*Flanagan shows that this orthodoxy enriches a small elite of activists, politicians, administrators, and well-connected entrepreneurs, while bringing further misery to the very people it is supposed to help. Controversial and thought-provoking, First Nations? Second Thoughts dissects the prevailing ideology that determines public policy towards Canada's aboriginal peoples.*

*Now in its fourth edition, Family Matters offers an enriched discussion on a variety of substantive issues experienced by diverse Canadian families across the life course. Adopting a feminist sociological approach throughout, this popular textbook explores family dynamics through a critical life course theoretical lens. This over-arching perspective is used to examine how social, economic, and historical processes related to gender roles, age and generational location, ethnicity and race, geographical location, and social change shape contemporary family life. As a leading name in sociology, Barbara Mitchell has thoroughly updated the previous edition to reflect timely current events, recent census data, and cutting-edge research. Providing more detailed and nuanced discussions of many areas including life course and other styles of critical theorizing on families, this new edition examines the history of slavery and Black family life in Canada, Indigenous families, foreign/temporary workers, intersectional and racialized processes influencing families, youth activism, transgender children, technology and social media, and the impact of the COVID-19 pandemic on aging families. Approachable, concise, and filled with discussion questions, activities, and resources for further reading, Family Matters is the perfect resource for students enrolled in introductory or advanced level courses in family sociology and gender studies. FEATURES - Up-to-date material featuring current events, recent research studies and statistics, including census and other national data sets - New and expanded content on a wide range of timely topics, such as Indigenous and racialized family life, transgender children, technology and social media, and the effects of the COVID-19 pandemic*

*"Thinking Government: Public Administration and Politics in Canada, fourth edition, is a comprehensive introduction to public administration and public sector management. This book places Canadian government and public administration within its political context and covers such important topics as the institutions of the federal government, financial and human resources management, and accountability and responsibility. Fully updated throughout, Thinking Government, fourth edition, is perfect for Canadian public administration courses."*--

*Over time, male homosexuality and effeminacy have become indelibly associated, sometimes even synonymous. In Faeries, Bears, and Leathermen, Peter Hennen contends that this stigma of effeminacy exerts a powerful influence on gay subcultures. Through a comparative ethnographic analysis of three communities, Hennen explores the surprising ways that conventional masculinity is being collectively challenged, subverted, or perpetuated in contemporary gay male culture. Hennen's colorful study focuses on a trio of groups: the Radical Faeries, who parody effeminacy by playfully embracing it, donning prom dresses and glitter; the Bears, who strive to appear like "regular guys" and celebrate their larger, hairier bodies; and the Leathermen, who emulate hypermasculine biker culture, simultaneously paying homage to and undermining notions of manliness. Along with a historical analysis of the association between effeminacy and homosexuality, Hennen examines how this connection affects the groups' sexual practices. Ultimately, he argues, while all three groups adopt innovative approaches to gender issues and sexual pleasure, masculine norms continue to constrain members of*

**This is a collection of bold and visionary scholarship that reveals an insightful exposition of re-visioning African development from African perspectives. It provides educators, policy makers, social workers, non-governmental agencies, and development agencies with an interdisciplinary conceptual base that can effectively guide them in planning and implementing programs for socio-economic development in Africa. The book provides up-to-date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa (politics, democracy, education, gender, technology, global relationships and the role of non-governmental organisations). The authors challenge the familiar paradigms in order to show how imperfectly, if at all, assumptions about globalisation and development theories have failed in their depictions and applications to Africa. The scholars in this volume both inform and advocate for a re-visioning of perceptions on Africa and how it navigates global processes.**

**Health Policy in Canada explores the process, implementation, and outcomes of health policy in the Canadian context. This engaging text provides students with a solid foundation in the key theories and developments in health policy, while also delivering illustrative examples and case studies from across the country. Employing a strong comparative and international perspective, Toba Bryant critically compares the Canadian system to alternative models in countries such as the United States, Sweden, and the United Kingdom. With its focus on the themes of health equity and the social determinants of health, this text takes into account the role of public policy not only in providing health care, but also in shaping the health and well-**

