This comprehensive, illustrated maneuvers manual is an excellent learning and teaching aid for instructors and students, covering all the flight maneuvers required for Private, Sport, Commercial, and Flight Instructor certification. This is the version intended specifically for high-wing type airplanes. Each maneuver is depicted in detail according to type of aircraft in which the lesson will take place, states the objective of the task, and lists the practical test standards required. Fully illustrated with fold-out pages that show each maneuver complete on a large, one-page spread, allowing the reader to absorb all the visual and textual information together and all at once. Compact and easy to carry, with spiral binding for easy access to the fold-out pages. The illustrated fold-outs show each maneuver step-by-step, so pilots understand what they should be looking for outside the cockpit window. Included are suggested checklists for everything from preflight to takeoffs and landings, performance, and checkrides, and an easy-to-use index so pilots can quickly refer to any desired task. The latest FAA practical test and/or airman certification standards, regulations, and procedures for high-wing-type aircraft have also been incorporated into the new edition.

The Avidyne IFD5540, IFD540, and IFD440 GPS/NAV/COMs bring a new level of capability to general aviation GPS navigation. Now every pilot can have an airline-quality flight management system in his or her aircraft, reducing workload and increasing instrument capabilities. There is a revolution sweeping through general aviation. In less than two years, the industry has converted to ship all new aircraft with glass cockpits, rather than traditional instrument panels. The most popular of these is the Garmin G1000, and now there's a comprehensive guide describing how to operate these airplanes: Max Trescott's G1000 Glass Cockpit Handbook. This book makes it easy for you to quickly become an expert on operating and programming the G1000 system in any aircraft. Instructors agree that the cockpit is not an ideal learning environment. Reading this book, written by a Master Flight Instructor, is one of the most efficient and cost effective ways to learn the G1000 before stepping into the cockpit for your first transition lesson.
