his neighbor Geppetto drops by looking for a piece of wood to build a marionette. Antonio gives the block to Geppetto. And thus begins the life of Pinocchio, the puppet that turns into a boy. Pinocchio, The Tale of a Puppet is a novel for children by Carlo Collodi is about the mischievous adventures of Pinocchio, an animated marionette, and his poor father and woodcarver Geppetto. It is considered a classic of children's literature and has spawned many derivative works of art. But this is not the story we've seen in film but the original version full of harrowing adventures faced by Pinnocchio. It includes 40 illustrations.

The CLEAR curriculum, developed by University of Virginia's National Research Center on the Gifted and Talented, is an evidence-based teaching model that emphasizes Challenge Leading to Engagement, Achievement, and Results. In Fiction and Nonfiction: Language Arts Units for Gifted Students in Grade 4, students will read and analyze short stories and write their own short story in the fiction unit. In the nonfiction unit, students will study nonfiction (and creative nonfiction) texts to examine how writers use many of the same devices to tell nonfiction stories. Students will read a variety of texts and will write their own memoir. These units focus on critical literacy skills including reading diverse content, understanding texts as reflections of culture, and finding bias in fiction and nonfiction.

A coloring book to familiarize the user with the Primary elements in the Periodic Table. The Periodic Table Coloring Book (PTCB) was received worldwide with acclaim. It is based on solid, proven concepts. By creating a foundation that is applicable to all science ("Oh yes, Hydrogen, I remember coloring it, part of water, it is also used as a fuel; I wonder how I could apply this to the vehicle engine

I am studying...") and creating enjoyable memories associated with the elements science becomes accepted. These students will be interested in chemistry, engineering and other technical areas and will understand why those are important because they have colored those elements and what those elements do in a non-threatening environment earlier in life.