**being of a population. The second edition has been well updated to reflect current research and issues, including a consideration of the impact of economic globalization on health policy and health care in Canada. Featuring critical thinking questions and annotated lists of recommended readings and websites, this text was developed with the intent of making health policy accessible to students and practitioners in a wide range of disciplines, including nursing, social work, medicine, health sciences, and public policy.**

**Canadian Parties in Transition examines the transformation of party politics in Canada and the possible shape the party system might take in the near future. With chapters written by an outstanding team of political scientists, the book presents a multi-faceted image of party dynamics, electoral behaviour, political marketing, and representative democracy. The fourth edition has been thoroughly updated and includes fifteen new chapters and several new contributors. The new material covers topics such as the return to power of the Liberal Party, voting politics in Quebec, women in Canadian political parties, political campaigning, digital party politics, and municipal party politics.**

*Ethical Issues: Perspectives for Canadians is a collection of readings designed to introduce students to a number of important topics, including our obligations toward the environment, the treatment of non-human animals, abortion, assisted reproduction, end of life decision-making, freedom of expression, war, multiculturalism, and more. Readings have been carefully selected to represent a broad array of perspectives and arguments. Relevant legislation, court cases, and other non-philosophical works complement the writings of professional philosophers to provide students with multiple approaches to the issues. Brief introductions and discussion*

questions are provided for each reading, and a general introduction to the basic ethical theories is included.

The Second Edition of this popular text examines the mass media as economic and cultural institutions that shape our social identities.

Social policy shapes the daily lives of every Canadian citizen and should reflect the beliefs of a majority of Canadians on just approaches to the promotion of health, safety, and well-being. Too often, those on the front lines—social workers, nurses, and teachers—observe that policies do not work well for the most vulnerable groups in society. In the first part of this new edition of *Canadian Social Policy*, Westhues and Wharf argue that service deliverers have discretion in how policies are implemented, and the exercise of this discretion is how citizens experience policy—whether or not it is fair and reasonable. They show the reader how social policy is made and they encourage active citizenship to produce policies that are more socially just. New material includes an examination of the reproduction of systemic racism through the implementation of human rights policy and a comparative analysis of the policy-making process in Quebec and English Canada. The second part of the book discusses policy issues currently under debate in Canada. Included are new chapters that explore parental leave policies and housing as a determinant of health. All chapters contain newly updated statistical data and research and policy analysis. A reworked section on the process of policy-making and the addition of questions for critical reflection enhance the suitability of the book as a core resource in social policy courses. The final chapter explores how front-line workers in the human services can advocate for change in organizational policies that will benefit the people supported.

For many people, newspapers are a key source of information on many topics, including issues related to gender and sexuality. Applying a broad range of corpus linguistic methods,

Transgender Identities in the Press critically explores the linguistic cues and patterns used by the print media in their representation of trans people. Through close analysis of a corpus of articles collected from English-language newspapers from the UK and Canada, Angela Zottola focuses on the semantic categories of representation associated with transgender identities. Exploring a set of key terms, this book examines the semantic prosody and the language choices that each term is invested with, using Critical Discourse Analysis to investigate how the way the press represents this topic influences readers and their understanding of the major debates. Using a mixture of quantitative and qualitative methods, Transgender Identities in the Press casts light on the complex picture of press language during a period of social change and increasing awareness. Highlighting both efforts to represent this community in an inclusive and non-discriminatory way and areas where there is need for improvement, this book illustrates a variety of issues from a critical and social perspective.

Over the last thirty years Canadian policy on aboriginal issues has come to be dominated by an ideology that sees aboriginal peoples as "nations" entitled to specific rights. Indians and Inuit now enjoy legal privileges that include the inherent right to self-government, collective property rights, immunity from taxation, hunting and fishing rights without legal limits, and free housing, education, and medical care. Underpinning these privileges is what Tom Flanagan describes as "aboriginal orthodoxy" - the belief that prior residence in North America is an entitlement to special treatment. Flanagan shows that this orthodoxy enriches a small elite of activists, politicians, administrators, and well-connected entrepreneurs, while bringing further misery to the very people it is supposed to help. Controversial and thought-provoking, First Nations? Second Thoughts dissects the prevailing ideology that determines public policy towards Canada's aboriginal peoples. Flanagan analyzes the developments of the last ten years, showing how a conflict of visions has led to a stalemate in aboriginal policy-making. He concludes that aboriginal success will be achieved not as the result of public policy changes in government but through the actions of the people themselves.

