Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The financial crisis of 2007/2008 prompted governments across Europe to adopt austerity measures aimed at the reduction of their escalating budget deficits. Higher Education in Austerity Europe explores how the resulting cuts in public expenditure - together with the increasing reliance on the privatisation of services - have impacted on higher education directly through the reduction of public sector provision and indirectly as a result of the social and political consequences of that reduction. Moreover, it explores how the effects of these economic policies have differed markedly across the national regions of Europe, with the result that inequality has increased significantly both within and between national regions, and this, in turn, has led to social and political dislocation within and across communities. It is only by viewing higher education within this broader context that we can begin to understand the full implications of the austerity measures introduced over the last ten years. Jon Nixon draws together leading scholars to delve into the complexity of impact and response generated by these measures. Part 1 focuses on cross-European perspectives; Part 2 on the impact of austerity measures within national systems; and Part 3 on new perspectives and possibilities. The volume also includes considered responses from 'outsiders' by academics located in Asia, Australia, and the USA, providing an additional dimension to the analysis. As well as analysing the full impact of austerity measures across some of the worst hit national regions of Europe, the contributors also identifying openings and possibilities for renewal.

credit analyst for the past 15 years. Although I had been reading corporate financial statements every day for 15 years, I still look at financial statements only when I buy stocks since quitting my full-time job. Now, I want to read financial statements. Japanese people are not too familiar with buying stocks. It's probably not a part of daily life for the average American to buy stocks, though when they work, many companies will provide 401K and the government will provide IRA for people who don't have full-time jobs. In Japan, we pay for a national pension and employee pension plan, but it's not stock. As the number of children is decreasing, many people do not pay for those. If you work for companies as a full-time employee, the money for the employee pension plan will be deducted from your salary. Other than that, it's not always necessary to pay for national pension although those who do not will receive less money when they retire. The U.S. economy is the best in the world, so Japanese stocks will fluctuate in accordance with U.S. stocks, but U.S. stocks are definitely stronger than their Japanese counterparts. How do organizations structure themselves? A synthesis of the empirical literature in the field, supported by numerous examples and illustrations, provides images that produce a theory. The author introduces five basic configurations of structure - the simple structure, the machine bureaucracy, the professional bureaucracy, the divisionalized form, and the adhocracy. This book reveals that structure seems to be at the root of many questions about organizations and why they function as they do.

“ A final book like no other ” from the Nobel Prize – winning author of *The Tin Drum*: poetry and meditations on writing, aging, and living until the end (*The Irish Times*). In spite of the trials of old age, and with the end in sight, Günter Grass weaves his life ’ s reflections together into a witty and elegiac swansong: love letters, soliloquies, jealous musings, social satire, and moments of happiness long to be shared. As the inimitable German fabulist lives his remaining days, his passion for writing spurs in him new life. His final work is a creation filled with wisdom and defiance. In a striking interplay of poetry, lyric prose, and drawings, this diverse assemblage is a moving farewell gift—a sensual, melancholy summation of a life fully lived. “ Elegant musings on dying and, most poignantly, living. ” —Kirkus Reviews “ A glorious gift, a final salute true to the singular creativity of the most human, and humane, of artists. ” —The Irish Times “ A thoughtful, uncompromising meditation on death and aging . . . He describes loss, change, and memory with a combination of melancholy and wit. ” —Publishers Weekly

*Garrison - Your guide through the challenging waters of managerial accounting. For centuries, the lighthouse has stood as a beacon of guidance for mariners at sea. More than an aid to navigation, the lighthouse symbolizes safety, permanence, reliability, and the comforts of the familiar. For this reason, we have chosen to illustrate the Canadian eighth edition of Managerial Accounting by Garrison, Chesley, Carroll and Webb with an image that encapsulates the greatest strengths of this market leading text. Managerial Accounting 8ce focuses, now as in the past, on three qualities: Relevance, Balance and Clarity. The authors' steady focus on these core elements has led to tremendous results! As seafarers look to the lighthouse for direction along unfamiliar shore, so too can Garrison act as a compass for students seeking to master this course. Available to help instruct students in solving all assignment material. Each chapter also contains one set of papers that can be used for either the A or B problem sets.*
