From best-selling author Holly Webb comes a brand new series full of mystere and intrigue following the adventures of a very determined heroine and her dog! Holly Webb fans will be thrilled to pieces to discover the adventures of Maisie Hitchens, the pluckiest little detective in Victorian London. Maisie Hitchens lives in her grandmother's boarding house, longing for adventure. She idolizes the famous detective, Gilbert Carrington, and follows his every case. But Maisie is about to be given the opportunity of a lifetime: her own mystery to solve! In the first book in this fantastic new series, Maisie rescues a puppy in peril whilst running an errand, and adopts him. She decides to investigate the puppy's original cruel owner, but instead gets tangled up in an intriguing plot involving stolen sausages, pilfered halfpennies and a fast-paced bicycle chase. The streets of Victorian London are never safe, but Maisie's on the case!

The Thoroughly Updated 13th edition of Target MH-CET 2022 book covers Previous Solved Papers (2007 to 2021) and 5 Mock tests as per latest pattern. The solution to each and every question has been provided. The Past Papers will guide you in terms of understanding the Pattern, Types of Questions & their Level of Difficulty. # Thus in all there are 14 Past Papers as the MH-CET paper was not held in 2013. # 5 Mock tests designed exactly as per the pattern of the 2021 MH-CET exam. # Each Mock Test contains 200 questions on the 3 sections: Section I: Logical & Abstract Reasoning (100), Section II: Quantitative Aptitude (50) Section III: Verbal Ability & Reading Comprehension (50) # The detailed solution to the questions are provided immediately after the tests. # A total of 3700+ MCQs with explanation.

In recent years there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student's knowledge and skills.

This book aims to highlight science education in countries along the Belt and Road. It consists of 30 chapters divided into three main parts, namely Arab and African countries, Asian countries and European countries. We invited science education experts from 29 "Belt and Road" countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology. The major contributions of this book include: 1) Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries; 2) Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road.

School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers and post-graduate students in the fields of science education and educational policy.

Raising the Impact of Education Research in Africa

Standards and Standard Setting for Excellence in Education

Popular Educator

Memoirs of the Old and New South Africa

This edited volume brings together a broad range of international science education studies, focusing on the interplay of teaching and learning science. It recognizes the complexity present in today's education, associated with major science related issues faced by society, such as climate change, diseases and pandemics, global conflicts over energy, food and water. The studies discussed in this volume are focused on presenting different opportunities to teach these convoluted matters in order to find simplicity within the complexity and make it accessible to learners. They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow.

Contains proceedings of annual, regular and special meetings.

The low demonstrable effect of education research done in South Africa in particular – and Africa in general – continues to be a problem in scientific records in the educational sciences. This scholarly collected work addresses this obstacle and focuses on recommendations from scholars in different sectorial categories in the field of education. Scholars from a variety of sub-fields within the educational sciences reflect on this particular matter, revisiting the history of research and research outcomes and offering informed recommendations based on in-depth investigation and analysis of aspects of the various discourses within the relevant sub-fields. The scope of the content of this collected work centres on the issue of the lack of scientific records concerning the scientific raising of the impact of education research. The book aims at making a specific contribution to the educational sciences by stimulating scholarly discussion around how to increase the recording of the significance of educational research done in Africa, and in South Africa in particular, and to redirect the research agenda into the direction of making more impact. Impact is conceptualised to mean both scholarly impact (that is being cited and being used as foundation for theory building and for further research) and practical impact (that is improvement of practice, teaching and learning in education institutions at all levels).

Twenty-Twenty Hindsight

Complexity and Simplicity in Science Education

Assessing Academic Literacy in a Multilingual Society

Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough . If not, then how can it be improved? The aim of this book is to provide quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.

These Proceedings represent the work of contributors to the 14th European Conference on e-Learning, ECEL 2015, hosted this year by the University of Hertfordshire, Hatfield, UK on 29-30 October 2015. The Conference and Programme Co-Chairs are Pro-fessor Amanda Jefferies and Dr Marija Cubric, both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Tech-nology, Open University, UK with a talk on "Innovating for learning: designing for the future of education." On the second day the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK on the subject of "Mobile Learning - No Longer Just e-Learning with Mobiles." ECEL provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge and exchange ideas. With an initial submission of 169 abstracts, after the double blind, peer review process there are 86 academic papers,16 PhD Papers, 5 Work in Progress papers and 1 non academic papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Cov-entry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway, Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK and USA, Zimbabwe. A selection of papers - those agreed by a panel of reviewers and the editor will be published in a special conference edition of the EJEL (Electronic Journal of e-Learning www.ejel.org) .

Transition and Transformation

Grade 12 CAPS, 2 in 1

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Twenty-twenty hindsight means perfect understanding of events only after they have happened. In his book, Mosiuoa Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new, democratic regime. His story is highly personal, but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. I had a quick read and I fi nd the content heartbreaking but fascinating. Especially as a white South African you are drawing me into a world that I always knew existed, but which few people have the guts and conviction to paint into words.
