussions. These essays freshly consider such topics as Welty's uses of African American signifying in her short stories and her attention to public street performances interacting with Jim Crow rules in her unpublished photographs. Contributors discuss her adaptations of gothic plots, haunted houses, Civil War stories, and film noir. And they frame Welty's work with such subjects as Bob Dylan's songwriting, the idea and history of the orphan in America, and standup comedy. They compare her handling of whiteness and race to other works by such contemporary writers as William Faulkner, Richard Wright, Toni Morrison, Chester Himes, and Alice Walker. Discussions of race and class here also bring her masterwork *The Golden Apples* and her novel *Losing Battles*, underrepresented in earlier conversations, into new focus. Moreover, as a group these essays provide insight into Welty as an innovative craftswoman and modernist technician, busily altering literary form with her frequent, pointed makeovers of familiar story patterns, plots, and genres.

*In Doing Race*, scholars from across the disciplines have written original essays on race and ethnicity aimed at an undergraduate audience. The book provides a practical response to the view, common in American debates, that race and ethnicity no longer matter, or that race and ethnicity should not be taken into account when deciding

**how to structure society and formulate public policy. It also answers the question of why race and ethnicity play such a large role in fueling violence around the globe. Doing Race shows that race and ethnicity matter because they are important resources in answering the fundamental, even universal Who am I? and Who are we? questions. It demonstrates how understanding how identities are shaped by race and ethnicity is central to understanding individual and collective behavior in the United States and throughout the world. Drawing on the latest science and scholarship, these original essays provide undergraduates with an effective framework for understanding the persistence of racial inequalities and problems in the 21st century. The twenty-fifth-anniversary edition of the groundbreaking classic, with a new introduction First published in 1993, on the one-year anniversary of the Los Angeles riots, Race Matters became a national best seller that has gone on to sell more than half a million copies. This classic treatise on race contains Dr. West's most incisive essays on the issues relevant to black Americans, including the crisis in leadership in the Black community, Black conservatism, Black-Jewish relations, myths about Black sexuality, and the legacy of Malcolm X. The insights Dr. West brings to these complex problems remain relevant, provocative, creative, and compassionate. In a new introduction for the twenty-fifth-anniversary edition, Dr. West argues that we are in the midst of a spiritual blackout characterized by imperial decline, racial animosity, and unchecked brutality and terror as seen in Baltimore, Ferguson, and Charlottesville. Calling for a moral and spiritual awakening, Dr. West finds hope in the collective and visionary resistance exemplified by the Movement for Black Lives, Standing Rock, and the Black freedom tradition. Now more than ever, Race Matters is an essential book for all Americans, helping us to build a genuine multiracial democracy in the new millennium.**

Winner of the Working-Class Studies Association C.L.R. James Award Seen as a pioneering figure in the critical study of whiteness, US historian David Roediger has sometimes received criticism, and praise, alleging that he left Marxism behind in order to work on questions of identity. This volume collects his recent and new work implicitly and explicitly challenging such a view. In his historical studies of the intersections of race, settler colonialism, and slavery, in his major essay (with Elizabeth Esch) on race and the management of labor, in his detailing of the origins of critical studies of whiteness within Marxism, and in his reflections on the history of solidarity, Roediger argues that racial division is part of not only of the history of capitalism but also of the logic of capital.

Charles Mills makes visible in the world of mainstream philosophy some of the crucial issues of the black experience. Ralph Ellison's metaphor of black invisibility has special relevance to philosophy, whose demographic and conceptual "whiteness" has long been a source of wonder and complaint to racial minorities. Mills points out the absence of any philosophical narrative theorizing and detailing race's centrality to the recent history of the West, such as feminists have articulated for gender domination. European expansionism in its various forms, Mills contends, generates a social ontology of race that warrants philosophical attention. Through expropriation, settlement, slavery, and colonialism, race comes into existence as simultaneously real and unreal: ontological without being biological, metaphysical without being physical, existential without being essential, shaping one's being without being one's shape. His essays explore the contrasting sums of a white and black modernity, examining standpoint epistemology and the metaphysics of racial identity, look at black-Jewish relations and racial conspiracy theories, map the workings of a white-supremacist polity and the

contours of a racist moral consciousness, and analyze the presuppositions of Frederick Douglass's famous July 4 prognosis for black political inclusion. Collectively they demonstrate what exciting new philosophical terrain can be opened up once the color line in western philosophy is made visible and addressed.

Looks at racism in America, describes examples of its everyday occurrence, and discusses its implications for the practice and teaching of law

The Racial Contract puts classic Western social contract theory, deadpan, to extraordinary radical use. With a sweeping look at the European expansionism and racism of the last five hundred years, Charles W. Mills demonstrates how this peculiar and unacknowledged "contract" has shaped a system of global European domination: how it brings into existence "whites" and "non-whites," full persons and sub-persons, how it influences white moral theory and moral psychology; and how this system is imposed on non-whites through ideological conditioning and violence. The Racial Contract argues that the society we live in is a continuous white supremacist state. Holding up a mirror to mainstream philosophy, this provocative book explains the evolving outline of the racial contract from the time of the New World conquest and subsequent colonialism to the written slavery contract, to the "separate but equal" system of segregation in the twentieth-century United States. According to Mills, the contract has provided the theoretical architecture justifying an entire history of European atrocity against non-whites, from David Hume's and Immanuel Kant's claims that blacks had inferior cognitive power, to the Holocaust, to the kind of imperialism in Asia that was demonstrated by the Vietnam War. Mills suggests that the ghettoization of philosophical work on race is no accident. This work challenges the assumption that mainstream theory is itself raceless. Just as feminist theory has revealed orthodox political philosophy's invisible white male bias, Mills's explication of the racial contract exposes its racial underpinnings.

