The sixth edition of Clinical Methods and Practicum in Speech-Language Pathology remains a vital resource for students in speech-language pathology who are about to begin their clinical practicum. The book is divided into two major sections: clinical practicum and clinical methods in speech language pathology. These sections provide coverage of the structural and functional aspects of clinical practicum in a variety of settings. The book emphasizes clinical practicum is an exciting learning experience. The students will understand what is expected of them in each setting and what they can expect from their clinical supervisors. The book also gives an overview of treatment methods that apply across disorders. With this book, students will be better prepared to meet the exciting and yet often challenging task of providing ethical and effective services to children and adults with communication disorders. Clinical supervisors may find the book helpful in understanding their own roles and responsibilities better so that they can create a productive and exciting clinical practicum experience for their student clinicians. Clinical Methods and Practicum in Speech-Language Pathology offers a single and comprehensive source of information that will help establish clear expectations for both student clinicians and the clinical supervisors. New to the Sixth Edition New coauthor, Katrina Kuyumjian A new chapter with an overview of treatment procedures that apply across disorders of communication Revised section on clinical methods to include updated information on the current ASHA guidelines on clinical practicum; current legal and professional requirements regarding clinical practicum in educational settings; new and expanded information on assessment, target behaviors, and treatment strategies for all disorders of communication Updated and expanded references throughout Key Features: * Chapter Outlines open each chapter and provide a summary of the key topics * An end-of-book glossary allows readers to easily find and define important terms or concepts * Bulleted and boxed information for easy access Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

Toole's Cerebrovascular Disorders was the first modern book devoted to care of the stroke, originally published more than 40 years ago. This is a completely revised and updated sixth edition of the highly respected standard for stroke diagnosis and treatment. Dr James Toole has stayed on as a consultant for the text, and Drs E. Steve Roach, Kerstin Bettermann, and Jose Biller have reworked Dr Toole's book to include chapters on genetics, pregnancy-related stroke, and acute treatments. The practical focus of the book has not changed, retaining its emphasis on bedside diagnosis and treatment. Easily accessible both for stroke specialists and residents, the sixth edition has been modernized to keep pace with the rapid expansion of knowledge in stroke care and includes evidence-based recommendations, the latest technology and imaging, and risk factors. The text is supplemented with more than 200 images, many in color.

A Case Manager's Study Guide: Preparing for Certification, Fifth Edition is an essential study guide for case managers preparing to take the Certified Case Manager (CCM) exam offered by the Commission for Case Manager Certification (CCMC). Geriatric Neurology, Volume 167, serves as an update on the basic biological and behavioral mechanisms underlying the aging process, with an emphasis on neurological aging and state-of-the-art reviews on our understanding of vascular, cognitive, neurodegenerative and neuropsychiatric diseases in the elderly. Developed with an eye to providing both the basic underpinnings of age-related changes and the clinical information necessary to aid in diagnostics and treatment, the book serves as a useful volume for students, basic and translational scientists, and practicing clinicians on how to understand and treat common neurological disorders in the elderly. Reviews the foundations of geriatric neurology, including the fundamentals of age associated changes in molecular biology, altered pharmacokinetics and psychopharmacology that make drug therapy in the elderly different from younger patients Contains major advances in our understanding of neurodegenerative diseases Features contributions from world leaders in geriatric neurology—the broadest, most expert coverage available Developed for the International Association for Trauma Surgery and Intensive Care (IATISIC), the Manual of Definitive Surgical Trauma Care 5e is ideal for training all surgeons who encounter major surgical trauma on an infrequent basis. This new edition includes both an e-version, and also a microSD card containing over 20 operative videos. The increasing role of non-operative management (NOM) has been recognised, and the Military Module is substantially updated to reflect recent conflict experience. An expanded section highlights trauma management under austere conditions. Written by faculty who teach the DSTC Course, this definitive and well established book focuses on life-saving surgical techniques to use in challenging and unfamiliar incidents of trauma.

Gain the extra advantage on your ANP or FNP exam with an effective plan of action. Preparation and practice make perfect! The questions in the book and online parallel the domains and content areas of the actual exams. Each question has been carefully reviewed and updated by recent exam takers to ensure accuracy and revised to conform to the style and difficulty levels on the certification examinations. Answers and in-depth rationales at the end of each chapter advance your mastery and understanding.

