Portnoy's Complaint

"An eye-opening and enchanting book by one of our major scientist-explorers." —Diane Ackerman, author of *The Zookeeper's Wife* Nicknamed the "Real-Life Lorax" by National Geographic, the biologist, botanist, and conservationist Meg Lowman—aka "CanopyMeg"—takes us on an adventure into the "eighth continent" of the world's treetops, along her journey as a tree scientist, and into climate action Welcome to the eighth continent! As a graduate student exploring the rain

forests of Australia, Meg Lowman realized that she couldn't monitor her beloved leaves using any of the usual methods. So she put together a climbing kit: she sewed a harness from an old seat belt, gathered hundreds of feet of rope, and found a tool belt for her pencils and rulers. Up she went, into the trees. Forty years later, Lowman remains one of the world's foremost arbornauts, known as the "real-life Lorax." She planned one of the first treetop walkways and helps create more of these bridges through the eighth continent all over the world. With a voice as infectious in its

enthusiasm as it is practical in its optimism, The Arbornaut chronicles Lowman's irresistible story. From climbing solo hundreds of feet into the air in Australia's rainforests to measuring tree growth in the northeastern United States, from searching the redwoods of the Pacific coast for new life to studying leaf eaters in Scotland's Highlands, from conducting a BioBlitz in Malaysia to conservation planning in India and collaborating with priests to save Ethiopia's last forests, Lowman launches us into the life and work of a field scientist, ecologist, and conservationist. She

offers hope, specific plans, and recommendations for action; despite devastation across the world, through trees, we can still make an immediate and lasting impact against climate change. A blend of memoir and fieldwork account, *The Arbornaut* gives us the chance to live among scientists and travel the world—even in a hot-air balloon! It is the engrossing, uplifting story of a nerdy tree climber—the only girl at the science fair—who becomes a giant inspiration, a groundbreaking, ground-defying field biologist, and a hero for trees everywhere.

In the New York Times bestseller that the Washington Post called "Lean In for misfits," Sophia Amoruso shares how she went from dumpster diving to founding one of the fastest-growing retailers in the world. Amoruso spent her teens hitchhiking, committing petty theft, and scrounging in dumpsters for leftover bagels. By age twenty-two she had dropped out of school, and was broke, directionless, and checking IDs

in the lobby of an art school—a job she'd taken for the health insurance. It was in that lobby that Sophia decided to start selling vintage clothes on eBay. Flash forward to today, and she's the founder of Nasty Gal and the founder and CEO of Girlboss. Sophia was never a typical CEO, or a typical anything, and she's written #GIRLBOSS for other girls like her: outsiders (and insiders) seeking a unique path to success, even when that path is windy as all hell and lined with naysayers. #GIRLBOSS proves that being successful isn't about where you went to college or how popular you were in high school. It's about trusting your instincts and following your gut; knowing which rules to follow and which to break; when to button up and when to let your freak flag fly. "A witty and

Widow: A Survival Guide (Naval Institute Press, 2006)

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the

Where To Download Goldstar Refrigerator User Guide

twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations

Where To Download Goldstar Refrigerator User Guide

of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.
