

Glossary Of Financial Terms Airbus Academy

This fully revised and updated second edition provides over 7,000 definitions of travel and tourism terminology used throughout the world, highlighting the many differences between US and European usage. It covers all aspects of the tourism industry, including hospitality, transport, and ancillary services. It explains the operating language of the travel industry, acronyms and abbreviations of organizations, associations and trade bodies, IT terms and brand names, and provides website addresses. Entries vary from one-line definitions to 500 word articles, and references are provided for further reading. This new edition contains over 500 new entries and the unique cross referencing system has been extended; for example accessing any entry about business travel leads to over 70 others. It is an essential reference tool for anyone involved in tourism research, and everyone in the travel industry.

It began with a key. One afternoon in 1956, in the home of the Hitchings family in Battersea, south London, a small silver key appeared on Shirley Hitchings' bed. This seemingly insignificant event heralded the beginning of one of the most terrifying, incredible and mysterious hauntings in British history. The spirit, who quickly became known as 'Donald', began to communicate, initially via tapping sounds, but over time - and with the encouragement of psychical researcher Harold Chibbett, whose case-files appear here - by learning to write. Soon, the spirit had begun to make simply incredible claims about his identity, insisting that he was one of the most famous figures in world history - but what was the truth? Here, for the first time, is the full story, told by the woman right at the heart of it all - Shirley herself.

This book is a comprehensive exploration of the provisions of the Court of Arbitration for Sport (CAS). Providing detailed analysis of the CAS Rules. Each provision is viewed within the larger context of international arbitration, in Switzerland, and procedural solutions are suggested which are transposable to international arbitration generally.--Provided by publisher.

A fully revised and expanded guide that builds on the best-selling 2nd edition. Written by practitioners for practitioners, the book has four distinct parts, each dealing with key subjects relevant to the airfinance industry. The first section looks at the airlines' needs; the second examines the latest financing methods; the third examines country and regional markets and the final section details credit and aircraft values. Appendices cover international rights in aircraft, civil aviation, precautionary arrest and export credits. A glossary is included.

The 2020 edition of Health at a Glance: Europe focuses on the impact of the COVID-19 crisis. Chapter 1 provides an initial assessment of the resilience of European health systems to the COVID-19 pandemic and their ability to contain and respond to the worst pandemic in the past century.

The latest edition of The Illustrated Book of Development Definitions breaks new ground. It addresses traditional and new planning problems: natural and industrial disasters such as hurricanes and oil spills; new housing types and living accommodations; changes in urban design and practice like new urbanism; sustainability; pedestrian and bicycle friendly environments; and more. Joining Harvey S. Moskowitz and Carl G. Lindbloom, authors of the first three editions, are two prominent, nationally known planners: David Listokin and Richard Preiss. Attorney Dwight H. Merriam adds legal annotations to almost all 2,276 definitions. These citations from court decisions bridge the gap between land use theory and real world application, bringing a new dimension to this edition. More than 20,000 copies of previous editions were sold over four decades to professionals and government representatives, such as members of planning and zoning boards and municipal governing bodies. This first revision in ten years updates what is widely acknowledged as an essential, standard reference for planners. Although its brown vans are on every block and its delivery service reaches more than 200 countries, UPS is among the world's most underestimated and misunderstood companies. For the first time, a UPS "lifer" tells the behind-the-scenes story of how a small messenger service became a business giant. Big Brown reveals the remarkable 100-year history of UPS and the life of its founder Jim Casey—one of the greatest unknown capitalists of the twentieth century. Casey pursued a Spartan business philosophy that emphasized military discipline, drab uniforms, and reliability over flash—a model that is still reflected in UPS culture today. Big Brown examines all the seeming paradoxes about UPS: from its traditional management style and strict policies coupled with high employee loyalty and strong labor relations; from its historical "anti-marketing" bias (why brown?) to its sterling brand loyalty and reputation for quality. This comprehensive text presents descriptive and inferential statistics with an assortment of business examples and real data, and an emphasis on decision-making. The accompanying CD-ROM presents Excel and Minitab tutorials as well as data files for all the exercises and examples presented.

A Decade of Gestalt!

Mobility is fundamental to economic and social activities such as commuting, manufacturing, or supplying energy. Each movement has an origin, a potential set of intermediate locations, a destination, and a nature which is linked with geographical attributes. Transport systems composed of infrastructures, modes and terminals are so embedded in the socio-economic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived invisibility of transportation is derived from its efficiency. Understanding how mobility is linked with geography is main the purpose of this book. The third edition of The Geography of Transport Systems has been revised and updated to provide an overview of the spatial aspects of transportation. This text provides greater discussion of security, energy, green logistics, as well as new and updated case studies, a revised content structure, and new figures. Each chapter covers a specific conceptual dimension including networks, modes, terminals, freight transportation, urban transportation and environmental impacts. A final chapter contains core methodologies linked with transport geography such as accessibility, spatial interactions, graph theory and Geographic Information Systems for transportation (GIS-T). This book provides a comprehensive and accessible introduction to the field, with a broad overview of its concepts, methods, and areas of application. The accompanying website for this text contains a useful additional material, including digital maps, PowerPoint slides, databases, and links to further reading and websites. The website can be accessed at: <http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography, as well as those interest in economic and urban geography, transport planning and engineering.

The Airport Business provides a helpful overview of the field, examining patterns of ownership for some of the world's largest airports over the past twenty years. Rigas Doganis covers the key issues and economic problems which will affect airport managers during the 1990s: privatization, the growing shortfall in airport capacity, and the need to develop more innovative methods of financing. Doganis analyzes the recent development of traditional cost and revenue systems for aircraft landing fees and passenger charges. He also discusses the differences in airport management between developed an.

Over a decade in the making, this volume brings together some of the richest thinking about gestalt therapy theory and practice that emerged in the lead-up to the 21st century. In 1996, the internet was breaking out of its shell, and the first electronic journal for gestalt therapy appeared as a hybrid of the text-based discussion group Gstalt-L and the graphically rich, web-based journal itself. The journal, supported by a community at St. Johns University, was titled Gestalt!. Its vision was to stimulate a global discussion of gestalt therapy using the electronic medium that has now become so common and essential, and it did just that. Gestalt! was free. It was quick. Those working with the journal were focused on substance over style. The editors have ensured this relevant and playful attitude shines through in this collection. There are errors in form, because the editors have maintained many in order to provide a realistic feel for what the journal was like. Although it no longer exists, this book reclaims the journal's great historical value and still-significant ideas. This new edition combines within two covers: * A dictionary of 2500 terms * Descriptions of 300 organizations * A biographical dictionary of 100 personalities * Explanations of 1200 acronyms and abbreviations * Key data for well over 200 countries * A concise bibliography listing more than 100 useful sources of further information The author's long and wide experience of these fields makes this an indispensable companion for students and teachers, and those employed in relevant businesses and organizations, as well as for the travellers, tourists and guests who are the raison d'être of it all.

An Intuitive Approach to Generating Consistent Profits for the Novice to the Experienced Practitioner

Big Brown

Aviation is one of the most widely talked about industries in the global economy and yet airlines continue to present an enigma. Between 2010 and 2018 the global airline industry experienced its longest period of sustained profitability; however, huge global profits hid a darker side. Many airlines made inadequate profits or serious losses while others collapsed entirely. This fifth edition of Flying Off Course explains why. Written by leading industry expert, Rigas Doganis, this book is an indispensable guide to the inner workings of this exciting industry. Providing a complete, practical introduction to the fundamentals of airline economics and marketing, it explores the structure of the market, the nature of airline costs, issues around pricing and demand, and the latest developments in e-commerce. Vibrant examples are drawn from passenger, charter and freight airlines to provide a dynamic view of the entire industry. This completely updated edition also explores the sweeping changes that have affected airlines in recent years. It includes much new material on airline alliances, long-haul low-cost airlines, new pricing policies and ancillary revenues in order to present a compelling account of the current state of the airline industry. Offering a practical approach and peppered with real examples, this book will be valuable to anyone new to the airline industry as well as those wishing to gain a wider insight into its operations and economics. For undergraduate or postgraduate students in transport studies, tourism and business the book provides a unique insider's view into the workings of this exciting industry.

Aircraft FinancingEuromoney Books

The most accessible approach yet to children's literature and narrative theory, *Telling Children's Stories* is a comprehensive collection of never-before-published essays by an international slate of scholars that offers a broad yet in-depth assessment of narrative strategies unique to children's literature. The volume is divided into four interrelated sections: "Genre Templates and Transformations," "Approaches to the Picture Book," "Narrators and Implied Readers," and "Narrative Time." Mike Cadden's introduction considers the links between the various essays and topics, as well as their connections with such issues as metafiction, narrative ethics, focalization, and plotting. Ranging in focus from picture books to novels such as *To Kill a Mockingbird*, from detective fiction for children to historical tales, from new works such as the Lemony Snicket series to classics like *Tom's Midnight Garden*, these essays explore notions of montage and metaphor, perspective and subjectivity, identification and time. Together, they comprise a resource that will interest and instruct scholars of narrative theory and children's literature, and that will become critically important to the understanding and development of both fields.

Revised and updated in its third edition, this internationally renowned and respected book provides the essentials to understanding all areas of airline finance. Designed to address each of the distinct areas of financial management in an air transport industry context, it also shows how these fit together, while each chapter and topic provides a detailed resource which can be also consulted separately. Thoroughly amended and updated throughout, the third edition reflects the many developments that have affected the industry since 2001. It features several important new topics, including Low Cost Carriers (LCCs), fuel hedging and US Chapter 11 provisions.