This, the fourth edition of Women in Canada, documents and traces many of these changes by presenting relevant statistical series from Statistics Canada and other sources. This report is intended to paint a comprehensive portrait of the female population. It includes many indicators describing women's income, housing, health, education, employment, family life, and criminal victimization. Most of these indicators are compared with those of men to provide some measure

of women's progress, or lack of progress, in achieving greater equality in these areas. Health Promotion in Canada is a comprehensive profile of the history, current status, and future of health promotion in Canada. This fourth edition maintains the critical approach of the previous three editions but provides a current and in-depth analysis of theory, practice, policy, and research in Canada in relation to recent innovative approaches in health promotion. Thoroughly updated with 15 new chapters and all-new learning objectives, the edited collection contains contributions by prominent Canadian academics, researchers, and practitioners as well as an afterword by Ronald Labonté. The authors cover a broad range of topics including inequities in health, Indigenous communities and immigrants, mental health, violence against women, global ecological change, and globalization. The book also provides critical reflections on practice and concrete Canadian examples that bring theory to life.

New Perspectives on Theory, Practice, Policy, and Research

Contesting Bodies and Nation in Canadian History

The announcement that we had decoded the human genome in 2000 ushered in a new and unique era in biomedical research and clinical medicine. This Third Edition of Principles of Gender-Specific Medicine focuses, as in the past two editions, on the essentials of sexual dimorphism in human physiology and pathophysiology, but emphasizes the latest information about molecular biology and genomic science in a variety of disciplines. Thus, this edition is a departure from the previous two; the editor solicited individual manuscripts from innovative scientists in a variety of fields rather than the traditional arrangement of sections devoted to the various subspecialties of medicine edited by section chiefs. Wherever it was available, these authors incorporated the latest information about the impact of the genome and the elements that modify its expression on human physiology and illness. All chapters progress translationally from basic science to the clinical applications of gender-specific therapy and suggest the most important topics for future investigation. This book is essential reading for all biomedical investigators and medical educators involved in gender-specific medicine. It will also be useful for primary care practitioners who need information about the importance of sex and gender in the prevention, diagnosis and treatment of illness. Outlines sex-specific differences in normal human

function and explains the impact of age, hormones, and environment on the incidence and outcome of illness Reflects the latest information about the molecular basis of the sexual dimorphism in human physiology and the experience of disease Reviews the implications of our ever-improving ability to describe the genetic basis of vulnerability to disease and our capacity to alter the genome itself Illustrates the importance of new NIH guidelines that urge the inclusion of sex as a variable in research protocols

Recognized as the definitive reference, this handbook brings together leading experts from multiple psychological subdisciplines to examine one of today's most dynamic areas of research. Coverage encompasses the biological and neuroscientific underpinnings of emotions, as well as developmental, social and personality, cognitive, and clinical perspectives. The volume probes how people understand, experience, express, and perceive affective phenomena and explores connections to behavior and health across the lifespan. Concluding chapters present cutting-edge work on a range of specific emotions. Illustrations include 10 color plates. New to This Edition \*Chapters on the mechanisms, processes, and influences that contribute to emotions (such as genetics, the brain, neuroendocrine processes, language, the senses of taste and smell). \*Chapters on emotion in adolescence and older age, and in neurodegenerative dementias. \*Chapters on facial expressions and emotional body language. \*Chapters on stress, health, gratitude, love, and empathy. \*Many new authors and topics; extensively revised with the latest theoretical and methodological innovations. A Choice Outstanding Academic Title

A consistent bestseller since its publication in 2000, Changing Politics of Canadian Social Policy is a one-of-a-kind resource in the fields of political science and social work. Examining current conditions affecting the development of social policies in Canada, this book offers in-depth critical analysis of how these policies first arose and the implications they pose for future policy development. This new edition of Changing Politics of Canadian Social Policy features updated chapters while retaining the first edition's analytical focus on economic globalization, societal pluralization, and social protection. The authors offer fresh considerations of gender relations and families, community agencies and the voluntary sector, as well as the social policy activities of all levels of government in the Canadian federation. Changing Politics of Canadian Social Policy will continue to provide the much-needed groundwork for students and policymakers, as well as propose real solutions for the future. In this first collection on the history of the body in Canada, an interdisciplinary group of scholars explores the multiple ways the body has served as a site of contestation in Canadian history in the nineteenth and twentieth centuries.

