Geographers is an annual collection of studies on individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world, and include famous names as well as those less well known, including explorers, independent thinkers and scholars. Each paper describes the geographer's education, life and work and discusses their influence and spread of academic ideas. Each study includes a select bibliography and a brief chronology. The work includes a general index, and a cumulative index of geographers listed in volumes published to date. Published under the auspices of the International Geographical Union.

This volume provides specialized insights into selected Mediterranean geographies, such as info-communication technologies, tourism, urbanization and climate change threats, with a focus on emerging and often overlooked issues, in light of the impact of current trends of globalization and the financial crisis, in the broader context of contemporary world processes of environmental change and accelerated human mobility. Specifically, the book contains sections on emergent and increasingly significant or highly innovative issues specific to the Mediterranean, often providing alternative perspectives on various pressing issues, such as the northward shift of climatic types; littoralisation processes and urbanization trends; tourism growth problems; human exposure to environmental stresses; and the boom in info-communication technologies. As such this book provides new insights into a region that has absorbed the sustained impact of human growth in precarious environments, often at the interface of many worlds, co-existing at various states of development and inter-scalar or cross-border interrelationships. This volume does not cover every aspect of the human and physical geographies of the Mediterranean region, but rather addresses contemporary issues of increasing significance to the Mediterranean, with an emphasis on emergent and pressing issues, as well as new perspectives or methods of approach, of special relevance to the Mediterranean. The core of contributions to this volume originated from an initiative undertaken by the International Geographical Union (IGU) Mediterranean Renaissance Program, now the Commission on the Mediterranean Basin (COMB). Most papers are authored by members of the latter Commission and additional papers are included, in order to cover more aspects of contemporary Mediterranean geographies.

This book addresses the problems of Latin America, through two of the most important features of the post-Bretton Woods economic order, large corporations and weak financial markets. In turn, it shows that their impact on economic growth and development is feeble and short-lived. This resulted in income concentration and an extremely unequal distribution of wealth in the region.

Este libro tiene el objetivo de analizar las alternativas de política pública necesarias para la preservación de la salud de la población, la

reactivación de la economía y la definición de un marco institucional que facilite las relaciones entre individuos en un contexto pospandémico, mediante un enfoque multidimensional. En ese sentido, se analizan los antecedentes de las pandemias de carácter universal, el rol de las organizaciones internacionales, el papel de los bienes públicos globales, los modelos de gobernanza global desde un contexto glocal, las tendencias en investigación acerca de pandemias y sostenibilidad, los nuevos retos del Estado, el financiamiento de las pequeñas y medianas empresas, los incentivos fiscales a la innovación en inteligencia artificial y la utilidad de los modelos matemáticos para la toma de decisiones de política pública. De esta manera, se presenta un análisis ordenado de los retos que enfrenta la sociedad en la actualidad, con su explicación y atención mediante alternativas de acción pública. Por lo tanto, es una guía sobre el rol y la capacidad que deben desarrollar coordinadamente los funcionarios nacionales, junto a las organizaciones internacionales, para influir la definición de políticas que reorganicen el equilibrio mundial.

Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to "Europeanize" the world. From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from "mare nostrum" to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

O livro "Geografia e Relações Internacionais: Estudos sobre a América do Sul e o Brasil", organizado pelos pesquisadores Elói Martins Senhoras, Claudete de Castro Silva Vitte e André Santos da Rocha, trata-se da quinquagésima quinta obra didática da Coleção "Comunicação & Políticas Públicas", a qual objetiva estimular o desenvolvimento de pesquisas com a correspondente publicização dos conhecimentos científicos. Organizada com objetivos claramente didáticos, assim preenchendo uma lacuna bibliográfica, esta obra possibilitará aos leitores refletirem sobre o emergente campo de Geografia das Relações Internacionais por meio de oito eixos de discussão: 1) Descaminhos da cooperação de segurança coletiva na América do Sul; 2) Hidrovia Paraguai-Paraná: dimensões geopolíticas e desafios para sua viabilidade; 3) A terra é novo ouro: geopolítica dos alimentos, conflitos por terras e principais atores envolvidos na América do Sul; 4) Geopolítica ambiental em questão: reflexões sobre os incêndios florestais amazônicos de 2019; 5) Novos rumos da Petrobrás: entre a maldição dos recursos naturais e a ameaça à soberania energética nacional; 6) Acordos bilaterais referentes a núcleos urbanos na fronteira brasileira entre 2002 e 2017; 7) Aporte de investimentos externos diretos da República Popular da China no Brasil (2007-2017); e, 8) Relações comerciais e o avanço dos investimentos diretos chineses no Brasil.

The major role played by a technocratic elite in Chilean politics was perhaps most controversial when the "Chicago Boys" ran the economic program of Augusto Pinochet's military regime from 1973 to 1990. But technocrats did not suddenly come upon the scene when Pinochet engineered the coup against Salvador Allende's government. They had long been important contributors to Chile's approach to the challenges of economic development. In this book, political scientist and historian Patricio Silva examines their part in the story of twentieth-century Chile. Even before industrialization had begun in Chile, the impact of positivism and the idea of "scientific government" gained favor with Chilean intellectuals in the late nineteenth century. The technocrats who emerged from this background became the main architects designing the industrial policies of the state through the Ibáñez government (1927-31), the state-led industrialization project of the late 1930s and 1940s, the Frei and Allende administrations, Pinochet's dictatorship, and the return to democracy from the Aylwin administration to the present. Thus, contrary to the popular belief inspired by the dominance of the Chicago Boys, technocrats have not only been the tools of authoritarian leaders but have also been important players in sustaining democratic rule. As Silva shows, technocratic ideology in Chile has been quite compatible with the interests and demands of the large middle classes, who have always defended meritocratic values and educational achievements above the privileges provided by social backgrounds. And for most of the twentieth century, technocrats have provided a kind of buffer zone between contending political forces, thereby facilitating the functioning of Chilean democracy in the past and the present.

Este libro es un homenaje al Profesor Francisco Quirós Linares con motivo de su jubilación como Catedrático de la Universidad de Oviedo. Su edición es una iniciativa del Departamento de Geografía a la que se han sumado los Departamentos de Historia e Historia del Arte, el Decanato de la Facultad de Geografía e Historia y la propia Universidad de Oviedo. Recoge una selección de trabajos del profesor Quirós, que corresponden a distintas épocas (el más antiguo fue publicado por primera vez en 1960 y el último en 2004), y versan sobre una temática geográfica variada, constituyendo por ambas razones una muestra significativa de su labor investigadora que ya ha alcanzado el medio siglo de andadura