This sixth edition of the Oxford Textbook of Palliative Medicine takes us now into the third decade for this definitive award-winning textbook. It has been rigorously updated to offer a truly global perspective, highlighting the best current evidence-based practices, and collective wisdom from more than 200 experts around the world. This leading textbook covers all the new and emerging topics, updated and restructured to reflect major developments in the increasingly widespread acceptance of palliative medicine as a fundamental public health need. The sixth edition includes new sections devoted to family and caregiver issues, cardio-respiratory symptoms and disorders, and genitourinary symptoms and disorders. In addition, the multi-disciplinary nature of palliative care is emphasized throughout the textbook, covering areas from ethical and communication issues, the treatment of symptoms, and the management of pain. The Oxford Textbook of Palliative Medicine is a truly comprehensive text. No hospital, hospice, palliative care service, or medical library should be without this essential source of information. This sixth edition of the Oxford Textbook of Palliative Medicine is dedicated to the memory of Professor Kenneth Fearon husband of Professor Marie Fallon and a surgeon who became a world leader in the research and management of anorexia and cachexia. He modeled a work-life balance that is so critical in our field, with devotion to both his patients and his family.

The clear, concise, and cutting-edge medical-surgical nursing content in Medical-Surgical Nursing: Concepts & Practice, 2nd Edition provides the solid foundation you need to pass the NCLEX Examination and succeed as a new nurse. It builds on the fundamentals of nursing and covers roles, settings, health care trends, all body systems and their disorders, emergency and disaster management, and mental health nursing. Written by noted authors Susan deWit and Candice Kumagai, Medical-Surgical Nursing reflects current national LPN/LVN standards with its emphasis on safety as well as complementary and alternative therapies.

Get the solid foundation you need to pass the NCLEX-PN® exam and succeed in practice! deWit's Medical-Surgical Nursing: Concepts and Practice, 4th Edition builds on the fundamentals of nursing with complete coverage of adult medical-surgical conditions, including roles, settings, health care trends, and all body systems and their disorders. It provides special attention to care of older adults, those with chronic illnesses, and residents in long-term care settings. Written by nursing educator Holly Stromberg, deWit's Medical-Surgical Nursing makes exam prep easier with NCLEX-PN® review questions, and reflects national LPN/LVN standards with an emphasis on evidence-based practice and patient safety. Safety alerts emphasize safety precautions to protect patients, family, health care providers, and the public from accidents, spread of disease, and medication-related accidents. Older Adult Care Points address the unique care issues of gerontologic nursing, and describe assessment and interventions for long-term care patients. Nursing care plans show plans of care based on patient history, including patient goals and outcomes, with critical thinking questions allowing you to assess your understanding of nursing care concepts. Assignment Considerations cover task delegation from the RN to the LPN/LVN and from the LPN/LVN to unlicensed assistive personnel, as allowed by each state's nurse practice act. Get Ready for the NCLEX® Examination! section at the end of each chapter covers key points and includes review questions to help you prepare for class tests and the NCLEX-PN examination. Focused Assessment boxes show how to collect patient data, including history, physical, and psychosocial assessment. Home Care Considerations focus on adapting medical-surgical nursing care to the home environment after discharge. Cultural Considerations promote understanding of various ethnic groups and sensitivity to differing beliefs and practices. Communication boxes help in developing therapeutic communication skills in realistic patient care situations. Patient Teaching boxes provide instructions and guidelines for educating patients on post-hospital care. Legal and Ethical Considerations describe legal issues and ethical dilemmas that may face the practicing nurse. Think Critically encourages you to synthesize information and apply concepts to practice. Nutrition Considerations emphasize the role nutrition plays in disease and nursing care. Medication tables provide quick access to dosages and side effects of commonly used medications. Key terms include phonetic pronunciations and text page references, making learning easier with terms listed at the beginning of each chapter, appearing in blue at first mention or where defined in the text, and defined in the glossary.