## Trans Activism in Canada An Historical Sociological Approach

### Rethinking Society in the 21st Century, Fourth Edition

Over the last thirty years Canadian policy on aboriginal issues has come to be dominated by an ideology that sees aboriginal peoples as "nations" entitled to specific rights. Indians and Inuit now enjoy legal privileges that include the inherent right to self-government, collective property rights, immunity from taxation, hunting and fishing rights without legal limits, and free housing, education, and medical care. Underpinning these privileges is what Tom Flanagan describes as "aboriginal orthodoxy" - the belief that prior residence in North America is an entitlement to special treatment.

Centring the voices and experiences of trans identified people as experts on their own lives and agents of change, *Trans Activism in Canada* opens up a dialogue between scholars and community members in an effort to improve the lives of sex and gender variant people. The first of its kind, this anthology brings together activists and allies to examine the various strategies and forms of resistance needed to transform oppression into opportunity for change. Reflecting upon the challenges trans communities face and offering insight into achieving institutional reform, the themes addressed range from poverty and isolation to health care and best practices. Using personal narratives, archival material, and qualitative research, as well as case- and community-based research, this text demonstrates the leading role of trans and two-spirit activists in generating social change. By drawing on feminist, anti-racist, and social justice frameworks, the contributors approach oppression and activism as inseparable from hetero-patriarchal, colonialist, and capitalist power relations. Written for trans activists, scholars, and allies, *Trans Activism in Canada* is poised to enrich transgender theorizing by focusing on concrete experiences and practical knowledge gained from the everyday lives of trans people.

\*\*\*\* The third edition (1986) is cited in BCL3. Introduces theoretical systems--Aboriginal theory, narrative, hypnosis, constructivism, and empowerment theory--and examines the full range of therapeutic approaches, including psychoanalysis, ego psychology, cognitive, crisis intervention, client-centered theory, feminist theory and meditation. The style and content of the chapters are practice-oriented, concentrate on the use of systems in a practical context, and, together with detailed descriptions of each theoretical system, explore their real-world implementation. *Rethinking Society in the 21st Century* is a critical collection of readings that provides students with a foundational knowledge base in sociology. The fourth edition has been thoroughly updated to include significant Canadian content, with a greater focus on indigeneity, gender, and sexuality and a new section dedicated to social movements, social change, and emerging fields. This anthology introduces students to the fundamental elements of sociology with a balance of classical theory—Marx, Weber, Durkheim, Mills—and more contemporary approaches found in the works of Michel Foucault and Dorothy Smith. Building on this theoretical grounding, the text outlines core concepts in sociology as well as major social institutions such as families, the economy and labour, education, health care, and media. Covering a wide breadth of topics, including chapters on animals, the environment, crime, trans issues, class, ethnicity, and race, this new edition explores critical debates in Canadian society with an emphasis on intersectional approaches to social inequalities. This volume is rich with pedagogical features that promote critical understanding, including detailed introductions that speak to the contextual history of the source material and discussion questions for each section. Uniquely designed for introductory courses, *Rethinking Society in the 21st*

Century is the ideal reader for Canadian students of sociology.

Transgender Identities in the Press

Third Edition

The fourth edition of *Dying and Death in Canada* explores how the intensely personal experience of dying and death is shaped by society and culture, with new discussions of MAID and COVID-19.

The fourth edition of this widely used text includes updates about the many changes that have occurred in Canadian foreign policy under Stephen Harper and the Conservatives between 2006 and 2015. Subjects discussed include the fading emphasis on internationalism, the rise of a new foreign policy agenda that is increasingly shaped by domestic political imperatives, and the changing organization of Canada's foreign policy bureaucracy. As in previous editions, this volume analyzes the deeply political context of how foreign policy is made in Canada. Taking a broad historical perspective, Kim Nossal, Stéphane Roussel, and Stéphane Paquin provide readers with the key foundations for the study of Canadian foreign policy. They argue that foreign policy is forged in the nexus of politics at three levels – the global, the domestic, and the governmental – and that to understand how and why Canadian foreign policy looks the way it does, one must look at the interplay of all three.

