Lucha Libre, the Mexican art of wrestling, has made its way to Southern California in the form of the Luchadores Five, a gang unlike any other. Their mission is to clean up the East Los Angeles community they live in. But despite their best attempts to get rid of crime in their hometown, "The Unfabulous 5," as they are sometimes known, are regularly arrested by the police, roughed up by a myriad of other gangs, including Werewolves and angry Frenchmen, and ridiculed by the public and their loved ones. It is within this rich Lucha Libre universe, with all its eccentric yet lovable characters, that the social issues of today are addressed in imaginative and hysterical ways.

Covers all models of Chevrolet/GMC 1/2, 3/4 and 1-ton Pick-Ups and Suburban, Blazer and Jimmy; 2 and 4 wheel drive, including diesel engines.

The ability to move from the ordinary into an altered state of consciousness is one of the most valuable skills in both magic and religion. From the ceremonial magician to the shaman, using trance work to explore inner realms is essential to the magical process of healing, transcendence, and wisdom desired throughout diverse occult and spiritual traditions. Trance-Portation offers a comprehensive and multi-spirited way to enter the inner realm. Blending the modern world with the ancient arts, Trance-Portation's first three chapters, Travel Planning, Crossing the Threshold, and Getting Started, offer preparatory suggestions including meditations and relaxations, breathing, warding, shifting gears, and returning. Drawing on examples from varied traditions, from Western Mystery to Native American, Ancient Celtic to Eastern Mysticism, and peppered with folk lore and tales from popular science fiction stories, Trance-Portation explores spiritual journey work extensively, offering readers the chance to find their own ways into the inner realm, encounter their own guides and fellow travelers, and create divine relationships with the deities and gods and goddesses that they meet.

This irresistible book is about: a father; his five-year-old son, Michael (intelligent, crafty, addicted to stories); Michael's best friend Stefan (stalwart listener, equally addicted to stories); and, well—what else?—a story. Oh, and a wolf. It is as Michael always demands: a Wolf Story, which begins one night at bedtime and spins wildly on through subsequent bedtimes and Sunday outings to the beach and park in a succession of ever more trickily tantalizing episodes. Waldo the wolf is sneaking up on Rainbow the hen, when Jimmy Tractorwheel, the son of the local farmer, comes along. After that,

there's no knowing what will happen next, as while stalled in traffic jams or nodding off at night, the boys chime in and the story races on and Waldo finds, if not necessarily dinner, his just desserts. First published in 1947 and wonderfully illustrated by Warren Chappell, William McCleery's *Wolf Story* is a delicious treat for fathers and sons and daughters and mothers alike.

Unfabulous Five

This is NOT your father's home repair book! And it's not your husband's, your brother's, your boyfriend's, or the guy's next door. Dare to Repair is a do-it-herself book for every woman who would rather be self-reliant than rely on a super or contractor. No matter the depth of your pockets or the size of your home, a toilet will get clogged, a circuit breaker will trip, and a smoke detector will stop working. It's up to you how you'll deal with them -- live in denial, pay the piper, or get real and do it yourself. Dare to Repair demystifies these home repairs by providing information that other books leave out. In Dare to Repair, you'll learn how to: Take the plunge -- from fixing a leaky faucet to cleaning the gutters. Lighten up -- from removing a broken light bulb to installing a dimmer switch. Keep your cool -- from maintaining a refrigerator's gasket to changing the rotation of a ceiling fan. Get a handle on it -- from replacing a doorknob to repairing a broken window. Play it safe -- from planning a fire escape route to installing a smoke detector. Filled with detailed illustrations, Dare to Repair provides even the most repair-challenged woman with the ability to successfully fix things around the home. Once you start, you won't want to stop.

In The Two Cars the celebrated husband and wife team of Ingri and Edgar Parin d'Aulaire, famous for their illustrated versions of Norse and Greek myths, offer young children a playful modern twist on the ancient fable of the tortoise and the hare. Two cars sit side by side in the same garage. One is fast, shiny, and ready to go; the other is a comfortable old jalopy, a little worse for wear but as reliable as can be. On a magic moonlit night, the doors of the garage swing open and they head out for a spin, each determined to prove that he is the "best car on the road." Over hill and dale and roundabout they go, encountering—and narrowly missing—trains, trucks, wildlife, and even, in the form of a policeman on a

motorcycle, the long arm of the law. Before the two cars' nocturnal caper is over, each will have discovered the being the "best" is not so simple as you might suppose.

Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscillosopes, and scan tools are

discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, *The Hack Mechanic Guide to European Automotive Electrical Systems* will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles.

How to get good with money, even if you have no idea where to start. *The Financial Diet* is the personal finance book for people who don't care about personal finance. Whether you're in need of an overspending detox, buried under student debt, or just trying to figure out how to live on an entry-level salary, *The Financial Diet* gives you tools to make a budget, understand investments, and deal with your credit. Chelsea Fagan has tapped a range of experts to help you make the best choices for you, but she also knows that being smarter with money isn't just about what you put in the bank. It's about everything—from the clothes you put in your closet, to your financial relationship habits, to the food you put in your kitchen (instead of ordering in again). So *The Financial Diet* gives you the tools to negotiate a raise and the perfect cocktail recipe to celebrate your new salary. *The Financial Diet* will teach you:

- how to get good with money in a year.
- the ingredients everyone needs to have a budget-friendly kitchen.
- how to talk about awkward money stuff with your friends.
- the best way to make (and stick to!) a budget.
- how to take care of your house like a grown-up.
- what the hell it means to invest (and how you can do it).
