Bushcraft involves the use of specialized skills and knowledge to survive in an outdoor situation, especially in the wild. And this is why this book, *Bushcraft Survival Guide*, was written to help you uncover all you need to know about bushcraft and its survival mechanism for thriving in the wild, irrespective of the nature of the circumstances you encounter. Below is a snippet of what you will learn in this guide:

- Practicing bushcraft and survival mindset: You will discover how to find the best places to practice bushcraft, including how to build a tough survival mindset if you want to make it out of the woods alive.
- Bushcraft tools and equipment: You will be educated on the essential tools and equipment needed to survive in the woods, which cuts across shelter and sleeping kit, carrying kit, cooking and water, personal hygiene, and clothing.
- Surviving in the bush: Everything you need to know to thrive in the woods is discussed here. - Wilderness survival mistakes: The common wilderness survival mistakes to avoid before you journey into the bush are discussed in this section. And a whole lot more! Do all these sound interesting to you? Yes? Navigational Problems
I have been using Garmin GPS devices for decades, but when I bought my Garmin fenix 5x I was overwhelmed by its complexity.

The fenix does dozens of things but there are only 5 buttons to make it operate. As I do in such situations, I tried to find a book that would describe all of the fenix capabilities and how to make them work. I couldn't find any - except for one in German. So I decided to research and experiment with the fenix 5x and write down what I found. This book is the result. This book describes the fenix user interface in great detail. It also describes the fenix 5x "system" which includes the Garmin Connect app for your cell phone, the Garmin Express app for your computer, the Garmin Connect on-line app and, finally, how to use Garmin BaseCamp to plan activities that will be accomplished using the fenix 5x. It is impossible to fit everything the fenix can do into one small book. All of the examples used throughout this book are based on the Hike activity. I believe that the Running and Cycling activities will operate identically to the Hike activity. But there is nothing in this book about using the fenix for Golf nor for Swimming nor for using Exercise Equipment. Even so, what is in this book will provide a good background no matter what activity you wish to pursue.

Find a job. Get hired. Get paid. No CFI? No problem! Becoming a competitive candidate for low time flying jobs and successfully navigating the next 1,000 hours of your career requires knowledge and a set of soft and hard skills that commercial pilot training programs omit from their "teach-to-the-test" curriculum. The Pilot's Guide To Low Time Flying Jobs fills these holes and aids low time commercial pilots in all aspects of bridging the tedious gap between their commercial checkride and the 1,500 hour ATP milestone. This guide will teach you:

- How to overcome the obstacles to employment you face as a low time pilot
- What jobs are available, their minimum experience requirements, typical schedule, compensation, applicable regulations and flight techniques
- Where to search for jobs, as well as a list of nearly 70, non-CFI, low time pilot employers across the US to whom you can apply
- Networking techniques, with real examples of successful strategies that you can replicate
- How to create the most effective pilot-specific resume and cover letter, with samples of each
- The most critical information to study when preparing to begin a new job or fly a new aircraft, as well as the most effective methods of self-studying
- Professional pilot techniques, tips, and knowledge, including flight planning considerations, performance and weather so that you can take your airmanship to the next level
- How to deal with the seldom-discussed but most significant challenges faced by professional pilots, including external pressure imposed by employers and crew members, imposter syndrome, and mental health

Corporate jet pilot and flight instructor Michael Carlini has condensed 10 years and 2,000 flight hours of experience into a few hundred pages that can be consumed in a matter of hours, giving you a detailed, actionable, and proven guide to getting hired as a low time commercial pilot.