Displacing Whiteness makes a unique contribution to the study of race dominance. Its theoretical innovations in the analysis of whiteness are integrated with careful, substantive explorations of whiteness on an international, multiracial, cross-class, and gendered terrain. Contributors localize whiteness, as well as explore its sociological, anthropological, literary, and political dimensions. Approaching whiteness as a plural rather than singular concept, the essays describe, for instance, African American, Chicana/o, European American, and British experiences of whiteness. The contributors offer critical readings of theory, literature, film and popular culture; ethnographic analyses; explorations of identity formation; and examinations of racism and political process. Essays examine the alarming epidemic of angry white men on both sides of the Atlantic; far-right electoral politics in the UK; underclass white people in Detroit; whiteness in "brownface" in the film Gandhi; the engendering of whiteness in Chicana/o movement discourses; "whiteface" literature; Roland Barthes as a critic of white consciousness; whiteness in the black imagination; the inclusion and exclusion of suburban "brown-skinned white girls"; and the slippery relationships between culture, race, and nation in the history of whiteness. Displacing Whiteness breaks new ground by specifying how whiteness is lived, engaged, appropriated, and theorized in a range of geographical locations and historical moments, representing a necessary advance in analytical thinking surrounding the burgeoning study of race and culture. A NEW YORK TIMES BESTSELLER "The fights against hunger, homelessness, poverty, health disparities, poor schools, homophobia, transphobia, and domestic violence are feminist fights. Kendall offers a feminism rooted in the livelihood of everyday women." —Ibram X. Kendi, #1 New York Times-bestselling author of *How to Be an Antiracist*, in *The Atlantic* "One of the most important books of the current moment."—*Time* "A rousing call to action... It should be required reading for everyone."—Gabrielle Union, author of *We're Going to Need More Wine* A potent and electrifying critique of today's feminist movement announcing a fresh new voice in black feminism Today's feminist movement has a glaring blind spot, and paradoxically, it is women. Mainstream feminists rarely talk about meeting basic needs as a feminist issue, argues Mikki Kendall, but food insecurity, access to quality education, safe neighborhoods, a living wage, and medical care are all feminist issues. All too often, however, the focus is not on basic survival for the many, but on increasing privilege for the few. That feminists refuse to prioritize these issues has only exacerbated the age-old problem of both internecine discord and women who rebuff at carrying the title. Moreover, prominent white feminists broadly suffer from their own myopia with regard to how things like race, class, sexual orientation, and ability intersect with gender. How can we stand in solidarity as a movement, Kendall asks, when there is the distinct likelihood that some women are oppressing others? In her searing collection of essays, Mikki Kendall takes aim at the legitimacy of the modern feminist movement, arguing that it has chronically failed to address the needs of all but a few women. Drawing on her own experiences with hunger, violence, and hypersexualization, along with incisive commentary on reproductive rights, politics, pop culture, the stigma of mental health, and more, *Hood Feminism* delivers an irrefutable indictment of a movement in flux. An unforgettable debut, Kendall has written a ferocious clarion call to all would-be feminists to live out the true mandate of the movement in thought and in deed.

*Presumed Incompetent* is a pathbreaking account of the intersecting roles of race, gender, and class in the working lives of women faculty of color. Through personal narratives and qualitative empirical studies, more than 40 authors expose the daunting challenges faced by academic women of color as they navigate the often hostile terrain of higher education, including hiring, promotion, tenure, and relations with students, colleagues, and administrators. The narratives are filled with wit, wisdom, and concrete recommendations, and provide a window into the struggles of professional women in a racially stratified but increasingly multicultural America.

*Liberalism is the political philosophy of equal persons - yet liberalism has denied equality to those it saw as sub-persons. Liberalism is the creed of fairness - yet liberalism has been complicit with European imperialism and African slavery. Liberalism is the classic ideology of Enlightenment and political transparency - yet liberalism has cast a dark veil over its actual racist past and present. In sum, liberalism's promise of equal rights has historically been denied to blacks and other people of color. In *Black Rights/White Wrongs: The Critique of Racial Liberalism*, political philosopher Charles Mills challenges mainstream accounts that ignore this history and its current legacy in self-conceivedly liberal polities today. Mills argues that rather than bracket as an anomaly the role of racism in the development of liberal theory, we should see it as shaping that theory in fundamental ways. As feminists have urged us to see the dominant form of liberalism as a patriarchal liberalism, so too Mills suggests we should see it as a racialized liberalism. It is unsurprising, then, if contemporary liberalism has yet to deliver on the recognition of black rights and the correction of white wrongs. These essays look at racial liberalism, past and present: "white ignorance" as a guilty ignoring of social reality that facilitates white racial domination; Immanuel Kant's role as the most important liberal theorist of both personhood and sub-personhood; the centrality of racial exploitation in the United States; and the evasion of white supremacy in John Rawls's "ideal theory" framing of social justice and in the work of most other contemporary white political philosophers. Nonetheless, Mills still believes that a deracialized liberalism is both possible and desirable. He concludes by calling on progressives to "Occupy liberalism!" and develop accordingly a radical liberalism aimed at achieving racial justice.*
