Question 1

The Chinese Communist Party's response to the wave of factory strikes in the early summer of 2010 has raised important questions about the role that labour plays in the transformation of world orders. In contrast to previous policies of repression

towards labour unrest, these recent disputes centring round wages and working conditions have been met with a more permissive response on the part of the state, as the CCP ostensibly seeks to facilitate a transition away from a model of political economy

based on 'low-road'
labour relations and
export dependence.

Labour and

Development in East
Asia shows that such
inter-linkages between

Science Paper 1

Question 1
militarization The long

and complex history

of militarization How

the war on terror has

transformed into a

values system that

prioritizes the military

The ways in which

performance can be

used to secure and

maintain power across

social strata

Performance in a
 Militarized Culture
 draws on

performances from
North, Central, and
South America;
Europe; the Middle
East; and Asia to
chronicle a range of
experience: from those
who live under a daily
threat of terrorism, to

others who live with a distant, imagined fear of such danger.

An insightful study of how identity is mobilized in and for war in the face of homegrown terrorism.

“You are either with us, or against us” is the refrain that captures the spirit of the global war on terror. Images

of the “them” implied
in this war

cry—distinct foreign

“others”—inundate

Americans on hit

television shows,

Hollywood

blockbusters, and

nightly news.

However, in this book,

Piotr Szpunar tells the

story of a fuzzier

image: the homegrown

terrorist, a foe that blends into the crowd, who Americans are told looks, talks, and acts “like us.”

Homegrown delves into the dynamics of domestic counterterrorism, revealing the complications that arise when the terrorist threat involves

Americans, both residents and citizens, who have taken up arms against their own country. Szpunar examines the ways in which identities are blurred in the war on terror, amid debates concerning who is “the real terrorist.” He considers cases ranging from the white

analysis of sports law

in Ireland deals with

the regulation of

sports activity by both

public authorities and

private sports

organizations. The

growing

internationalization of

sports inevitably

increases the weight of

global regulation, yet

each country

maintains its own distinct regime of sports law and its own national and local sports organizations.

Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-

created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions,

However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities.

This form of

regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-

Science Paper 1

Question 4

of the coming climate crisis How will climate change affect our lives? Where will its impacts be most deeply felt? Are we doing enough to protect ourselves from the coming chaos? In Extreme Cities, Ashley Dawson argues that cities are ground zero for climate change, contributing the lion's

share of carbon to the atmosphere, while also lying on the frontlines of rising sea levels.

Today, the majority of the world's megacities are located in coastal zones, yet few of them are adequately prepared for the floods that will increasingly menace their shores.

Instead, most continue to develop luxury

waterfront condos for the elite and industrial facilities for corporations. These not only intensify carbon emissions, but also place coastal residents at greater risk when water levels rise. In Extreme Cities, Dawson offers an alarming portrait of the future of our cities, describing the efforts

of Staten Island, New York, and Shishmareff, Alaska residents to relocate; Holland's models for defending against the seas; and the development of New York City before and after Hurricane Sandy. Our best hope lies not with fortified sea walls, he argues. Rather, it lies with urban
