Strategic Business Analysis shows students how to carry out a strategic analysis of a business, with clear guidelines on where and how to apply the core strategic techniques and models that are the integral tools of strategic management. The authors identify the key questions in strategic analysis and provide an understandable framework for answering these questions. Several case studies are used to focus understanding and enable a more thorough analysis of the concepts and issues, especially useful for students involved with case study analysis. Accompanying the text is a CD-Rom containing the models, tutorial guidance, and a PowerPoint presentation. A blank template is provided for each model, enabling students to actively interact and enter their own data - an effective 'what if...' facility. This will enable students to appreciate the limitations as well as the advantages of the strategic models.

Global business management issues and concerns are complex, diverse, changing, and often intractable. Industry actors and policy makers alike rely upon partnerships and alliances for developing and growing sustainable business organizations and ventures. As a result, global business leaders must be well-versed in managing and leading multidimensional human relationships and business networks (requiring skill and expertise in conducting the negotiation processes that these entail. After laying out a foundation justifying the importance of studying negotiation in a global context, this book will detail conventional and contemporary theories regarding international engagement, culture, cultural difference, and cross-cultural interaction, with particular focus on their influence on negotiation. Building on these elements, the book will provide a broad array of country-specific chapters, each describing and analyzing the negotiation culture of businesspeople in a different country around the world. Finally, the book will look ahead, with the eye towards identifying and anticipating new trends and developments in the field of global negotiation. This text will appeal to scholars and researchers in international business, cross-cultural studies, and conflict management who seek to understand the challenges of intercultural communication and negotiation. It will provide trainers and consultants with the insights they need to prepare their clients for intercultural negotiation. Finally, the text will appeal to businesspeople who find themselves heading out to engage with counterparts in another country, or operating in other multinational environments on a regular basis.

'Toward a Better Future' provides a comprehensive analysis of education development in Singapore since 1965, giving particular attention to the strategic management that has enabled Singapore to transform its education and training system from one similar to that of many Sub-Saharan African countries four decades ago into one of the world's best-performing systems. It is one of a pair of concurrently-published books presenting materials originally developed for a 2006 study tour to Singapore and Vietnam for senior education officials from Cameroon, Ethiopia, Ghana, Lesotho, Madagascar, and Mozambique. The second book, 'An African Exploration of the East Asian Education Experience', presents five country studies, as well as regional, comparative analyses highlighting insights gained during the study tour and putting them in the context of Sub-Saharan Africa. Together, the two books aim to foster knowledge exchange between Sub-Saharan African and East Asian countries on good practices in the design and implementation of education policies and programs. By facilitating the cross-country fertilization of ideas between two regions with relatively limited contact in the past, these books fill a clear gap in the current literature on development practice in education.

This book celebrates the contributions of David B. Audretsch, Distinguished Professor at the School of Public and Environment Affairs (SPEA) at Indiana University (USA), co-founder and co-editor of Small Business Economics, and former Director of the Entrepreneurship, Growth and Public Policy Group at the erstwhile Max Planck Institute of Economics (Jena, Germany).

For his pioneering work, which explores the links between entrepreneurship, government policy, innovation, economic development, and global competitiveness, he has received the 2001 Global Award for Entrepreneurship Research from the Swedish Foundation for Small Business Research and the 2011 Schumpeter Prize from the University of Wuppertal (Germany). This volume features original contributions from over 50 leading scholars to map, analyze and evaluate the impact of Audretsch's research on a broad spectrum of research fields, ranging from economics to entrepreneurship and geography. The development and evolution of key ideas which have significantly shaped theory and future research across these fields are also explored.

A concise but thorough review of essential concepts and techniques. The Cavusgil/Knight/Riesenberger author team's new textbook A Framework of International Business concentrates on new realities in international business, emerging markets, and small and medium-sized enterprises.

GLOBAL STRATEGY is the first textbook of its kind specifically written for the Capstone Management course for International Business programs and Strategic Management courses with a global emphasis. While the few other available international strategy texts focus on how to manage larger, multinational enterprises, Mike Peng's GLOBAL STRATEGY, Second Edition, offers several new perspectives. These include (1) a broadened definition of global strategy; comprehensive and innovative coverage; in-depth and consistent explanations of cutting-edge research; and an interesting and accessible way to engage students. The text uses the strategy tripod--analyzing strategy from the industry-, institution-, and resource-based views--to answer the question: What determines the success or failure of firms around the globe? Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Mike Peng and Klaus Meyer have direct, first-hand, experience of researching and teaching in Europe, Asia and North America. This combined experience makes them uniquely qualified to write this textbook, which offers a comprehensive and accessible introduction to international business that starts from Europe but ultimately encompasses the globe. The text's comprehensive coverage is accessibly arranged around one central question and two core perspectives. The central question is a what determines the success and failure of firms around the globe? Institutional and resource-based perspectives are utilised to answer this question. Throughout the text the very latest scholarly research is used to facilitate successful learning of the key concepts, in order to engage students with the historical context and recent global developments. International Business has been shortlisted for the 2011/12 CMI Management Book of the Year award in the ebook category. More information about the CMI and the competition can be found here <http://yearbook.managers.org.uk/index5.htm>.