This book provides a comprehensive, practical, and timely guide to neurorehabilitation for patients affected by tumors of the central nervous system. These patients encounter various physical and psychosocial impairments, due to sensory-motor, psychological and cognitive limitations, as well as depression, anxiety and fatigue. These common tumor and treatment consequences reduce quality of life and produce long-term limitation in functioning and disability that may benefit from rehabilitative interventions. In the early stages of the disease, rehabilitation aims at restoring functioning after tumor treatment, while in the advanced stages, rehabilitation becomes an integral part of palliative care, which aims to increase patients' independence, to prevent complications and to improve quality of life. Based on an interdisciplinary approach, the book is structured in two main parts. The first is devoted to the basics of cancer and to the main clinical features of the tumors of the nervous system, as well to the essentials of therapeutic approaches. The second part is dedicated to rehabilitation issues, providing the tools for health personnel to take in charge persons affected by neuro-oncological disease. This unique volume is a valuable resource for all health professionals (physicians, psychologists, trainees nurses specialized in neuro-oncology, occupational therapists, physiotherapists, speech therapists) involved in the interdisciplinary management of individuals affected by tumors of the central nervous system.

Offering an authoritative overview of all infection management protocols currently utilized by infectious disease specialists, geriatricians, and infection control practitioners, this Second Edition examines current strategies to diagnose, treat, control, and prevent common infectious diseases in long-term care geriatric facilities. The definitive Oxford Textbook of Palliative Medicine, now in its fifth edition, has again been thoroughly updated to offer a truly global perspective in this field of extraordinary talent and thoughtfulness. Updated to include new sections devoted to assessment tools, care of patients with cancer, and the management of issues in the very young and the very old, this leading textbook covers all the new and emerging topics since its original publication in 1993. In addition, the multi-disciplinary nature of palliative care is emphasized throughout the book, covering areas from ethical and communication issues, the treatment of symptoms and the management of pain. This fifth edition of the Oxford Textbook of Palliative Medicine is dedicated to the memory of Professor Geoffrey Hanks, pioneer in the field of palliative medicine, and co-editor of the previous four editions. Winner in the Medicine category of the British Medical Association Book Awards, this is a truly comprehensive text, no hospital, hospice, palliative care service, or medical library should be without this essential source of information.

This practical guide aids clinicians in distinguishing the different dimensions of hand function such as impairment, disability, and handicap. New and updated chapters discuss cerebral palsy, sports injuries, robotics, and assistive technologies. Extensively revised, the book provides a broad overview of the basic principles and examination of hand function. It describes how to evaluate hand function in specific afflicted populations, including the rheumatoid patient, the stroke patient, the trauma patient, the geriatric patient, and the pediatric patient as well as special populations such as diabetes mellitus patients and musicians. It also includes an appendix of hand function scales essential to the assessment of disability. The Second Edition of Hand Function is an ideal resource for all rheumatologists, physiatrists, hand surgeons, orthopedists, occupational therapists, and physical therapists caring for patients with impaired hand function.

The definitive certification review for CVRN exam success! Mirroring the CVRN Certification exam blueprint in style and content, this is the most current and comprehensive review guide available. Written in adherence with the Commission on Accreditation in Physical Therapy Education's (CAPTE) standards, Clinical Education in Physical Therapy explores the evolution from student to Clinical Instructor while serving as an essential educational resource for entry-level Physical Therapy students. This exciting new resource presents an overview on the rewards and challenges of becoming a Clinical Instructor, the legal issues involved for the academic institution and the clinical sites, clinical education models, student characteristics, establishing a clinical education program, and much more! Clinical Education in Physical Therapy includes a dedicated chapter on leadership and professionalism both of which have been stressed in recent years by both the APTA and CAPTE. Key Points at the beginning of each chapter establish the primary take-aways for readers, while case studies in select chapters reinforce practical application of the material.

Fully revised to re flect the latest AOTA standards, Occupational Therapy Evaluation for Adults: A Pocket Guide, 2nd Edition is a quick, comprehensive reference to guide students and practitioners as they perform efficient evaluations of adults, identify problems, and plan and implement interventions to produce optimal therapeutic outcomes. Clinical examples illustrate the application of content, illustrations demonstrate assessment techniques, and extensive tables capture information in an easy-to-read manner. This completely revised and updated Second Edition covers a wide range of new assessments and tools for community-based practitioners, includes up-to-coverage of assessing clients in natural settings, and offers a strong focus on helping readers develop practical skills for the workplace.

