Independent stock car racers rarely won, often crashed, and flirted with death constantly, all for less money and fame than the money-backed star drivers of their day. This book includes interviews with 12 independent racers, including Curtis "Crawfish" Crider, "Jackhandle Joe" Frasson, and Gene "The Racing Marine" Hobby, among others. Laying the foundation for stock car racing as we know it, most of these racers plied their trade during the sport's early years, when racing required little more than a helmet and a great deal of courage. Readers will discover how each of these men managed to survive and stand out in their sport, despite running on second-hand or inferior equipment, receiving little to no outside support, and, in many cases, holding down another job off-track. The book is supplemented with 126 photographs, many from the personal collections of the author and the racers.

***In response to a Congressional mandate, the National Research Council conducted a review of the SBIR program at the five federal agencies with SBIR programs with budgets in excess of \$100 million (DOD, NIH, NASA, DOE, and NSF). The project was designed to answer questions of program operation and effectiveness, including the quality of the research projects being conducted under the SBIR program, the commercialization of the research, and the program's contribution to accomplishing agency missions. This report describes the proposed methodology for the project, identifying how the following tasks will be carried out: 1) collecting and analyzing agency databases and studies; 2) surveying firms and agencies; 3) conducting case studies organized around a common template; and 4) reviewing and analyzing survey and case study results and program accomplishments. Given the heterogeneity of goals and procedures across the five agencies involved, a broad spectrum of evaluative approaches is recommended.***

How does your web site serve your business objectives? How does it meet a user's needs? You'll learn that navigation design touches most other aspects of web site development. This book: Provides the foundations of web navigation and offers a framework for navigation design Paints a broad picture of web navigation and basic human information behavior Demonstrates how navigation reflects brand and affects site credibility Helps you understand the problem you're trying to solve before you set out to design Thoroughly reviews the mechanisms and different types of navigation Explores "information scent" and "information shape" Explains "persuasive" architecture and other design concepts Covers special contexts, such as navigation design for web applications Includes an entire chapter on tagging While Designing Web Navigation focuses on creating navigation systems for large, information-rich sites serving a business purpose, the principles and techniques in the book also apply to

smaller and non-business web sites. The book serves as an excellent reference on the topic, as well as a superb teaching guide. Each chapter ends with suggested reading and a set of questions that offer exercises for experiencing the concepts in action.

**Are you investing in the right people? Many people know the benefit of finding a sponsor--someone who goes beyond traditional mentorship to partner with a junior-level employee to help build their skills, advocate for them when opportunities arise, and open doors. But few realize that being a sponsor is just as important to career growth as finding one. According to new research from economist and thought leader Sylvia Ann Hewlett, senior executives who sponsor rising talent are 53 percent more likely to be promoted than those who don't. Similarly, middle-level managers who have proteges are 167 percent more likely to be given stretch assignments. Well-chosen proteges contribute stellar performance, steadfast loyalty, and capabilities that you, the sponsor, may lack, thus increasing how fast and how far you can go. But how do you find standout proteges, let alone develop them so that they're able to come through for you and your organization? This book has the answers you need. You'll discover how to identify and recruit the right people, interview them with leading-edge questions, and build a relationship that works. You'll learn how to: Identify the right mix of proteges Include those with differing perspectives Inspire your proteges and ignite their ambition Instruct them to develop key skill sets Inspect your picks for performance and loyalty Instigate a deal, detailing the terms of a relationship Invest three ways and reap the rewards Along the way, you'll discover the enormous benefits of investing in these valuable relationships.**
