We live in a world that is increasingly difficult to understand. It is not just changing; it is metamorphosing. Change implies that some things change but other things remain the same capitalism changes, but some aspects of capitalism remain as they always were. Metamorphosis implies a much more radical transformation in which the old certainties of modern society are falling away and something quite new is emerging. To grasp this metamorphosis of the world it is necessary to explore the new beginnings, to focus on what is emerging from the old and seek to grasp future structures and norms in the turmoil of the present. Take climate change: much of the debate about climate change has focused on whether or not it is really happening, and if it is, what we can do to stop or contain it. But this emphasis on solutions blinds us to the fact that climate change is an agent of metamorphosis. It has already altered our way of being in the world the way we live in the world, think about the world and seek to act upon the world through our actions and politics. Rising sea levels are creating new landscapes of inequality drawing new world maps whose key lines are not traditional boundaries between nation-states but elevations above sea level. It is creating an entirely different way of conceptualizing the world and our chances of survival within it. The theory of metamorphosis goes beyond theory of world risk society: it is not about the negative side effects of goods but the positive side effects of bads. They produce normative horizons of common goods and propel us beyond the national frame towards a cosmopolitan outlook.

Organized thematically around important questions in comparative politics, Introducing Comparative Politics, Fourth Edition by Stephen Orvis and Carol Ann Drogus integrates a set of extended case studies of 11 core countries into the narrative. Serving as touchstones, the cases are set in chapters where they make the most sense topically—not separated from theory or in a separate volume—and vividly illustrate issues in cross-national context. The book's organization allows instructors flexibility and gives students a more accurate sense of comparative study. In this edition, a brand new chapter on Contentious Politics covers ethnic fragmentation, social movements, civil war, revolutions, and political violence. New case studies on this topic include the Occupy and Tea Party movements in the US; Zapatista rebellion in Mexico; Boko Haram in Nigeria; and revolutions in China and Iran. The chapter on States and Identity has been substantially revised to better introduce students to the concept of identity and how countries handle identity-based demands. Case studies include nationalism in Germany; ethnicity in Nigeria; religion in India; race in the US; gender in Iran; and sexual orientation in Brazil. Content on states and markets.

International Studies for the 21st Century

*In 2020, COVID-19 starkly demonstrated the global interconnectedness of business, as it disrupted supply chains and manufacturing operations, broadly shuttered retail stores, and led to restrictions on movement and travel around the world. Other events in 2019 also showcased the undeniable globalization of business, be it from the (un)expected ramifications of Brexit to the impacts of data breaches across various industries. Riots in Hong Kong over an extradition bill also sparked huge debate and controversy, and the U.S.-China trade war also caused concern. All of these events may have largely and immediately impacted one region, yet effects reverberate across larger swathes of the globe—ultimately affecting vast areas, industries, and sectors across the international landscape. Issues in Global Business explores all of these and more, across a wide range of topics, including the on-demand economy, global manufacturing, Bitcoin, data security, and many more. Coupled with a comprehensive overview of the business landscape around the world by Dr. Mamoun Benmamoun, an assistant professor at the Boeing Institute of International Business at Saint Louis University, this book*

*provides students with the essential information they need to assess business practices through an international lens.*

Hobbs address many of the different fields that constitute international studies—geography, politics, economics, sociology, and anthropology—and give instructors a starting point from which they can pursue their own disciplinary interests. By integrating research and current examples, the Third Edition encourages you to identify your role in today's international arena and what it means to be a global citizen. Not only do you develop a better understanding of the world, you also receive advice on how to increase your own global engagement through study abroad, internships, and career options. This Third Edition is thoroughly updated to reflect recent events and trends, including cyberterrorism, the rise of ISIS, and other key issues. It offers new color maps and clear learning objectives for every chapter, giving students a solid understanding of the complexity of the issues facing the world today.*

*Students love good stories. That is why case studies are such a powerful way to engage students while teaching them about concepts Fundamental to the study of international relations. In Cases in International Relations, Glenn Haseldt, Vaughn P. Shannon, and Donna L. Lybecker help students understand the context of headlining events in the international arena. Organized into three main parts—military, economic, and human security—the book's fifteen cases examine enduring and emerging issues from the longstanding Arab-Israeli conflict to the rapidly changing field of cyber-security. Compatible with a variety of theoretical perspectives, the cases consider a dispute's origins, issue development, and resolution so that readers see the underlying dynamics of state behavior and can try their hand at applying theory.*

*The challenge of teaching international studies is to help students think coherently about the multiple causes and effects of global problems. In International Studies: Global Forces, Interactions, and Tensions, award-winning scholars Scott Straus and Barry Driscoll give students a clear framework that pinpoints how key factors—forces, interactions, and tensions—contribute to world events, with both global and local consequences. The authors first show students how to look for common patterns in global issues by introducing four world-shaping forces: global markets, shifting centers of power, information and communications technologies, and global governance. They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key challenges. The framework enables students to ask and answer for themselves—Who is interacting? Where did such interactions develop? What policies or institutions govern them? Why are they getting certain global and local reactions? Students then apply the framework to the global problems that matter most to them: human rights abuses, economic inequality, terrorism, forced migration, pandemics and global health responses, climate change, food security, and more. International Studies raises the bar for the Introduction to IS course, moving beyond interdisciplinary, and into the realm of critical analysis to increase student relevancy and motivation.