Covering the scope, theory, and approaches to the practice of occupational therapy, Physical Dysfunction Practice Skills for the Occupational Therapy Assistant, 3rd Edition prepares you to care for adults who have physical disabilities. It takes a client-centered approach, following the latest OT Practice framework as it defines your role as an OTA in physical dysfunction practice. New to this edition is coverage of polytrauma, advances in prosthetics and assistive technologies, and assessment and interventions of traumatic brain injury problems related to cognitive and visual perception. Written by respected educator Mary Beth Early, Physical Dysfunction Practice Skills for the Occupational Therapy Assistant helps you develop skills in the assessment of client factors, intervention principles, and clinical reasoning. Case studies offer snapshots of real-life situations and solutions, with many threaded throughout an entire chapter. A client-centered approach allows you to include the client when making decisions about planning and treatment, using the terminology set forth by the 2008 Occupational Therapy Practice Framework. Evidence-based content includes clinical trials and outcome studies, especially those relating to intervention. Key terms, chapter outlines, and chapter objectives introduce the essential information in each chapter. Reading guide questions and summaries in each chapter make it easier to measure your comprehension of the material. Information on prevention is incorporated throughout the book, especially in the Habits on Health and Wellness chapter. Cultural diversity/sensitivity information helps you learn about the beliefs and customs of other cultures so you can provide appropriate care. An Evolve companion website reinforces learning with resources such as review questions, forms for practice, crossword puzzles, and other learning activities. New content on the latest advances in OT assessment and intervention includes prosthetics and assistive technologies, and updated assessment and interventions of TBI (traumatic brain injury) problems related to cognitive and visual perception.

Look no further for the book that provides the information essential for successful practice in the rapidly growing field of gerontological occupational therapy! Get Ready for the NCLEX®! review questions updated per the 2014 NCLEX-PN® test plan.

The articles appearing in this geriatrics-focused issue are consistent with the collaborative and translational concepts held by a life course perspective. Each supports interprofessional collaboration and some are either authored or coauthored by interdisciplinary colleagues. Three goals are reflected in these articles: keeping community-dwelling older adults safe, sensible, and secure with solutions that will enable them to stay healthy, wise, and aware. Topics include maintaining physical functions, benefits and consequences of weight-bearing exercise on foot health; cancer prevention; managing nocturia's effect on sleep quality and safety; protection from financial exploitation; and providing safe and affordable living environments. Several articles address physical or cognitive challenges that include monitoring medication adherence, threat of anxiety and stigma in dementia, and approaches to managing self-care in the home for persons with dementia. These evidence-based articles address emerging and best practices to support targeted interventions for persons in community-dwelling home settings. They provide a frame-work of person-centered approaches that foster good health in older age, a central tenet of aging in place and the global response to population aging.

Gain the nursing skills you need to provide wellness-based care for older adults! Ebersole and Hess' Gerontological Nursing & Healthy Aging, 6th Edition uses a holistic approach to describe compassionate care along a continuum of wellness. Designed to promote healthy aging regardless of the patient's situation or disorder, this text provides best-practice guidelines in covering physical, psychosocial, spiritual, and cognitive health. New to this edition are Next Generation NCLEX®-style case studies, updates on measuring clinical judgment, expanded coverage of core competencies, and more. Written by gerontological nursing experts Theris Touhy and Kathleen Jett, this concise text provides a solid foundation in every aspect of healthy aging. Focus on health and wellness provides the evidence-based information and strategies needed to promote healthy aging. Key concepts, learning activities, and discussion questions in every chapter emphasize the information needed to enhance care. Recommended competencies from the AACN and the Hartford Institute for Geriatric Nursing are integrated throughout. Discussion of disease processes is placed in the context of healthy adaptation, nursing support, and responsibilities. Easy-to-use information on nursing techniques and communication appears with the associated disorders, symptoms, and situations. Tips for Best Practice and Resources for Best Practice boxes provide insight into proven methods of nursing care. Discussions of nursing and interprofessional actions help students learn to enhance wellness, maintain optimal function, and prevent unnecessary disability. Coverage of age, cultural, racial, and gender differences highlights these important considerations in caring for older adults. NEW! Updates reflect the NCSBN Clinical Judgment Model. NEW! Next Generation NCLEX® (NGN)-style case studies provide optimal preparation for the Next Generation NCLEX Examination. NEW! Specialized information addresses the unique needs of older adults such as atypical disease presentation, geriatric syndromes, neurocognitive disorders, quality of life with chronic illness, legal and ethical issues, and mental health challenges such as depression and substance abuse. NEW! Coverage of competencies of expanding nursing roles in the care of older adults addresses the continuum of care. NEW! Gerontological expertise is incorporated into nursing actions and complements other nursing texts (including med-surg, community health, mental health, and assessment books) used in programs without a freestanding gerontological nursing course. NEW! Expanded content includes information on COPD guidelines, medication use and misuse, Alzheimer's Disease, wound care guidelines, diagnosis and treatment of sleep-disordered breathing, joint replacement, caregiver strain, hospice and transitional care, and more.