Mastering the Ultimate High Ground: Next Steps in the Military Uses of Space

A Vietnamese Refugee, a Viral Video, and the United Airlines Scandal That Started It All “ His refusal to give up his seat on a United Airlines flight, and the ensuing assault he suffered, is emblematic of how far we, the people, still have to travel to create a world with liberty and justice for all. ” Marlena Fiol, PhD, globally recognized scholar and speaker and author of *Nothing Bad Between Us* Dr. David Dao was dragged off United Express Flight 3411 on April 9, 2017 after refusing to give up his seat. In the tradition of contemporary immigrant stories comes a personal narrative of the many small but significant acts of racial discrimination faced on the way to the American Dream. The unseen effects of discrimination. The United Airlines scandal of 2017 garnered over a million views on YouTube. A result of an overbooking overlook, security officials forcibly removed Dr. Dao after refusing to give up his seat. He awoke in the hospital to a concussion, a broken nose, several broken teeth, and worldwide attention. Things aren't always fair for an immigrant, but according to Dr. Dao, you can prevail if you firmly advocate for yourself. A response to a lifetime of oppressive acts. Why was Dr. Dao so adamant on his right to a seat? His entire life had led to that moment. A Vietnamese refugee, he fled his home country during the fall of Saigon. He was stranded in the Indian Ocean, immigrated to the United States, enrolled in medical school for a second time, built a practice, and started a family all the while battling the effects of discrimination and what he had to embrace as a result. This is his story. If you are moved by immigrant stories, or books like *America for Americans*, *Minor Feelings*, *How to Be an Antiracist*, or *The Making of Asian America*, then you'll want to read Dr. David Dao's story, *Dragged Off*.

The second edition of Rigas Doganis' book brings the airline industry story up to date, exploring airline mergers and alliances, price wars, the impact of disasters and the future prospects for the industry as a whole.

Talking about money sucks; but so does being broke. Do your eyes glaze over just thinking about the mumbo-jumbo of finance? Do you break out into hives at the thought of money? Well, sister, you are not alone. In *RICH BITCH*, money expert and financial journalist Nicole Lapin lays out a 12-Step Plan in which she shares her experiences, mistakes and all, of getting her own finances in order. No lecturing, just help from a friend. And even though money is typically an off-limits conversation, nothing is off-limits here. Lapin rethinks every piece of financial wisdom you've ever heard and puts her own fresh, modern, sassy spin on it. Sure, there are some hard-and-fast rules about finance, but when it comes to your money, the only person who can spend it is you. Should you invest in a 401(k)? Maybe not. Should you splurge on that morning latte? Likely yes. Instead of nickel-and-diming yourself, Nicole's advice focuses on investing in yourself so you don't have to stress over the little things. But in order to do that, you have to be able to speak the language of money. After all, money is a language like anything else, and the sooner you can join the conversation, the sooner you can live the life you want, *RICH BITCH* rehabs whatever bad habits you might have and provides a plan you can not only sustain, but thrive with. It's time to go after the rich life you deserve, and confident enough to call yourself a *RICH BITCH*.

On 2 September 2006, RAF Nimrod XV230 was on a routine mission in southern Afghanistan when she suffered a catastrophic mid-air fire, leading to the total loss of the aircraft and the death of the 12 crew and two mission specialists on board. An RAF Board of Inquiry (2007) concluded that the loss was caused by a fuel escape and its ignition by contact with an exposed element of the Cross-Feed/Supplementary Cooling Pack (SCP) duct. The Nimrod Review was set up to examine the arrangements for ensuring airworthiness and safe operation of the Nimrod MR2, to assess where responsibility lies for any failure and what lessons are to be learned. The Review concludes the most likely source of fuel was an overflow during air-to-air refuelling and agrees with the ignition source. It highlights design flaws introduced at three stages in the life of XV230, and failure to heed previous potentially relevant incidents. The Nimrod safety case drawn up between 2001 and 2005 is found to be error-strewn and incompetent and characterised by a general malaise, an assumption that the Nimrod was safe because it had flown for 30 years. The Review criticises BAE Systems, the MoD Nimrod Integrated Project Team, QinetiQ and individual personnel from those organisations involved in the safety case. Organisational causes are also identified: in-service support for equipment; major organisational changes between 1998 and 2008; and delays in procurement of the Nimrod MRA4 replacement. Lessons to be learned are profound and wide-ranging. Recommendations are made for a new approach in eight key areas: principles (leadership, independence, people, simplicity); the airworthiness regime; safety cases; aged aircraft; personnel strategy; industry strategy; procurement; safety culture. The loss of XV230 was avoidable and a systemic breach of the Military Covenant.