Noted for its fair and equal coverage of men and women, *Psychology of Gender* reviews the research and issues surrounding gender from multiple perspectives, including psychology, sociology, anthropology, and public health. Going far beyond discussions of biological sex and gender identity, the text explores the roles that society has assigned to females and males and the other variables that co-occur with sex, such as status and gender-related traits. The implications of social roles, status, and gender-related traits for relationships and health are also examined. The text begins with a discussion of the nature of gender and development of gender roles, before reviewing communication and interaction styles and how they impact our friendships and romantic relationships. It concludes with an exploration of how gender influences both physical and mental health. New to the 6th Edition: Emphasis on the intersectionality of gender, considering it as a part of wider social categories such as race, ethnicity, social class, and gender identity Recognition of the increasingly prevalent view that gender is nonbinary Extended coverage of LGBTQ individuals, their relationships, and their health Expanded discussions of key issues including gender-role strain, gender fluidity, women and STEM, parenthood, balancing family and work demands, online communication, and sexual harassment Accompanied by a comprehensive companion website featuring resources for students and instructors, alongside extensive student learning features throughout the book, *Psychology of Gender* is an essential read for all students of gender from psychology, women's studies, gender studies, sociology, and anthropology.

Confederation may have established Canada's nationhood in 1867, but the relationships framing Canada's modern existence go back much further. Employing a unique socio-historical perspective, *Canadian Society in the Twenty-First Century* examines three formative relationships that have shaped the country: Canada and Quebec, Canada and the United States, and Canada and Indigenous nations. Now in its fourth edition, this engaging text offers students an overview of Canadian society through a series of connections rather than a collection of statistics. Trevor W. Harrison and John W. Friesen weave together complex aspects of the nation's economic, political, and socio-cultural development. They guide readers to use this interdisciplinary framework to consider some of the tough questions that Canada is likely to face in adjusting to demands and challenges in the next few decades. Reflecting the most current scholarship in the field, this revised edition features new discussions on issues such as the current crisis of neo-liberal globalization, Canada's petroleum industry, global warming, the Wet'suwet'en dispute in 2020, and the COVID-19 pandemic. Exploring the unique character of Canada today, this text is a vibrant resource for sociology courses on Canadian society as well as courses in Canadian studies and Canadian history.

An Introduction to Family Sociology in Canada

***Family Patterns, Gender Relations is a reader featuring a mix of classic and contemporary readings from Canada, the US, and the UK, designed to introduce second- and third-year sociology students to the key issues in family studies today.***

***This classic and invaluable reference handbook, written for sex researchers and their students, has now been completely revised in a new, fourth edition. It remains the only easy and efficient way for researchers to learn about, evaluate, and compare instruments that have previously been used in sex research.***

***How can we understand gender in the contemporary world? What psychological differences now exist between women and men? How are masculinities and femininities made? And what is the relationship between gender issues and globalizing concerns such as environmental change and economic restructuring? Raewyn Connell, one of the world's leading scholars in the field, is here joined by Rebecca Pearse as they answer these questions and more. Their book provides a readable introduction to modern gender studies, covering empirical research from all parts of the world in addition to theory and politics. As well as introducing the field, Gender provides a powerful contemporary framework for gender analysis with a strong and distinctive global awareness.***

**Highlighting the multi-dimensional character of gender relations, the authors show how to link personal life with large-scale organizational structures and how gender politics changes its form in changing situations. The third edition of this influential and accessible book includes a whole new chapter on ecofeminism, environmental justice and sustainability. It also brings the review of research up to date throughout and explains new debates and emerging gender theories. Gender is engaged scholarship that moves from personal experience to global problems and offers a unique perspective on gender issues today.**

**Spanning more than two hundred years of history, from the eighteenth century to the twenty-first, *Sisters or Strangers?* explores the complex lives of immigrant, ethnic, and racialized women in Canada. Among the themes examined in this new edition are the intersection of race, crime, and justice, the creation of white settler societies, letters and oral histories, domestic labour, the body, political activism, food studies, gender and ethnic identity, and trauma, violence, and memory. The second edition of this influential essay collection expands its chronological and conceptual scope with fifteen new essays that reflect the latest cutting-edge research in Canadian women's history. Introductions to each thematic section include discussion questions and suggestions for further reading, making the book an even more valuable classroom resource than before.**

