Are you sitting the new 9 to 1 GCSE examinations and wish to achieve good grades? Are you overwhelmed by the new syllabus and the workload? Do you need some useful and reliable guidance from a student who has nailed the exams? This book has been written by a teenager, like you. Having achieved seven 9s, three A*s and one A in his GCSEs, the author has shared his revision style to help many other teenagers to realise their potential. In his book, Rohan has outlined his tried and tested methods to achieve the best grades. There is step by step guide on planning, making a

timetable, and revision techniques leading up to the GCSE exams. There are separate chapters for subject-specific advice as the same technique cannot work for subjects like English and Chemistry. There are tips on how to stay motivated and also relax and enjoy at the same time. Smart working rather than a lot of working helps. Read this book and arm yourself with studying techniques which will help you not only in your GCSEs but all future exams.

Grading is one of the most hotly debated topics in education, and grading practices themselves are largely based on tradition, instinct, or personal history or philosophy. But to be effective, grading policies and practices must be based on trustworthy research evidence. Enter this book: a review of 100-plus years of grading research that presents the broadest

and most comprehensive summary of research on grading and reporting available to date, with clear takeaways for learning and teaching. Edited by Thomas R. Guskey and Susan M. Brookhart, this indispensable guide features thoughtful, thorough dives into the research from a distinguished team of scholars, geared to a broad range of stakeholders, including teachers, school leaders, policymakers, and researchers. Each chapter addresses a different area of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice. Ultimately, Guskey and Brookhart identify four themes emerging from the research that can guide these efforts: - Start with clear learning goals, - Focus on the feedback function of grades, - Limit the number of grade categories,

and - Provide multiple grades that reflect product, process, and progress criteria. By distilling the vast body of research evidence into meaningful, actionable findings and strategies, this book is the jump-start all stakeholders need to build a better understanding of what works—and where to go from here.

declared a so-called Criminal Tribe by the British. They were forced to steal or beg for food, money and clothes. As a Sansi, he lived on the outermost fringes of the society being an untouchable. With the British ruling India and the iron-clad caste system firmly in place, he could not have anticipated much more than herding other peoples buffaloes for a living. But by sheer chance, little Nathu was admitted to the local government school. And it changed his life forever. However, the immense struggle that lay ahead of him was only just beginning. This is the story of Nathus incredible journey toward becoming Natha Singh, respected school teacher. The story, told in his own voice, relies on his stupendous memory to recall even minor incidents in his long and eventful life. Filled with

descriptions and anecdotes, it paints many unforgettable scenes, and the narration tinged with a dry sense of humour makes for delightful reading. This inspiring and moving saga of courage, perseverance, and sterling integrity is rich in personal, historical and sociological detail. Natha Singhs lifelong fight, for dignity and against the cruel caste system, is all too relevant in 21st century India. C.K. Meena Author & Columnist