Around the world, a growing number of businesses are taking steps to reduce their climate impact by managing their greenhouse gas emissions. At the same time, these businesses are discovering that effective greenhouse gas management can enhance their brands, motivate employees, increase operational efficiencies, and save money. This guide walks readers through the key activities that make up a greenhouse gas management program, including measuring, reducing, and offsetting emissions and developing a communications strategy around the program. Throughout, case studies of over fifty leading businesses from around the world highlight innovation and solutions to common challenges, and further resources are provided for each section. While this guide was developed primarily for the business community, many of the greenhouse gas management practices explored can also be used by other organizations that wish to reduce their climate impact, including government agencies, municipalities, non-governmental organizations and educational institutions. Published with the David Suzuki Foundation.

Emphasises on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. This text also covers contemporary topics such as, activity-based costing, target costing, the value chain, and more.

Assesses the military space challenges facing the Air Force and the nation in light of the findings and recommendations of the Space Commission. The author reviews the Air Force's involvement in space since its creation as an independent service in 1947; examines the circumstances that occasioned the commission's creation and the conceptual and organizational roadblocks that have impeded a more rapid growth of U.S. military space capability; and enumerates the challenges facing the Air Force with respect to space.

This revised set of resources for Cambridge International AS and A Level Business syllabus (9609) is thoroughly updated for the latest version of the curriculum. Written by experienced authors, the Coursebook provides comprehensive coverage of the syllabus. Accessible language combined with the clear, visually-stimulating layout makes this an ideal resource for the course. Questions and explanation of key terms reinforce knowledge; different kinds of activities build application, analytical and evaluation skills; and case studies contextualise the content making it relevant to international learners. It provides thorough examination support for all papers with exam-style questions with each chapter and an extensive Paper 3 style case study with each unit. The student CD-ROM contains revision aids, further questions and activities. A Teacher's CD-ROM is also available.

'In Company: Intermediate' is a business English course for professional adults. It systematically develops key language skills through motivating activities that reflect the real world of modern business. The student's book contains 20 self-contained units organised into four main categories: talking points, networking, desk work and meetings. Each unit is based around a particular skill or sub-skill and extra grammar and vocabulary work is available in the section 'Grammar and Lexis links' at the end of the book.

Now in its Seventh Edition, Air Transportation: A Management Perspective by John Wensveen is a proven textbook that offers a comprehensive introduction to the theory and practice of air transportation management.

Capture the fortune you're losing with every trade by learning to exploit options The Options Edge + Free Trial shows you how to capture the fortune you lose out on every day. Buying and selling traditional investments often entails instruments with optionality. Sometimes this optionality is explicit, while other times it is hidden. If you're not leveraging these embedded options to their fullest advantage, you're losing money. Most retail investors don't truly understand the nuances involved in successful options trading and instead rely on more comfortable instruments with fewer complex mechanics. If you're interested in optimizing your portfolio, it's time to step out of your comfort zone and learn what you've been missing. This book gives you the background you need to take full advantage of options in this booming market. The companion website features easy to use analytical tools that help investors find the best opportunities so you can start applying these methods right away. Whether or not you ultimately decide to start actively trading options, the concepts discussed will make you a better all-around trader with greater security in your financial affairs. Most investors buy and sell options every day without ever knowing it. This book relates stories of those who have leveraged options to make fortunes and those who have lost by not understanding the optionality of their financial endeavors. You must know the fundamentals of options, and then learn to recognize hidden options, in order to improve success in all of your investment activities. After taking these steps, you can go on to: Create hidden options at little or no cost Structure your finances to reduce risk and increase wealth Utilize a practical pricing model for smarter investing The listed options are currently the only growing exchange traded financial product in the developed markets, with a current average volume of 20 million contracts—equivalent to 2 billion shares—per day. Now is the perfect opportunity to fortify your finances, and The Options Edge + Free Trial gives you the understanding and practical tools you need to optimize your portfolio today.

Air cargo is a key element of the global supply chain. It allows outsourcing of manufacturing to other countries and links production in both multinational and smaller enterprises. It has also been the most important driver of certain export industries in countries such as South Africa, Kenya and Chile. As a component of the air transport industry, air cargo makes the crucial difference between profit and loss on many long-haul routes. For some network combination carriers it accounts for up to half of total tonne-kms flown, and as much as one quarter of total revenue. In addition, the integrated carriers such as DHL, FedEx and TNT have their own fleets of dedicated freighter aircraft, and cargo aircraft operators like Cargolux and Nippon Cargo have a specialist role in the industry. Featuring expert analysis and worked examples to enhance understanding, Moving Boxes by Air by Peter Morrell offers a comprehensive and up-to-date guide to the business and practices of air cargo, with a chapter dedicated to each key issue, such as: current trends, market characteristics, regulation, airport terminal operations, pricing and revenues, and environmental impacts.
