A popular version of history trumpets the United States as a diverse "nation of immigrants," welcome to all. The truth, however, is that local

communities have a long history of ambivalence toward new arrivals and minorities. Persistent patterns of segregation by race and income still exist in housing and schools, along with a growing emphasis on rapid

more diverse than ever and economic inequality increases.

Two recent trends compel new attention to these issues. First, the geography of race and class represents a crucial litmus test for the new "regionalism"—the

the linked fortunes of cities and

but disappeared as a major
social policy issue over the past
two decades. This timely book
shows how unequal housing

development create an unequal geography of opportunity. It emerges from a project sponsored by the Civil Rights Project at Harvard University in collaboration with the Joint

and how we can respond, taking
a hard look at both successes
and failures of the past. Place
still matters, perhaps more than
ever. High levels of segregation
shape education and job
opportunity, crime and insecurity,

prospects. These problems
cannot be addressed effectively
if society assumes that