Gain a solid foundation in physical therapy for infants, children, and adolescents! Campbell's Physical Therapy for Children, 6th Edition provides essential information on pediatric physical therapy practice, management of children with musculoskeletal, neurological, and cardiopulmonary conditions, and special practice settings. Following the APTA's Guide to Physical Therapist Practice, this text describes how to assess and evaluate health problems, select evidence-based interventions, and help children improve their range of motion, flexibility, and strength. What also sets this book apart is its emphasis on clinical reasoning, decision making, and family-centered care. Written by a team of PT experts led by Robert J. Palisano, this book is ideal for use by students and by clinicians in daily practice. Comprehensive coverage provides a thorough understanding of foundational knowledge for pediatric physical therapy, including social determinants of health, development, motor control, and motor learning, as well as physical therapy management of pediatric disorders, including examination, evaluation, goal setting, the plan of care, and outcomes evaluation. Focus on the elements of patient/client management in the APTA's Guide to Physical Therapist Practice provides a framework for clinical decision making. Focus on the International Classification of Functioning, Disability, and Health (ICF) of the World Health Organization (WHO) provides a standard language and framework for the description of health and health-related states, including levels of a person's capacity and performance. Experienced, expert contributors help students prepare to become Board-Certified Pediatric Clinical Specialists and to succeed on the job. NEW! New chapter on social determinants of health and pediatric healthcare is added to this edition. NEW! New chapter on Down syndrome is added. NEW! 45 case scenarios in the eBook offer practice with clinical reasoning and decision making, and 123 video clips depict children's movements, examination procedures, and physical therapy interventions. NEW! An eBook version is included with print purchase, providing access to all the text, figures, and references, plus the ability to search, customize content, make notes and highlights, and have content read aloud.

This book clearly explains when and how different rehabilitation techniques should be applied in the aging patient, thereby enabling readers to identify and apply those rehabilitation strategies that will maximize quality of life and functional independence in individual cases. It is specifically designed for ease of consultation and rapid retrieval of the information most relevant to clinical practice. Prominence is given to the benefits of a multidisciplinary approach to rehabilitation, with discussion of a very wide range of aspects of rehabilitation in different disease settings. The breadth of coverage is illustrated by the attention paid to less commonly addressed topics such as visual and hearing rehabilitation, the role of robotics and 3D imaging techniques, variations in approach among health care systems, and rehabilitation in end-of-life care. The authors are international academic experts in their fields, guaranteeing a high scientific standard throughout. This manual will be an invaluable tool and source of knowledge for geriatricians and physiatrists but will also appeal to a wider range of clinicians, practitioners, and students.

DVD contains demonstration of basic stroke problems and corrections discussed in the book.

"CNS neuroprotection" was a common subject of papers, symposia, and reviews during the previous "decade of the brain." Indeed, in recent years, experimental study of putative neuroprotective agents prompted clinical trials of numerous drug candidates in acute and chronic human neurodegenerative conditions. While the outcomes of these trials have not been as successful as initially hoped, these were early explorations, and the pipeline of relevant ideas continues to grow in strength and depth. We predict that early in this new millennium, crippling disorders such as stroke and Alzheimer's disease will be treated effectively by therapeutic neuroprotective strategies. This volume of the Handbook of Experimental Pharmacology titled eNS Neuroprotection provides a pharmacological perspective on currently promising neuroprotective approaches, and a clinical perspective on the challenges involved in establishing the efficacy of these approaches through appropriate clinical trials. Section I, "Mechanistic Approaches to CNS Neuroprotection," reviews major injury mechanisms that have formed the basis for many past and present clinical trials conducted around the world. Dr. KIM and colleagues, Washington University School of Medicine, review the status of blocking excitotoxicity as an approach to CNS neuroprotection. Dr. WANG, Pfizer Global Research and Development, Ann Arbor Laboratories, outlines evidence supporting a contribution of apoptosis to pathological neuronal or glial cell loss. Drs. BECKER and HALLENBECK, University of Washington and the National Institute on Neurological Diseases and Stroke, respectively, argue that inhibiting inflammatory pathways in the brain can be neuroprotective.