The limited number of global or international strategy textbooks almost exclusively focuses on how to manage larger, multinational enterprises (MNEs), which primarily come from and compete in developed economies. While MNEs are important, such a focus ignores the fact (1) that many smaller, entrepreneurial firms have also aggressively internationalized recently and (2) that MNEs often have to compete in emerging economies, which increasingly nurture strong local competitors. Most mainstream strategic management textbooks, while seeming to address the hot theme of globalization, contain only one chapter on international strategy. Finally, most international business textbooks do have a section (containing several chapters) on international strategy. However, they always carry a wider coverage of major business functions such as marketing, operations, finance, and accounting, making them unwieldy. GLOBAL STRATEGY is written to offer a number of new perspectives. These include (1) a broadened definition of global strategy, (2) a comprehensive and innovative coverage, (3) an in-depth and consistent explanation of cutting-edge research, and (4) an interesting and accessible way to engage students. In this book, global strategy is defined not as MNE strategy only, but as strategy around the globe. Most global strategy and international business textbooks take the perspective of the foreign entrant, typically the MNE, often dealing with issues such as how to enter foreign markets. Important as these issues are, they only cover one side of international business, namely, the foreign side. The other side, naturally, is how domestic firms compete against each other and against foreign entrants. Failing to understand the other side, at best, captures only one side of the coin.

The Hundred-Year Marathon

The Multilingual Reality of Global Business Expansion

A Framework of International Business

Introduction to Global Business: Understanding the International Environment & Global Business Functions

Global BusinessCengage Learning

One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise -- and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, The Hundred-Year Marathon reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders -- as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped -- sometimes

frivolously and sometimes deliberately -- to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. The Hundred-Year Marathon is a wake-up call as we face the greatest national security challenge of the twenty-first century.

For many years to come this volume... is surely going to be the ultimate reference work on international business... thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, International Business Review Multinational Enterprises and the Global Economy has become a classic in international business... Yet, the book's second edition is even better than the first, in part because of Professor Dunning's wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour... In addition to being a remarkably useful reference book, Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, Journal of International Business Studies The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent.

Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese

This guide will walk you through five definitive moves that will improve business competitiveness! Why? Because you will learn about your organizations current position in the market place, and you will deeply explore the inner workflows and processes of your organization. This will then allow you to discover an untapped treasure trove of valuable data on your resources and capabilities that has not yet been realized or fully exploited, and if you're planning a pivot of your organization, or any part of it, your plan, in effect your strategy, is going to be akin to working blind, without the priceless data yielded in these five moves. In fact this strategic model will be extremely useful for any entity planning on pivoting and implementing competitive change, to their status quo. Five moves to checkmate is essential for leaders at all levels, and in all organizations and businesses that seek to attain, or retain their competitive advantage. Five moves to checkmate will also assist University and college educators, as well as students wishing to develop their business knowledge and acumen in strategic studies. What you will learn in 'Five Moves To Checkmate' is the importance of making sure you gather all the relevant external and internal data available to you. This data will then be categorized and deposited into well-known and proven strategic templates. Once these strategic templates are completed, the fifth move will connect all the data into a well known and widely used master strategic guide. This guide will be highly valuable in aiding your organization to successfully implement a strategic plan, maximizing your competitive advantage and winning your checkmate.

The Business Reference Guide series is designed to provide a solid foundation for the research of various business topics.

The book aims to analyse and evaluate the strategic positioning of China's participation in terms of firm-level performance in the generation of infrastructure capacity in African countries. Africa counts among its development challenges a major bottleneck of infrastructure capacity and shortage of investable capital. China's long period of high growth generates the strengths to secure availability of energy from Africa by enhancing infrastructure provision for the region. To achieve this complementary macro-level development, beyond the traditional dimension of infrastructure provision (ODA), Chinese IMNEs become the vectors on the intersection of these processes. Thus this research makes practical and analytical contributions to international business studies and development issues by making concrete the analysis of bilateral development processes from a macro context to a micro level framework (e.g. focusing on ICT and construction sectors), then fitting this into the real world story. Infrastructure itself is a key element for potential investment and development processes. Therefore, how IMNEs achieve not only exist simply in a way of a commercial-oriented investment, but also in their implications for development and political related issues.

This handbook takes a three-part approach that helps to understand and chart scholarship in the discipline of International Business (IB). The chapters in part 1 briefly discuss the scholarly landscape in IB, identify new ways of advancing the current literature, and highlight some ways in which to do so. The chapters in part 2 discuss current topics IB scholars should focus on, how to understand them, the challenges involved, and the role of interdisciplinary outreach. The chapters in part 3 discuss IB's broader societal role along several dimensions of relevance to scholars and practitioners. IB researchers, management scholars, and practitioners can use this book to enhance their current knowledge and nurture new ideas based on the chapters written by some of the world's leading experts.

The Past, Present and Future of International Business and Management

International Business in the 21st Century

A Reader

This book will provide empirical evidence of blunders committed by firms from small developing countries that operate in developed country markets. It will identify lessons that managers who are looking to do business in international markets can learn in order to lessen the mistakes in markets that are psychically distant.

Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the 'Reverse Perspective.' The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics
