By far, the most comprehensive and detailed coverage of pediatric neuropsychology available in a single book today, Davis provides coverage of basic principles of pediatric neuropsychology, but overall the work highlights applications to daily practice and special problems encountered by the pediatric neuropsychologist. Cecil R. Reynolds, PhD Texas A&M University "The breadth and depth of this body of work is impressive. Chapters written by some of the best researchers and authors in the field of pediatric neuropsychology address every possible perspective on brain-behavior relationships culminating in an encyclopedic text. This [book] reflects how far and wide pediatric neuropsychology has come in the past 20 years and the promise of how far it will go in the next." Elaine Fletcher-Janzen, EdD, NCSP, ABPdN The Chicago School of Professional Psychology "...it would be hard to imagine a clinical situation in pediatric neuropsychology in which this book would fail as a valuable resource."--Archives of Clinical Neuropsychology "I believe there is much to recommend this hefty volume. It is a solid reference that I can see appreciating as a resource as I update my training bibliography."--Journal of the International Neuropsychological Society This landmark reference covers all aspects of pediatric neuropsychology from a research-based

perspective, while presenting an applied focus with practical suggestions and guidelines for clinical practice. Useful both as a training manual for graduate students and as a comprehensive reference for experienced practitioners, it is an essential resource for those dealing with a pediatric population. This handbook provides an extensive overview of the most common medical conditions that neuropsychologists encounter while dealing with pediatric populations. It also discusses school-based issues such as special education law, consulting with school staff, and reintegrating children back into mainstream schools. It contains over 100 well-respected authors who are leading researchers in their respective fields. Additionally, each of the 95 chapters includes an up-to-date review of available research, resulting in the most comprehensive text on pediatric neuropsychology available in a single volume. Key Features: Provides thorough information on understanding functional neuroanatomy and development, and on using functional neuroimaging Highlights clinical practice issues, such as legal and ethical decision-making, dealing with child abuse and neglect, and working with school staff Describes a variety of professional issues that neuropsychologists must confront during their daily practice, such as ethics, multiculturalism, child abuse, forensics, and psychopharmacology

Help underserved high-potential students claim their right to an education that addresses their unique needs. In gifted education, an important and contentious issue that has yet to be sufficiently addressed is the systemic underrepresentation of gifted students who have been discriminated against in school-based gifted and advanced learner programs because of their race, ethnicity, gender identity, sexual orientation, socioeconomic status, or other realities. Empowering Underrepresented Gifted Students gives a voice to those students and brings their stories into focus. With chapters written by student and expert scholars who specialize in addressing the structural inequity and educational inequality in gifted and advanced learner programs, Empowering Underrepresented Gifted Students recommends practices and strategies for helping underserved high-potential students claim their right to an education that addresses their unique needs. Each chapter has key takeaways and discussion questions, providing a built-in book study guide to prepare educators to engage students in conversation and to help develop their self-advocacy skills. Coeditors Dr. Joy Lawson Davis and Deb Douglas have brought together the voices of experts and students to help educators move closer to ensuring equity, access, and excellence in gifted education. By arming historically marginalized gifted students with self-advocacy strategies, these remarkable students will be
