This is a book and audio CD offering study and reference support for the Spanish GCSE course, as well as being useful for GCSE examinations and Scottish Standard Grade.

This book provides a comprehensive overview of the current and emerging challenges of cyber criminology, victimization and profiling. It is a compilation of the outcomes of the collaboration between practitioners in the cyber criminology field, IT law and security field. As Governments, corporations, security firms, and individuals look to tomorrow's cyber security challenges, this book provides experts and forward-thinking analysts at a time when the debate over how we plan for the cyber-security of the future has become a major concern. Many criminological perspectives define crime and material characteristics, and view crimes as taking place at a specific geographic location. This definition has allowed crime to be characterised, and crime prevention, mapping and measurement to specific target audiences. However, this characterisation cannot be carried over to cybercrime, because the environment in which such crime is committed cannot be pinpointed to a geographic social or cultural groups. Due to the rapid changes in technology, cyber criminals' behaviour has become dynamic, making it necessary to reclassify the typology being currently used. Essentially, cyber behaviour is evolving over time as they learn from their actions and others' experiences, and enhance their skills. The offender signature, which is a repetitive ritualistic behaviour that offenders use at the crime scene, provides law enforcement agencies an appropriate profiling tool and offers investigators the opportunity to understand the motivations that perpetrate such crimes. This has helped researchers identify a perpetrator being sought. This book offers readers insights into the psychology of cyber criminals, and understanding and analysing their motives and the methodologies they adopt. With an understanding of these behaviours, researchers, governments and practitioners can take effective measures to tackle cybercrime and reduce victimization.

Written by examiners and practising teachers, this work offers study and homework support throughout GCSE. It is useful as a reference source, a lesson back-up and as a revision guide.
