

Government Of Andhra Pradesh Ap Government Portal

The development experience of Andhra Pradesh will make a very useful case study in the context of globalization as it launched many initiatives as part of the structural adjustment programme (SAP) through World Bank assistance covering important sectors like power, education, irrigation, and governance. It is probably the only state that had formulated a Vision Document to achieve an overall growth rate of 15 percent by 2020 with a massive investment of 30,000 crores basically to provide people opportunities, both social and economic “to achieve prosperity and wellbeing and enjoy a high quality of life.” An intense scrutiny of these initiatives would be extremely critical for the national economy aside being useful to other States. All this has assumed significance in the context of adopting second generation reforms involving many aspects in the State list. The present volume offers valuable insights about the reform process and experience of Andhra Pradesh.

Management of higher education systems through the instrumentality of quasi-autonomous bodies like the U.G.C. It also attempts to examine critically the institutional structure and mechanisms through which interactions between Centre and State take place. Salient Features University management-Centre-State relations Landmarks in the development of educational policy, Modes of Central financing of higher education and its institutional framework Role of Planning Commission, Ministry of Education, University Grants of Education, Central Advisory Board of Education and Association of Indian Universities in Centre-State relations and College management and development in the context of Centre-State relations.

The Andhra Pradesh Gazette

Andhra Pradesh Priorities

For the past six years, the State of Andhra Pradesh in India has been at the vanguard of efforts to modernize the economy and the state while pursuing policies to improve the lives of the poorest. The Chief Minister and head of the ruling Telugu Desam Party (TDP), Mr. Chandra Babu Naidu, is known by some as the "Laptop Minister" for his modernizing initiatives. He has reached out to international organizations and investors but has also maintained his base of support at home, in part through expanded programs in education, health, and rural development. "I have initiated so many things," Naidu said. "They are going on and will pay off after some time. But people need something today." The challenges facing the government are daunting. Andhra Pradesh (AP) is one of the largest and poorest states in India. Its population of almost 80 million approaches that of the Philippines, the 13th most populous country in the world. Even as its high-tech industries develop rapidly, AP's overall literacy rate remains a modest 44% and one-third of the population lives in poverty.

The study of the political economy of development in India is significant as India has emerged as one of the fastest-growing countries during the last three decades and the rate of economic growth and poverty reduction have not been matched in India's subnational states. Although the Union Government has introduced and implemented several economic reforms since 1991 to enhance the economic development, the results of implantation have varied. Governance and Development in India compares two Indian subnational states, Andhra Pradesh and Bihar. The book does not consider the state as an aggregate entity; rather, it disaggregates the state relationally and spatially. Concentrating on the micro-institutional variables and the role of regional elites, the author investigates the political roots of the divergence of development trajectories among India's subnational states since liberalization, as an essential aspect of the political economy of development in India. The book explores the black box of the multi-layered state of India and interactions among the Central Government, the states, regional leaders and other stakeholders and explains why the regional leaders have pursued divergent economic strategies using the analytical narrative research method and the subnational comparative research method. Firmly based on the theoretical foundations of the neo-institutional rational choice model of governance, polycentric hierarchy theory and the strategies for regional elite strategy analysis, combined with empirical research, this book is a valuable contribution to the fields of comparative political economy, state politics in India, governance and development in developing countries, and South Asian comparative politics.

This study proposes a novel analytical approach for modeling market structures of the power sector, presenting evidence from statistical analysis and a sample of twenty case studies.

Government and Politics in Andhra Pradesh

Who's who of Freedom Struggle in Andhra Pradesh

A stereotype image of Nara Chandrababu Naidu has been formed in the last 40 years. His story is remarkable at every level. But often questions, which is the important story? The one where he evolves into one of the extraordinary leaders in Indian politics over four decades? Or that of an ordinary man from a farming family who worked his way to the top by keeping his family and political party political acumen, intellect, and hardwork? Or the one that unveils the person who introduced Andhra Pradesh to India? This book attempts to show how Naidu has been a quintessential survivor in Indian politics. This book analyses how Naidu's ability to combine politics and governance has touched every aspect of Indian domestic and foreign policy, from the struggle for social, technological, economic growth, to creating world-class institutions. It establishes the fact that Naidu, today, is a symbol and an embodiment of many Indias - modern, progressive, rural and cultural.
