This sixth edition of The Practical Zone System by Chris Johnson updates the classic manual on Ansel Adams's landmark technique for the digital age. For photographers working digitally or with film, in color or black and white, in the studio or on the go, this simple visual language helps to control contrast and, through a process called Previsualization, provides photographers with the power of free creative expression. This new edition discusses recent advances in technology and potentials for their use in zone photography, including HDR, smartphone cameras that shoot in raw format and smartphone light meters. Johnson demonstrates how the Zone System is a universal visual and conceptual language that dramatically simplifies the problem of creating and rendering complex lighting setups.

In this book, popular Fuji Rumors "X-Pert Corner" columnist Rico Pfirstinger teaches about the little-known capabilities of the X-T1, which he's discovered through months of in-depth research and experimentation with the camera. Bruce Davidson's groundbreaking Subway, first published by Aperture in 1986, has garnered critical acclaim both as a documentation of a unique moment in the cultural fabric of New York City and for its phenomenal use of extremes of color and shadow set against flash-lit skin. In Davidson's own words, "the people in the subway, their flesh juxtaposed against the graffiti, the penetrating effect of the strobe light itself, and even the hollow darkness of the tunnels, inspired an aesthetic that goes unnoticed by passengers who are trapped underground, hiding behind masks and closed off from each other." In this third edition of what is now a classic of photographic literature, a sequence of 118 (including 25 previously unpublished) images transport the viewer through a landscape at times menacing, and at other times lyrical and soulful. The images present the full gamut of New Yorkers, from weary straphangers and languorous ladies in summer dresses to stalking predators and homeless persons. Davidson's accompanying text tells the story behind the images, clarifying his method and dramatizing his obsession with the subway, its rhythms and its particular madness. Bruce Davidson (born 1933) is considered one of America's most influential documentary photographers. He began taking photographs when he was ten, and studied at the Rochester Institute of Technology and the Yale University School of Design. In 1958 he became a member of Magnum Photos, and in 1962 he received a Guggenheim Fellowship to document the civil rights movement. After a solo exhibition at The Museum of Modern Art in 1963, Davidson spent two years photographing in Harlem, resulting in the book East 100th Street. In 1980, after living in New York City for 23 years, Davidson began Subway, his startling color essay of urban life. Master your camera and let your creativity soar! Starting with the top ten things users need to know about the camera, author Kevin Mullins carefully guides readers through the operating features. Readers get practical advice from a pro on which settings to use when, great shooting tips, and end of chapter assignments. From Snapshots to Great Shots is a beautiful how-to photography series that provides the perfect blend of instruction, inspiration, and reference for specific camera models and photography concepts. This is the first book of Joel Sternfeld's largely unseen early color photographs. In 1969 Sternfeld began working with a 35-mm camera and Kodachrome film, and First Pictures contains works from this time until 1980. Here Sternfeld develops traits that appear in his mature work: irony, a politicized view of America, concern for the social condition. But there are also pictures that bear little relation to his later work: color arrangements that parallel those of Eggleston, as well as street photography which Sternfeld ceased making in 1976. The photographs in "First Pictures" were made at a time when color photography was struggling to assert itself against the authoritative black-and-white tradition, making this book a revelation both in Sternfeld's oeuvre and in the history of contemporary photography. A major figure in the photography world, Joel Sternfeld was born in New York City in 1944. He has received numerous awards including two Guggenheim fellowships, a Prix de Rome and the Citibank Photography Award. Sternfeld's books published by Steidl include "American Prospects" (2003), "Sweet Earth" (2006) and "Oxbow Archive" (2008).

First comprehensive publication about the German pioneer of Leica photography

Iconic and never-before-seen images of punk and post-punk's quintessential bands In the late 70s, punk rock music began to evolve into the post-punk and new wave movements that dominated until the early 90s. During this time, prolific photographer and filmmaker Michael Grecco was in the thick of things, documenting the club scene in places like Boston and New York, and getting shots on- and backstage with bands such as The Cramps, Dead Kennedys, Talking Heads, Human Sexual Response, Elvis Costello, Joan Jett, the Ramones, and many others. Grecco captured in black and white and color the raw energy, sweat, and antics that characterized the alternative music of the time. Punk, Post Punk, New Wave: Onstage, Backstage, In Your Face, 1978-1991 features stunning, never-before-seen photography from this iconic period in music. In addition to concert photography, he also shot album covers and promotional pieces that round out this impressively extensive photo collection. Featuring a foreword from Fred Schneider of the B-52's, Punk, Post Punk, New Wave is a quintessential piece of music history for anyone looking for backstage access into the careers of punk and post punk's most beloved bands.