Given the recent and rapid changes to migration patterns and citizenship processes, this volume provides a timely, compelling, empirical and theoretical study of the gendered implications of such developments. More specifically, it draws out the multiple connections between migration and citizenship concerns and practices for women. The collection features original research that examines women's diverse im/migrant and refugee experiences and exposes how gender ideologies and practices organize migrant citizenship, in its various dimensions, at the local, national and transnational levels. The volume contributes to theoretical debates on gender, migration and citizenship and provides new insights into their interrelation. It includes rich case studies that range from the Philippines and Somalia to the Caribbean and from Australasia to Canada and Britain. Designed to have a multidisciplinary

appeal, it is suitable for courses on migration, diversity, gender, race, ethnicity, law and public policy, comparative politics and international relations.

The objective of this new edition is the same as that of previous editions: to help students understand social policy from a Canadian perspective, and to stir them to discussion and debate. Part One provides a general overview of social policy and Part Two discusses the policy-making processes, from the international factors that influence them to the ways in which a social worker can become part of this process. Part Three focuses on current social policy issues, and Part Four offers a look to the future. Each chapter of this best-selling book has been thoroughly updated for this new edition with regard to current policy, debated issues, and resources cited. Three new chapters have been added, including an overview of adult mental health policy and a critical look at risk assessment in child welfare. There is also a discussion of current challenges to the Charter of Rights and Canadians increasing use of the justice system to shape social policy. As a result, the reader gains an informed perspective of policy development and evaluation. Although designed primarily for use by social workers, the book will benefit anyone who is involved in the policy-making process.

Rather than view social inequality as a problem for marginalized populations, *Power and Everyday Practices* turns the spotlight on the ways power and privilege are produced and reproduced in our everyday worlds

This book critically examines research on the controversial topic of sex differences in cognitive abilities, with the aim of understanding where sex differences are found and where they are not. It can be used as a textbook, and also informs parents, teachers, and policymakers about the ways in the sexes are different and similar.

*In Canada, women's bodies are often at the centre of debates about religious pluralism,*

*multiculturalism, and secularism. Women have long played a critical role in building and maintaining diasporic religious communities and networks, and they have also been catalysts for change and transformation within religious groups and the wider community. Relation and Resistance explores the stories and lives of racialized women connected with religious diaspora communities in Canada. Contributors from across disciplines show how women are conceptualizing traditions in transformative ways, challenging prevailing assumptions about diasporic religion as nostalgically entrenched in the past. The collected essays include chapters on feminist and queer women thinking critically about Hindu and Muslim identities and beliefs and challenging anti-Black racism and settler colonialism; Afro-Caribbean and Métis writers using literature to explore religion and belonging; the impact of women's participation in Japanese, Chinese, and Pakistani transnational religious organizations; and marriage, migration, and gender equality in the Punjabi Sikh and Malayali Christian communities. The volume closes with a chapter exploring Métis diasporic experience and inviting readers to think critically about diasporic religion on Indigenous land. An innovative and timely volume, Relation and Resistance reveals that a deeper understanding of women's experiences of displacement, migration, race, and gender is critical to the study of religion in Canada.*

*This fully revised and updated edition includes twelve new chapters on contemporary topics such as ecological democracy, Native studies, inquiry teaching, and Islamophobia. The Social Studies Curriculum, Fourth Edition updates the definitive overview of the issues teachers face when creating learning experiences for students in social studies. The book connects the diverse elements of the social studies curriculum—civic, global, social issues—offering a unique and critical perspective that separates it from other texts. Completely updated, this book includes twelve new chapters on the history of the social studies; democratic social studies; citizenship education; anarchist inspired transformative social studies; patriotism; ecological democracy; Native studies; inquiry teaching; Islamophobia; capitalism and class struggle; gender, sex, sexuality, and youth experiences in school; and critical media literacy. All the chapters from the previous edition have been thoroughly revised and updated, including those on teaching social studies in the age of curriculum standardization and high-stakes testing, critical multicultural social studies, prejudice and racism, assessment, and teaching democracy. Readers are encouraged to reconsider their assumptions and understanding about the origins, purposes, nature, and possibilities of the social studies curriculum.*
